THE CHALLENGE OF AN EMPTY PLATE*

In most liberated European countries, there is a desperate shortage of meat. As a great food-producing nation, Canada must, can—and will—help to meet the emergency. The job will not be finished at the year's end. Food scarcities in Europe will continue into the next harvest.

How soon can we bridge the gap? Livestock marketings are normally at their heaviest in the last four months of the year. If we are to help feed the hungry peoples of devastated Europe, this is the time to make our greatest effort.

To do our part, we must reduce our own consumption of meat and also assure that everyone in Canada gets a fair share. That is why rationing is necessary.

MEAT RATIONING ADDS TO EVERYONE'S WORK

The producer who slaughters, the retailer who sells, the consumer who buys and eats—they all play a vital part.

AS A CONSUMER, HERE IS HOW YOU CAN CO-OPERATE

1. Try to plan your meat purchases before leaving home by determining what cuts you intend to buy and their approximate weights.
2. Make sure you have enough valid coupons and tokens to cover your proposed purchases by referring to the Consumer Coupon Value Chart and the Coupon and Token Calculator. Copies may be obtained from your Local Ration Board or Ration Branch.
3. Know the dates your "M" coupons become valid.
4. Do not buy more meat than you really need.
5. Avoid shopping at rush hours.
6. Be patient. Remember—your butcher may have inexperienced help.
