Yanks Refresh Selves With Own Bathhouse

Quartermaster corps sterilization and bath units are fully equipped to provide battle-weary G.I.s with warm showers and clean garments, but there are times when these mobile outfits are unable to provide continuous service for all troops. A quartermaster service company, attached to the Fifth Army in Italy, solved its own problem of personal sanitation by use of home-made equipment.

A tent was set up in a central location; wooden duck-boards, built from scrap lumber, formed a floor. The tent is heated by a coal-burning stove placed in the center, and a 55-gallon drum of water, placed just outside the tent, is warmed with an immersion-type heater.

Other 55-gallon drums, halved from top to bottom, with sides and edges hammered smooth, serve as tubs. An enlisted man is detailed to keep the 55-gallon drum outside the tent filled with fresh water. Each man, as he enters the tent, carries in with him his hot water. When one of the half-dozen bath-tubs is vacated and cleaned by its previous occupant, the new bather takes over. About 50 men use the bath tent each night, and every man in the company may have a hot bath every four nights. Time limitation for each bather is 15 minutes.

Sanitation System Aids Swine Growth

About 25,000,000 pigs a year are healthier, fatter, and perhaps even happier because of a sanitation system developed by scientists of the U. S. department of agriculture. The average weight of a "sanitation" pig four months old is about 28 pounds more than one raised the old way.

The system also reduces death losses and effects substantial savings in feed for both pigs and sows. Farmers using it report raising as many pigs from two sows as they did from three when using older methods.

The swine sanitation system, which was developed during and shortly after the First World war, begins with a thorough cleaning of farrowing quarters with lye solution. The next steps are brushing the sows well, washing their udders with soap and water, and putting the sows in the clean pens a few days before farrowing. When the pigs are about ten days old, they and the sows are hauled to clean pasture. This mode of travel keeps them from picking up infection on the way. The pigs remain on pasture for at least four months, after which danger from roundworms is largely past.

Smotherers Fish

Snow, by shutting off light from the water, interferes with normal oxygen producing functions of water plants with the result that oxygen content of water may drop to a point where fish smother. Some tests have shown a decided oxygen depletion.

In some localities where the plight of fish has been discovered, remedial action such as cutting holes through the ice and using air pumps has been attempted but past experience has demonstrated that such relief is temporary and decidedly limited. The most practical relief for fish is believed to come through clearing the ice surface of snow to permit light rays to penetrate.

Large, deep bodies of water usually contain insufficient dissolved oxygen to tide fish over an adverse winter period while the fish kill is usually heavy in waters less well equipped for the wintering of a fish population.

Fruit Coloring

The fruits that turn brown when cut and exposed to air—apples, peaches, sweet cherries, plums, prunes and nectarines—have always been a problem to the processor. Whether they are to be frozen, canned or dehydrated, they must have some prompt treatment to prevent discoloration from the oxygen in the air and their own natural enzymes. Recently commercial packers of frozen fruit have been trying out ascorbic acid (vitamin C), with sliced peaches for quick freezing. The ascorbic acid is an anti-oxidant and retards discoloration. It also adds vitamin value to the fruit and may help protect the natural vitamin C and the natural flavor from destruction or change by oxidation. The synthetic ascorbic acid is so low in cost that it adds little to the expense of processing.

Prepare Cow

The amount of milk a cow gives often depends upon the noises she hears and the attention she receives just before being milked, extensionists say. For this reason it is wise to establish routine milking practices that not only will do the milking properly but also prepare the cow for the chore. Feeding, rattling of milking equipment, and washing to the udder are some of the things that tell the cow that milking is to follow. Her nervous system responds by starting the milk through the milk ducts ready for removal. This requires about one minute and is at its peak for only two or three minutes, so fast milking is necessary to get the most milk. Excitement, fright, or nervousness creates the opposite effect, and the milk doesn't come down. Gentle treatment pays.

LIMEHOUSE

L.A.W. Helen Mills left on Saturday for a four week trip to Vancouver. Mr. and Mrs. Wm. Bell of Georgetown visited Mr. and Mrs. Wm. McDowell last week.

Mr. and Mrs. Sid Kirkpatrick and daughters and Mr. and Mrs. Jas. Kirkpatrick spent the weekend at Newcastle.

Master Allan Ellerby is holidaying in Toronto this week and Mr. J. L. Ellerby spent the week end there.

Mrs. Smethurst and family spent the holiday week end at Barrie.

Mrs. Jack Smethurst and Jacqueline spent last week in Toronto.

Mr. and Mrs. Gordon Grieg of Branford called on their aunts on Sunday.

Mrs. McKay, Peterborough, Mr. and Mrs. Sararis and Bruce of Warsaw visited the Wrights recently.

A miscellaneous shower was held in Limehouse Memorial Hall on Friday evening for Miss Margaret Brown and Mr. Harold Barber whose marriage takes place later this month.

Those taking part in the program included piano solo Mrs. Roughley, vocal solo Anna Spitzer, reading by Miss Ivens and vocal solos by Mr. Sam Gibby, Mr. W. Mitchell, chairman then called the prospective bride and groom to chairs beneath a decorated arch while Mrs. Earnest Currie read an address.

After opening the numerous useful and beautiful gifts, the young couple thanked their neighbours and friends, inviting them to visit them when they had settled in their home.

Following lunch the remainder of the evening was spent dancing to music supplied by Messrs. Stewart Elliott, Jno. Black and Mrs. Morrow with Mr. Jos. Scott as floor manager.

The W.M.S. meeting was held at the home of Mrs. Ellerby where Miss Ivens was speaker. She gave a most interesting review of the life of the missionary, Mary Slessor of Calabar, written by Livingstone, Miss Doris Harding, Mrs. Gisby read the Scripture and Mrs. Smethurst led in prayer. Mrs. Benton read accounts of the lives of famous missionaries in Africa from the Study book. Text word "faith" was answered in the roll call. The hostess served refreshments afterwards.

Services at Limehouse Presbyterian Church have been withdrawn for the remainder of August.

A white lilac bush on the lawn of Mrs. R. Lane which bloomed earlier

this summer is again sporting a large lovely bouquet at its top, despite the fact that it had one complete side stripped of leaves by a grass fire in July.

Mr. and Mrs. Wesley Lane and Miss Isabel Lane of Toronto visited Mrs. R. Lane on Sunday.

GLEN WILLIAMS

A donation of \$60 has been forwarded to the Lorne Scots Band by the Glen Welcome Home Committee in appreciation of services rendered on both days of the celebration and presentation on June 21-22. The St. John Ambulance Brigade was also remembered with a donation of \$10 for the part played by their members in looking after the welfare of all needing their services during the celebration days.

LOCAL PEOPLE TAKE COMMUNITY LEADERSHIP COURSE

The Universities' Adult Education Board of Ontario in conjunction with the Department of Education has recently sponsored a new venture in education, the setting up at Queen's University, University of Western Ontario, and McMaster University of a short summer course in community leadership, for a group leaders in Recreation, Handicrafts, Music, Citizenship, Dramatics, Canadian Culture, Community Welfare and club and church activities.

The course was organized to meet the felt need for leaders in community work and adult education, and dealt with such topics as the organization of community activities, psychology of leadership, demonstrations of group games, social recreation, handicrafts, discussion groups, libraries, films, forums etc.

At McMaster University there was an enrolment of about one hundred persons mainly teachers and social workers, though there were men and women from many walks and professions.

Local people who took the course were Mrs. Harry Bewell, Mrs. Clarence Hayes, Miss Ilsa Bessey and Mr. Weir Reid.

Work is progressing on the Memorial at the Park and it will be completed by September 1st.

LORD ALEXANDER HONORARY HEAD OF S. A. BOARD

His excellency Viscount Alexander, Governor-General of Canada, has accepted the honorary presidency of The Salvation Army National Advisory Board, it is announced by Air Marshal William A. Bishop, Chairman of the Board.

Lord Alexander succeeds His Excellency the Earl of Athlone, former Governor General, who became honorary president of the Board shortly after he came to Canada.

The Salvation Army National Advisory Board is made up of some eighty men prominent in Canadian life and affairs who advise and help the Army on National problems and also in their home communities.

In the Surrogate Court of the County of Halton

In the matter of the Estate of **William Gordon Mullen** (also known as **William G. Mullen**) late of the City of Plymouth, in the State of Michigan, one of the United States of America, Garageman, Deceased.

THERE WILL be offered for sale by public auction on Saturday, the 17th day of August, A.D. 1946, at the hour of two o'clock in the afternoon at the premises hereinafter mentioned, in the Village of Glen Williams, in the Township of Esquering, in the County of Halton, by Frank Fitch, Auctioneer, the following property, namely: part of the northeasterly quarter of Lot Number 21, in the Ninth Concession of the said Township of Esquering, having a frontage on the Ninth Concession Line of ten rods by a depth of eight rods, more particularly described in registered Instrument Number 12716-D2 for Esquering.

On the said property is erected a one storey, five room, frame house in a good state of repair. There is also erected on the said property a small barn in good repair.

TERMS: 10% of the purchase money to be paid down at time of sale. Balance to be paid on closing.

For further particulars and conditions of sale apply to DALE and BENNETT, Georgetown, Ontario, solicitors for Wilma J. Mullen, the administratrix of the said estate.

CANADA UNLIMITED - The Formative Years

Out of the Lonely North

UNTIL THE THIRTIES, the barren bleakness of the Arctic North was Canada's unknown. Suddenly it leaped into the news. Out of the lonely North there came word of discovery. The searching picks of the prospector had chipped Pitchblende from the rugged face of the rock. A new major source of material for Radium, for U-235, for Plutonium, had been found.

Because of this discovery, the beneficent ministrations of radium have been made available to increased thousands of suffering people at such a price that its curative powers could be used for rich and poor alike. Then, too, Canada, possessing quantities of Uranium, is assured of a leading position in the development of all the benefits of this new power which are indicated but as yet unproved.

Canadian Government in trust for the Canadian people. Wisely used, this great new asset can bring us measurably closer to that future greatness and security we call Canada Unlimited.

And just as the Victory Bonds we bought during the war helped, amongst other things, to develop atomic energy for war purposes, the Bonds we hold will provide for the utilization of the fruits of Canadian discovery in a better, finer, world.

Today the pitchblende deposits at Great Bear Lake belong to the
