**CARD OF THANKS**

Mr. and Mrs. William Bowman and family wish to thank their many friends and neighbours for their kindnesses and letters of sympathy since the sad word was received of the death in France of their son, Lieut. John Bowman.

**IN CASE YOU ARE INTERESTED**

HUGHES CLEAVER

After the Family Allowance measure was tabled in the House of Commons and debated, all members of the House, including the Conservative Opposition voted unanimously for the bill but some people are still using the same arguments against it which the Conservative party used before knowing its full terms. I will answer one of these each week.

**1. IT IS A BRIBE TO THE ELECTORS:**

Every well-to-do person receives a reduction from his income tax of \$150 yearly for his wife and \$108 yearly for every child under eighteen. This is \$9 per month per child. These deductions from income tax have been in force for many years and no one considers them a bribe or a dole. The Family Allowance measure simply extends this principle to the low income groups who do not earn enough wages to profit by the income tax deductions for children. In the light of these facts just what do you think of the argument that this Family Allowance is a dole or a bribe?

**It Doesn't Leave a Lot for the Civilian**

WHEN war demands have been filled... when invasion gasoline, aviation gasoline, Navy fuel oil, petroleum for the manufacture of explosives, synthetic rubber, and gasoline for war industry, farming and essential trucking all have been taken from Canada's oil supply—it doesn't leave a lot for the civilian!

Figure it out for yourself. It takes 5,250,000 gallons of gasoline to fuel 5,000 bombers and fighters for a mission over Germany. It takes enough oil for one fueling of a battleship to heat an average house for 350 years. It takes 18,000 gallons of gasoline to keep one armoured division on the move for one hour.

From petroleum and petroleum-gases we obtain the gasoline and fuels needed to power planes and ships and tanks as well as the raw material for acetone, ammonia and toluol for explosives, organic chemicals for anaesthetics, naphthas for camouflage paints and plastics and resins for war weapons production.

This is why civilian gasoline is short. This is why it's so expensive. This is why it's rationed. This is why it's so precious to every owner of an oil-burned motor.

Answering Your Questions about the Gasoline Shortage

What are Canada's total yearly requirements of motor gasoline? ... Approximately 800,000,000 gallons. Do these requirements have to be covered by military and civilian supply? ... Yes. Why cannot this supply be increased? ... Because total hemispheric supplies are inadequate to meet both the colossal war demand and civilian needs. There is not enough oil, there are not enough tankers, for both. How much of Canada's petroleum needs is supplied from Canadian wells? ... Only 15%. Why can't this home production be increased? ... Every effort is being made to do so. More new wells are being drilled or prepared for drilling, than at any time in the history of Western Canada, but we have yet to find a new Turner Valley. War does not wait for new production.

**LESS CIVILIAN GAS MEANS MORE "FIGHTING GAS" FOR THE FORCES**

An announcement issued by The Department of Munitions and Supply, Honourable C. D. Howe, Minister
