**FROM CANADA TO CALCUTTA**

Your bank is a link between the man  
 in Canada who has goods and services  
 to buy or sell, and his customers abroad.

The business of your bank is not all done in dollars and cents.  
 It renders valuable service to Canadian business in the far-off  
 market places of the world, overcoming the obstacles of strange  
 currencies, be they pesos or piasters, escudos or rupees.

Through its commercial correspondents and business connections  
 all over the globe, your bank often has the specialized informa-  
 tion necessary to bring buyer and seller together, no matter  
 how far apart they live.

Your bank is able to gather information on the reliability of  
 foreign firms, to handle letters of credit, to arrange the compli-  
 cated exchange of funds, performing an individual, intricate and  
 inexpensive service to importers and exporters alike.

This feature of Canadian banking has a direct bearing on your  
 welfare. It has, through many years, developed the sale of Cana-  
 dian goods abroad, resulting in more jobs for Canadian men  
 and women.

**THREE SUCCESSIVE HOLES  
 INTERSECT ORE-BODY at**

**MALGA Porcupine**  
 Gold Mines Limited

MALGA PORCUPINE is currently diamond drilling to explore  
 the continuity, at depth, of their important Sulphide Zone.  
 Previous drilling and magnetometer survey has already proved  
 up a surface continuity for a length of nearly TWO THOUSAND  
 FEET—with both ends still open.

The same drilling, and extensive milling of bulk ore taken  
 from an open cut, indicated 80,000 tons of ore—of better than  
 \$12.00 in gold, per ton—on less than 5% of the potentially  
 productive structure on this formation.

Now—three diamond drill holes have  
 revealed the continuity of this ore body at  
 successive depths of 200', 320' and 400'. Since  
 the formation dips at 30 degrees, the last  
 intersection shows a continuation of the ore  
 body for 900' from the surface.

Send Request NOW, to Receive Assay  
 Reports—as soon as they are released

The mine-making implications of such drill results as these—  
 particularly in the Porcupine camp—are exceedingly important.  
 Assay results from core sections will be available very shortly. To  
 receive this information, immediately upon its release, write, wire,  
 or phone your request—at once—to
