WHERE ARE THE HYDRO LINES?

ARE YOU, TOO, WAITING FOR HYDRO RURAL SERVICE? If so, you can be sure that Hydro is working in your direction as fast as possible. Actually, in 1944, The Hydro-Electric Power Commission of Ontario constructed 10 times as many miles of rural lines as in 1943.

In 1943, there were approximately 40 miles of rural lines constructed.

In 1944, there were approximately 400 miles of rural lines constructed.

Consumers added in 1943 numbered 2025.

Consumers added in 1944 numbered 9776.

Wartime shortages of manpower and materials prevented even greater expansion in 1944; as an example, some 1200 Hydro employees are in the armed forces or on loan to the Government for special technical work . . . many materials needed in the construction of Hydro lines are also required in the manufacture of war weapons . . . your Hydro is doing its best under the existing conditions to provide electricity to essential services.

There are now about 8000 applications for new rural services which have been approved that will be connected as soon as possible. However, there will probably be further delays because of the acute shortages of manpower and materials as a result of wartime conditions. If the Hydro lines seem unduly slow in getting to your farm, please understand that the Commission while handicapped is none the less doing its utmost to serve you.
