Hello Homemakers! When is a spot hot a spot? Answer: When it has been removed by someone who knows how. Even spilled milk, cocoa and ink can be taken out of white or fast-dye fabrics if you use the following remedies at once — with a little persistence and caution.

Milk, grease and oil stains should be sponged with benzine or carbon tetrachloride.

Ink spots should first be blotted with blotting paper and then soaked with clear warm water or sour milk, but in turn must be sponged out with carbon tetrachloride.

A chocolate stain should be scraped off with a dull knife; then pat with borax which has been moistened with water. Let dry, then wash in clear water.

Chewing gum is sometimes difficult. Try to rub into a ball with a piece of loe; next, remove stickiness with carbon tetrachloride.

Whether to soak soiled clothes or to set the machine immediately in motion is a moot question. Answer: If you do not use a water softener, you should soak white fabrics.

What about using homemade soap for the new fabrics? Well, this is usually a very strong soap (often, not aged) — and since there are a number of tested laundry cleansing agents, it is wise to use these in the washing machine.

How long should the washing machine operate? We recommend 5 to 8 min. for lightly soiled things, 10 to 12 mins. for dirty clothes, then a change of water if necessary. There has been some controversy over this point, but it was agreed that a short wash period and two or three warm rinses produced better results.

Should clothes be whipped or shaken when wet as they are hung on the line. To shake or pull gently after the garments are pinned will save much ironing work. You know too, that if clothes can be taken from the line and folded as they are placed in the basket the ironing will be much easier.

The family must eat on washday and we suggest dishes that can be cooked at a "low" temperature and served without much trimming. We recommend the Well Cooker of the electric range, or grandfather's Dutch oven for the suggested meals.

(1) Pot Roast with Potatoes
Onions, Carrots,
Steamed Pudding

Time: 2 hours
Directions: Scar meat (3 lbs.) in skillet until brown on all sides; place trivet in well, add 1 cup water and put meat on trivet. Put pudding in tall mold; cover, place beside meat. Cover cooker; turn switch to High until steam escapes; then turn switch to Low and continue cooking for 1 hour. Place vegetables around meat; turn switch to High until steam escapes; turn switch to Low to finish cooking, for about 1 hour.

Steamed Pudding
3 tbsps. melted shortening, 2 cups flour, 1/2 tsp. soda, 1 tsp. ground cloves, 1 tsp. cinnamon, 1/2 tsp. allspice, 1/2 tsp. salt, 1 cup milk, 3/4 cup molasses, 1/2 lb. dates, stoned and cut.
Melt shortening. Sift flour. Measure, add dry ingredients and sift again. Mix molasses and milk, add to dry ingredients. Add shortening. Fold in dates. Pour into a greased mold and steam for 2 hours. Serve with cream.

(2) Veal Stew with Noodles
Celery and Onions
Spiced Bread Pudding

Time: 2 1/2 hours
Directions: Cut 2 pounds breast or neck of veal into individual serving pieces. Flour and brown them in hot fat in a waterless cooker or deep kettle over High heat; season and cover with cold water. Cover, turn heat to Low, and simmer for 1 1/2 hours. Add 6 whole medium sized onions, 1 cup wide noodles and 1 cup of celery cut in short lengths. Set pudding in covered pan, place on rack above the meat, stew, cover, and continue cooking for 45 minutes. Serve stew with meat surrounded by noodles and celery. Sprinkle with paprika and garnish with cress. Serves 6.

SPICED BREAD PUDDING
1 cup toasted bread crumbs, 1 cup brown sugar, 1 tsp. soda, 1/2 tsp. ground cloves, 1/2 tsp. nutmeg, 1 tsp. cinnamon, 1 cup sour milk, 1 cup raisins.
Combine bread crumbs with the brown sugar, soda and spices. Add the milk and raisins. Pour into greased pudding mold and cover.

TAKE A TIP
How to use the modern Irons and Ironers.

Four new irons have striking features: (1) One has a wide sole plate curved for either forward or backward ironing, side rests to avoid lifting and a slanted handle to grasp easily. (2)

Dorothy Alcott and Dennis Wright Wed Last Saturday

A quiet wedding took place at Georgetown United Church parsonage on Saturday, May 17th, when Dorothy, youngest daughter of Mr. and Mrs. George Alcott became the bride of Dennis Arthur Wright, son of Mr. and Mrs. A. Wright of Brampton. Rev. R. C. Todd performed the ceremony.

The bride wore a powder blue dressmaker suit with pink accessories. Her corsage was of pink Tullamahi roses. She was attended by Miss Margaret Cook who wore a grey dressmaker suit with matching accessories and a corsage of pink Tullamahi roses. The groomsmen were Mr. Graham Davis of Brampton.

The reception was held at the Odd-fellows Hall, where the bride's mother received in a black sheer crepe dress with blue trimming and a corsage of pink carnations. She was assisted by the groom's mother, wearing a figured grey crepe dress and corsage of pink carnations. The couple left for a honeymoon trip to Buffalo. When they return they will reside in Georgetown.

To reduce fatigue caused by constant lifting, another iron has been designed with rest-stand incorporated into sole-plate. The button on the handle both releases and holds rest-stand in place. (3) A third iron has the outstanding feature of a stand with the heating element incorporated in it — heat is transferred to the iron whenever it is in position with the current on — no more wrangles with the cord. (4) Thermostat control on the steam irons means that they can be used for pressing of ordinary household use.

Method used with electric ironer:

- With the exception of woollens, iron fabrics until they are dry. Take time to arrange garment carefully on board to avoid unnecessary wrinkles. Parts of garment to iron first: extra inside pieces, such as inset pockets, shoulder pads and facings, and parts of garment which are attached such as trimmings and ruffles. Iron bodice of garment, then skirt. Finish with collar, cuffs and front. Wide articles such as tablecloths, sheets, bedspreads should be folded lengthwise and ironed on one side; then folded double and the top surface ironed; and so on until article is completely dry.
1. Try to improve ironing skill; use long sweeping rhythmic, graceful strokes.
 2. Iron with weave of fabric, not on the bias.
 3. Iron all articles which require same temperature before starting on next group.
 4. Arrange work area efficiently.
 5. Dress neatly, attractively and comfortably for the job.

You Will

FIND OUR BANK IN THIS FARM PICTURE...

THE fine livestock you see on this farm have been built up through the banking services and helpful financing of The Canadian Bank of Commerce. You, too, may need to purchase foundation livestock for the development of your farm or ranch.
