"SPRING PLOUGHING"
an interpretation of contour ploughing by J. E. Collier.

In parts of China, topsoil has become so precious that men have been known to steal it by the handful from more fortunate neighbours. Millions of tons of our productive topsoil are washed into the sea every year. Scientific farming — contour ploughing, strip cropping and terracing — checks the devastation and poverty brought about by soil erosion.

* "With Canada's economy hinging on agriculture, improper use of our soil affects the entire nation. Both the city-dweller and the farmer benefit from soil-conserving practices, and should take an interest in this vital subject."

CARLING'S
THE CARLING BREWERIES LIMITED
WATERLOO AND WALKERVILLE, ONTARIO

THE FARMER—A Conservationist

The farmer becomes a conservationist by checking the evils of erosion—spoiled farm land, a decrease in ground water, silted waterways, depleted wells and streams, spring floods.
