

Ready AND ABLE FOR THE BIG TASK AHEAD

With silent yet perceptible determination and an awareness of the urgency of the great need for foodstuffs, the Canadian farmer has accepted the responsibility which is his to maintain and increase the output of farm products so important in our national economy and so essential to relieve the critical shortage in world supplies.

Provided, as he now is, with purpose nobler than self-interest, he sets himself to the task with loftier ambition and renewed energy. Eager he is for that conscious recognition within himself of having a definite and necessary part in the national welfare in its domestic and export activities. Zealous is he that his contribution may be worthy and adequate.

By his side, ever ready to help make more effective the farmer's effort is the Canadian implement maker whose co-operation in furnishing the most efficient machines enables him to multiply his output and extend his activities so that today he produces more with less manpower and in the most economical manner yet attained.

Never were the opportunities in agriculture more promising—never was the Canadian farmer better fitted or better equipped to make the most of those opportunities. In the future as in the past Massey-Harris will endeavour to develop, supply and service equipment that will make it easier for the farmer to fulfill his plans and aspirations.

HAPPY HOLIDAYS!

The lakes and streams and forests of holiday land are yours to enjoy . . . and yours to protect from their greatest enemy, fire.

Most forest fires are started by human beings. Thousands of acres are blackened and destroyed every year because someone was not careful with fire.

When you use a match, break it in two before you throw it away. Be sure your discarded cigarette is out too.

When you make a campfire, build it small and in a safe place.

When you leave, put the fire dead out with water.

What forests do for you:

- Give you a grand place to holiday.
- Provide beauty spots for our visitors.
- Shelter game animals and fishing haunts.
- Control flow of water . . . help even the flow of rivers so they do not dry up in summer.
- Help to ensure a year-round supply of Hydro power for you.
- Provide thousands of jobs in lumber, pulp wood and other forest industries.
- Influence climate so as to prevent extremes.

Enjoy your Holidays but protect our Forests
