AN Assured EGG MARKET FOR THE Lifetime OF YOUR 1946 CHICKS!

CONFIDENCE IN THE MARKET

RIGHT NOW you can look ahead and see a profitable, and assured, market for eggs for at least a year and a half—the normal lifetime of your 1946 chicks. The "gamble" has been taken right out of poultry.

There is no reason to suppose Canadians will seriously cut down on their egg consumption—which is high. Then, too, the British egg contracts have been settled not only for 1946, but for 1947, providing a basic floor price for all the surplus eggs we are likely to produce. British requirements for 1948 will be announced before the end of 1947. The demand for poultry meats—both domestic and foreign—is equally strong.

CONFIDENCE IN BRAY CHICKS
 —Bray chicks are bred to be vigorous, thrifty, fast growing and quick developing—the very qualities you must have in May chicks to have them mature and laying for the profitable fall and winter season. If you have been holding off ordering your Bray Chicks for 1946—or if you need additional chicks to take care of summer losses and fall culling—place your order now. You can have confidence in the market. You can have confidence in Bray Chicks.
