### DID IT EVER HAPPEN TO YOU?

Just recently one of our town's good ladies prepared for her husband's lunch, an especially good chili con carne. At the moment of seating himself for this fine meal the telephone called her away. Being a creature of habit and slightly short-sighted, he proceeded to use the condiments in his usual manner. Lifting what he took for the salt shaker he lavishly adorned the victuals. Then lifting the other shaker he was slightly more sparing. However, observing that the last was pepper he again proceeded to adorn the meal with the other or former shaker.

Result??

CHILI CON CARNE PLUS PEPPER  
The good lady had forgotten to mention that a mistake had been made that morning.

### What kind of Clothes does the Devil Wear

Listen for five minutes in almost any train, tavern, barber-shop or any other gathering where there is a discussion going on.

You will hear somebody doing a job on business or labour, on politics or professors, painting them blacker than black. You can fairly smell the brimstone.

Maybe you will notice this odd fact too, the less the speaker knows about the people he or she is criticizing, the more furious and blistering the comment is apt to be.

Nobody hates business as much as the people who have never worked in business.

People who do not bother to vote are the most contemptuous of the government.

Business men who never read what the professors are really saying are surest that nothing they say makes sense.

And it is usually the people who never lived with labour who see hooves and forked tails sticking out of the factory workers' overalls.

If you have been around and lived with people of all kinds you are not likely to hand down these easy black and white judgments.

You see (as all of us do when we think about it that most Canadians—business men—politicians—farmers—factory workers—professors—foremen—are decent, honest citizens that have their share of self interest, but all of

them have contributed to the growth of Canada.

In short no group wears the devil's clothes.

But the danger is, we may think some particular group does and impute ourselves from all the writings, pronouncements and opinions of any individual in the group.

Problems like today's do not need heat, they need light. They need light from more than one source. They need the pleasant light of the fellow who agrees with you and the disagreeable light of the fellow who does not.

We must keep ourselves informed about public affairs.
