TERMS: CASH. FRANK PETER, Auctioneer, T. W. Thompson, Clerk.

WANTED Live and dressed poultry. Highest market prices. Apply: A. BARNETT & SON, Phone: Brampton 343 r 14 (Reeve charges).

LIMEHOUSE

The quick work of a few neighbours averted what might have been a disastrous fire last Wednesday morning, when the back kitchen of the house, occupied by Mr. and Mrs. W. F. Shelbourne and family caught fire.

Mrs. W. I. Newton, of Barrie, spent the week end with the Newtons. Miss Helena Wilson, of Georgetown, visited Miss Shirley Wright Saturday. Communion services will be held at Limehouse Presbyterian Church on Easter Sunday.

A very enjoyable evening was spent when the local W.I. sponsored a euchre box social and dance at S. S. No. 9 on Friday evening. Mrs. Osborne and A. W. Benton won high scores for euchre and Miss Gwen Hill the door prize.

W. O. Brownridge in his usual jovial manner auctioned the boxes, some of which were newly and tastily decorated.

Music was supplied by Garnet Kay and a friend, with Mrs. Meredith accompanying them on the piano, Mr. Joe McDonald being floor manager.

Mr. and Mrs. W. Shelbourne are very grateful for the help of neighbours when their home caught fire recently. We extend sympathy to the family of Mr. R. W. Johnson, Thornloe, former postmaster at Limehouse, who passed away Saturday, April 1st, following a lengthy illness.

HORNBY

Although the calendar says it is over, winter still lingers in the lap of spring. April has come, but instead of bringing warm showers it has given us snow flurries so far.

We wonder where the little birds are finding a warm shelter from the cold winds of these wintry days and nights. Miss Mary Kirk, of Frelton, Ont., visited last week at the parsonage.

Mr. and Mrs. Dennison, of Port Credit were guests at the home of Mr. and Mrs. Stanley Learmont on Sunday last.

Miss Jardine resumed her duties in the Public School last week after being laid up for several days with an attack of flu.

Everyone in the village is glad to welcome Mrs. McIntosh back to her home again this week, after she had spent the winter months in the home of Mr. and Mrs. Fred Huffman. Congratulations to Mr. and Mrs. Addison Woodley (nee Reta Huffman) on the birth of a second daughter in Milton hospital a week ago last Tuesday.

The Easter Thank-offering service of Ashgrove W.M.S. auxiliary was held at the parsonage on Tuesday afternoon of this week with a large attendance. Mrs. Milton Bird was guest speaker.

Let everyone celebrate Easter by attendance at church service next Sunday. And as Christians let us keep Holy Week in a fitting way, remembering all that Christ suffered for us.

CARD OF THANKS We wish to express our sincerest thanks to friends and neighbours for their many kindnesses, flowers and expressions of sympathy in our recent sad bereavement.—Bonnie Carlisle and Barbour Family.

M.O.H. Report For 1943

To the Chairman and Members, Local Board of Health of the Municipality of Georgetown, Ont. Gentlemen: I beg to submit my annual report upon the health and sanitary condition for the municipality for the year ending December 31, 1943.

Statistical Statements Our population, as shown by the Assessor's returns is 2468. According to the records of the Division Registrar, there occurred during the year 10 births of which 1 was a still-birth. Deaths from all causes numbered 21. There occurred 2 deaths under 1 year, and no maternal deaths.

This statement does not accurately represent the situation in Georgetown, as many births and deaths of Georgetown citizens occur in hospitals. These are registered by the municipality in which they took place.

An analysis of municipal statistics indicates as follows: (a) Except for 2 deaths under 1 year, and 1 at the age of 20, the average age of death was 73.5 years of age. Of all deaths, 11 were males and 10 were females.

(b) Of the 21 deaths, 14 were caused by diseases of heart and blood vessels, all occurring from age 53 to age 92. Three were caused by cancer. There were no deaths caused by violence. The 2 deaths under 1 year were caused by (1) prematurity; (2) still-birth.

From a public health standpoint, these figures indicate a comparatively satisfactory situation. Child mortality is low and there was no maternal mortality. Two thirds of the deaths were caused by degenerative diseases of heart and blood vessels, occurring in the older age group.

Financial Statement Expenditure: The total spent during the year was \$2906.07. (1) Amount paid for salaries was as follows: Medical Officer of Health \$250.00 Public Health Nurse \$500.00 Sanitary Inspector Nil Other Salaries Nil

Total for salaries \$750.00

(2) Amount of total expenditure for sanitary work (garbage collection was \$1690.00. (3) Total amount spent on treatment and control of Communicable Diseases was nil.

Summary of Progress in Local Health Programme

In this section I wish to speak of the work accomplished during the year in general terms only, as more detailed accounts of specific projects and problems follow in the course of the report. Under the statutes certain duties are required of the Local Board of Health and I shall deal with these first.

Sanitation—There has been little change in sanitary conditions during the past year chiefly on account of war conditions with the exception of the institution of a garbage collection.

Schools—Both schools are old buildings and the maintenance of high sanitary standards is difficult. The staff and caretakers of both schools keep them in good order.

The High School requires an assembly hall, gymnasium, cloak room, accommodation, facilities for noon lunches and improved artificial lighting. The general sanitary standard is graded as FAIR.

The Public School is graded as GOOD, after making due allowances for the age of the building.

Domestic—During the past few years, the building of new homes and the renovation of old ones, with the installation of modern sanitary conveniences has definitely improved domestic standards. There are still about half a dozen homes where such standards are extremely low; they are a disgrace to the town.

Industrial—There is a great variation of standards of sanitation in town industries. Some are totally inadequate, others are satisfactory.

Slaughter Houses—There is one, situated within the municipality. Sanitary conditions there are satisfactory.

Nuisances from Industrial Wastes—Pollution of town streams by industrial wastes continues. This will not be completely eradicated until a sewer system is installed. A smoke nuisance has been present in one district for several years and has been reported on frequent occasions. The Board of Health is unable to take any action as smoke is not considered in the Public Health Act to be a public health responsibility.

Licensing of Boarded Homes—There is no licensing of such homes. No complaints have been received by your Board of Health concerning these homes.

General Survey of Other Local Problems Sewer System—About 75 per cent of all complaints of nuisances are concerned with improper disposal of sewage. Your Board of Health has been forced to recommend temporary expedients which will make more trouble in the future. It is recommended that a complete sewer system be installed as soon as general economic conditions permit.

Garbage Collection—During 1943 a garbage collection system was instituted. This has been a splendid contribution toward the raising of sanitary standards in town. Unfortunately it has added an unpleasant complication in the form of an increase of rat population in the district about the "dump". Any local measures to eradicate the rats are of temporary value. The grounds for the disposal of garbage are improperly sited for sanitary and aes-

thetic reasons. The "dump" should be situated outside of the municipal limits and provided with an incinerator. Efforts are being made to change the location. At a later date an incinerator should be installed. This is not feasible at present on account of the cost (about \$35,000) and shortage of materials.

In a former article in this paper we reviewed communicable diseases in general. The following is a paragraph from the report on prevention.

Prevention—A general campaign of immunization was not carried on in the municipality during the past year. Each year, however, every pre-school child and every public school child is given the opportunity for free immunization against diphtheria and small-pox. The work was done by the Local Board of Health in the following manner:

During the fall term of the Public School, all parents of the incoming primer class school children are asked to sign "Consent Forms" signifying their desire to have their children immunized against diphtheria. Children of other classes who have not already had the opportunity are also treated if their parents consent. Any pre-school children who are brought to the clinic are immunized.

Treatments consist of three injections in the arm—two, at three weekly intervals. It has been found that the immunity against diphtheria begins to wane in some children after five or six years. Accordingly, children who were immunized during their first year of life—the ideal time—are given a reinforcing dose when they enter school. With such treatment, 95 per cent of children are completely protected against diphtheria.

There has not been a case of diphtheria in Georgetown for fifteen years on account of this immunization programme. Records indicate that centres where intense immunization is carried out are relatively free of diphtheria; they also show the reverse to be true. This procedure is carried out on all personnel of the armed forces. 86 per cent of all the Public School children in Georgetown have been immunized against diphtheria.

During every winter or spring term, all school children and any pre-school children presented, are vaccinated against smallpox. This consists of a single treatment similar to that given to all personnel of the armed forces. At present 69 per cent of the Public School population is protected against smallpox. The public at large is inclined to be somewhat lax about smallpox vaccination. In enlightened European countries, vaccination is practically universal, but a large proportion of Canadians is unprotected. With modern rapid communication and more free intercourse with other countries after this war, the danger of the introduction of smallpox and other diseases becomes less remote. Further, such epidemics have occurred in Canada in recent years.

Group immunization against scarlet fever has not been carried out in Georgetown. Although scarlet fever toxin is available, it is the opinion of your Medical Officer of Health that it is not sufficiently efficient to be used in the school.

A very effective whooping cough vaccine has been developed in recent years. This has not been used for Public School children. The dangerous age for children is during pre-school years. Infants should be inoculated before they are one year old. Many parents underestimate the seriousness of whooping cough. This disease caused, during recent years, almost three times as many deaths as measles, scarlet fever and diphtheria combined, in children under one year old. In this group, one out of four die. This vaccine is being used extensively by physicians in private practice.

Extent of Immunization Program The records of the Local Board of Health show for: Diphtheria 42 persons immunized and 42 certificates granted; Scarlet Fever, nil; Smallpox, 39 persons immunized and 39 certificates granted; Whooping cough, nil.

Christian Young People's Rally for Georgetown, Milton, Acton, and surrounding districts. EASTER MONDAY 8.00 p.m. In GEORGETOWN UNITED CHURCH. ADDRESS BY REV. J. M. FINLAY. Rev. Finlay will speak about 9 p.m. A cordial invitation is extended to anyone who would like to take advantage of this opportunity of hearing one of Toronto's outstanding radio preachers in person. The subject will be "Unconditional Surrender."

THE ONTARIO HOSPITAL TRAINING SCHOOLS FOR NURSES. Applicants are now being selected for entrance to training in the following Mental Hospitals: Brockville, Hamilton, Kingston, London, New Toronto, Whitby. A two years course of training is offered in the home hospitals, followed by one full year in affiliation at specially selected General Hospitals throughout the province. This course leads to Provincial Registration. During the full three years training a generous Monthly Allowance is given. For detailed information apply to SUPERINTENDENT, ONTARIO HOSPITAL at One of Centres Listed.

Scientific Protection

NEVER has the chemist meant so much to the world as today. He is indispensable to our war effort, health and comfort because of the scientific protection he provides. Scientific protection has been a feature of Brantford Roofing for nearly 40 years. Fine materials, skilled workmanship and research have given

Brantford Roofing that outstanding ability which has safeguarded thousands of Canadian homes against sun, rain, wind, snow, sleet ; ; ; and fire! A Brantford Roof is easily applied and will not curl, warp or split. It will delight you with its soft, warm beauty—a source of enduring pleasure at very reasonable cost.

Brantford Roofs Brantford Roofing Company Limited, Brantford, Ontario. For sale by The Georgetown Lumber Company Limited
