

IN THE MAIL BAG

Georgetown, April 8, 1947

To the Editor,
Georgetown Herald,

Dear Sir:
Easter has come and gone, and the Lenten season is over for another year and those who kept it as a season of introspection and preparation for the greatest of all events, the resurrection of our Lord, found it a quiet restful experience followed by the drama of the "Crucifixion" on Good Friday when it was re-enacted in our minds.

The joy of Easter is only known to those who really live the Christian life. It is not in the singing of joyful hymns, or in the pleasure of wearing new clothes — but in the new life; spring is here, the snow gives place to rain, ice gives place to mud, all is changed, the winter has gone, it is no longer alpey and dangerous to walk, the grass is getting green, the sap is rising in the trees, the sun shines with renewed power and warmth, the birds sing. Everything beautiful is struggling to do its best

to brighten the world after a period of rest and our Lord has risen from the dead conquering sin and death for all. Then we go off way, and what have we gained? Easter has come and gone; have we forgotten already? The earth is the Lord's, and the fulness thereof. What fulness? We plough, we plant, we sow. God gives the increase. God gives the rain, the warm sunshine, the cool nights with their refreshing temperature. All God asks of us is our kind thoughts, just a "Thank You" in our hearts. Appreciation of His Almighty power, for after all He is the King and the power, and the glory.

No! Easter has not gone, it has come to stay for ever and ever.

We have to face the resurrection; like Daniel, we shall stand in our place at the last, then we shall know that Easter came with our Lord's resurrection and came to stay. And we, as Christians have a part in that great Easter which nothing can take away.

TODAY WE LIVE IN A GREATER CANADA

"On The Map"

of the NEW
AIR WORLD

CANADA LIES at the cross-roads of the great air routes of the modern world. Through our skies pass the shortest airways from North America to Europe and to Asia. Today, because of stupendous wartime achievements, we have the personnel, the experience and the vastly expanded facilities to take advantage of that favoured position.

Significant is the increase in air traffic within our own borders. Today Canada's civil aviation is flying three times the number of aircraft miles, carrying five times the number of passengers and three times the amount of mail that it did in 1939—advances typical of Canada's tremendous modern development, with new and greater opportunities in every field of Canadian activity.

After World War I, in which Canada's fighting airmen established Canada's world-famous flying tradition, aviation's development was rapid and in Canada more air-freight was carried—much of it by the "bush pilots" of the North—than in any other country.

First airplane flight in the British Empire was made at Baddeck, Cape Breton, February, 1909, when J. A. D. McCurdy flew in his "Silver Dart" for half a mile, rising thirty feet above the ice.

In World War II, with the R.C.A.F. developing and administering the gigantic Commonwealth Air Training Plan, Canada became, in President Roosevelt's words, "the airpower of Democracy", and emerged from the war the fourth air power in the world.

"OPPORTUNITIES... GREATER NOW"

JOHN WILLIAM BILLES, 25 years ago, used his \$3,000 savings as down payment on a Toronto tire business. With his brother and five employees he began retailing automobile accessories. Initiative and industry produced results. Today his Canadian Tire Corp. is a million-dollar organization with a unique mail-order business and over 100 associate dealers throughout Eastern Canada.

MR. BILLES says: "Today I'm convinced more than ever of the soundness of my original decision to start in business for myself in Canada. Opportunities are even greater now. Today, whatever the careers they choose, young Canadians find awaiting them in our own country more worthwhile possibilities of advancement than ever were known before."
