Sept. 5 Clerk Township of Esquewaug

Playing safe with TEXTILES

The supply of textiles is not adequate to the demand. For six years, most of the world output has gone to war. Victory has not improved the situation. There will not be enough textiles in Canada for many months to come.

HERE ARE SOME OF THE REASONS

Canada depends largely on other sources for raw materials and for some yarns and fabrics.

A serious manpower shortage still confronts the textile industry of all Allied countries.

Shortages overseas must be met. It will take months before production is resumed in Europe.

Substantial quantities of all kinds of textiles are still required by occupational forces.

Domestic demand for textiles increased sharply during the war. It is still going up.

Civilian clothing needs of returning servicemen and women are swelling the demand here at home.

CONSERVATION IS THE KEYNOTE

This year, production directives have again been issued to the textile industry. They are intended to divert output to more essential goods. But directives alone cannot cure a situation arising from world conditions. The answer lies in conservation. More than ever, the need is to conserve, to take care of what there is, to mend, make-over and make-do.

TO PROVIDE CANADIAN WOMEN with guidance and practical assistance in maintaining the family wardrobe, the Board has prepared a series of advertisements, to assist Canadian women. Each subsequent advertisement will illustrate tested ways of styling new and fashionable moded garments. For valuable hints on style, economy and CONSERVATION, watch these columns.
