WE'LL JUST HAVE TO TAKE A SMALLER SLICE

by Collins

We had it before...
LET'S NOT HAVE IT AGAIN!

The Worst Inflation came after the last war
NOW is the Real Testing time ...

Victory has been won on the battle front but we must not relax our efforts. We are to continue to avoid the evils of inflation and deflation.

We are rapidly moving towards the day when shortages will be overcome—but reconversion takes time.

The danger of inflation, and its black shadow—deflation—will last as long as goods are not enough to meet demands.

The ending of the war brings the temptation to scramble for things we've been without, and to offer to pay any price to get them.

That's the way inflation gets started. Inflation with its soaring cost of living is bad enough.

But inflation is always followed by deflation with its falling prices, bankrupt businesses, unemployment and distress. Deflation would be a calamity that would involve every man, woman and child in Canada.

The only controls that are being maintained are those that aid the production of needed supplies and their speedy and fair distribution to the public, and which prevent an inflationary price rise.

As soon as conditions warrant, these will be dropped.

Until industry gets back to normal production, price ceilings, rationing and some controls are a necessary safeguard for everyone of us.

Keep them working.

IT'S YOUR JOB AND YOUR SAVINGS THAT ARE AT STAKE

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation and unemployment later.
