... There She Goes!

YES, there goes the whistle that means jobs! But remember! Factory whistles will keep blowing ... smoke will keep pouring from factory chimneys, only if you and all of us do our part to keep Canada's dollar sound. And unless we keep the Canadian dollar worth a dollar, we're headed for inflation, and its inevitable result—depression!

Canada's active fight against inflation is a vital part of all our post-war planning. We Canadians must now—more than ever now—fight to keep Canada's dollar worth a full dollar!

Why now especially? Because now civilian goods are scarce, and yet money is plentiful. This is a dangerous condition.

It means we must maintain controls and price ceilings; support rationing and urge the support of rationing. We must buy wisely and with the greatest care: be on guard at all times, checking, working, fighting to keep Canada's dollar sound. If we do this, we can keep prices from rising. If we don't, some day we'll be paying a dollar for 30c worth of goods, which means our dollar is only worth 30c.

We know what happened after the last war! We must fight against it happening again. For our own sakes—for the sake of the men who fought overseas and to whom we owe a future with a job, we must keep Canada's dollar worth a full dollar. We must keep up an active fight against inflation!

Make this Pledge Today!

I pledge myself to do my part in fighting inflation:

- By observing rationing and avoiding black markets in any shape or form.
- By respecting price controls and other anti-inflation measures, and refraining from carelessness and unnecessary buying. I will not buy two where one will do, nor will I buy a "new" where an "old" will do.
- By buying Victory Bonds, supporting taxation and abiding by all such measures which will lower the cost of living and help keep prices at a normal level.
