DON'T CONFUSE THE SIGNALS

War came. The manufacture of most civilian goods had to be cut down or stopped to make way for war production. That caused shortages of civilian goods—that was the RED LIGHT

don't jump the YELLOW light

Some restrictions are now being lifted, but it does not mean lots of goods right away. War's demands are still huge and must come first. We can't neglect them just so that some of us here at home can get a little more.

Don't confuse the signals—(This is the YELLOW LIGHT ONLY).

It means a little more of some things and it helps business men get ready for the time when there will be more materials and workers available.

It does not mean the end of shortages!

Getting back to peacetime production will necessarily be piecemeal and gradual.

"Patience" is the word.

it's NOT the green light yet

Only after Victory over both enemies can the Green Light be switched on, and the road cleared for enough production to meet all our civilian needs.
