## CANADA DEPENDS ON HIM

HE paper inspector, and everyone else maintaining the quality of our products, is important to every Canadian; for we are rolling out seven million tons of paper, paperboard, and pulp for sale a year. We are one of the truly great enterprises in the world. On our skills and abilities depends our success in maintaining this world-wide leadership; and on our efforts Canada's prosperity largely rests.

The national income of Canada fluctuates with the volume and value of our total production. The value of Canada's export trade moves up and down with the fluctuations in our exports. And foreign trade accounts for one in every three dollars of the income of Canadians.

Every pulp and paper man fills a job of national importance. Every Canadian has a stake in the success of his work.
