WITH THE ANGLERS, HUNTERS, AND CONSERVATIONISTS

by G. H.

The type grouse no doubt stole the hunters and conservationists from the column heading last week. The result was the start of the column was sort of a mystery.

The conservation part has been added because without it good hunting and fishing would not be possible. The Angling part has been left because there is always new tackle coming on the market and that is news to be talked about after so many years with a tackle shortage. And last but not least fishing can be done all winter for certain species.

FOX BOUNTY YES OR NO

Some say "yes" and some say "no" and the argument runs like this. The fox are killing all the pheasants, rabbits and partridge. We would get more for a bounty than we do for a prime fur. In fact at one time last year one fur dealer refused to buy any more.

The other side of the argument is that foxes live mostly on mice and rats. It has been proven after examining a fox den that very few pheasant bones and chicken remains have been found. A fox is a very wary animal and rates "A1" as a game animal with the dyed in the wool fox hunter. He will very likely tell you that the sport he gets from hunting this creature with the bounds more than makes up for the bounty that he would get if he was to shoot one when his fur was not prime.

After everything is said and done along the fox bounty channels it is a case of the animal world being unbalanced and it would be a good thing if the foxes were thinned out some to balance things up.

However, in closing the subject it might be said don't shoot them off entirely or they will be sorely missed over the sights of the fox hunter's gun.

DUCK HUNTERS

Norm Herbert, Gene and Ray Pomeroy had fairly good luck while duck-hunting at Rice Lake recently. The bag consisted of Blacks and Mallards.

FIELD TRIALS AND BENCH SHOW

The Dufferin - Northern Peal Anglers and Hunters Association this year have included field trials and bench show for fox hounds along with their usual entertainment.

The date — October 24 and 25th. Trials start at 7:30 a.m. October 24. The finals will be run on Saturday, 25th. Anyone wishing to enter a fox hound should get in touch with Mr. Douglas Fendley, president of the Association at Orangeville.

For further news along this line see poster in Herald Office window.

BELIEVE IT OR NOT

A cigarette was casually flipped into the Credit River recently and much to the surprise of the smoker a large brown trout very slowly came to the surface and devoured the butt. Perhaps they get that way after the grass hopper season.

AMPHIBIOUS BROWN TROUT

Toward the end of last season a fairly large brown was taken in the Credit early in the morning. His stomach was full of grain. Oh, yes, a wheat field was nearby. Well, anyway, it's food for thought. That's all for this week so good luck until next.

AUCTION SALE

—OF—
HOUSEHOLD FURNITURE AND TOOLS

The undersigned has been instructed by

MRS. JOHN EDGE

to sell by auction in Terra Cotta on **FRIDAY, OCTOBER 24th, 1947** at 7 o'clock the following:

THE MIXING BOWL

By ANNE ALLAN
Hydro Home Economist

Hello Homemakers! If the present high cost-of-living is making you cut down here and there in the food budget, you should first make sure that your family is getting the most out of what you buy. The most valuable food is milk. It is a perfect food with the exception of its lack of iron content and Vitamin C. Take for example the important element of calcium — a mineral that is part and parcel of everyone's bones and teeth and blood. Judged on the basis of price alone, milk is a cheap calcium food. One quart or 2½ pounds cost 16 cents, whereas to get the same amount of calcium out of eggs at 44 cents a doz. you would need 20 eggs for which the cost would be 70 cents — and that's a lot of eggs to eat in one day! Even salmon at 23 cents a pound is more expensive in food value since the amount would have to be doubled to yield the calcium in one pound of milk. Thus milk is a sensational bargain and it's a cinch for anyone to enjoy two glasses (or 1 pound) of milk daily.

OLD FASHIONED TOMATO SOUP

2 cups stewed tomatoes, 2 thin slices of onion, 1 bay leaf, 1 tsp. sugar, 3 tbsps. butter, 4 tbsps. flour, 4 cups milk, salt and pepper to taste. Simmer the tomatoes, onion, bay leaf and sugar together for ten minutes, then press through a sieve. Melt the butter, blend in the flour, add the milk and cook stirring constantly until thickened. Add salt and pepper to taste and gradually add the sieved tomatoes. When steaming hot, serve at once in warmed soup bowls. 6 to 6 servings.

MEAT CAKES IN BUTTERMILK SAUCE

To make the meat cakes, combine the following ingredients: One pound ground beef, ¼ cup bread crumbs, 1 small onion, minced, 1 egg slightly beaten, 1 tsp. salt, ¼ tsp. pepper, 1 tsp. ground sage. Prepare buttermilk sauce, using these ingredients: 2 cups buttermilk, 2 tbsps. sugar, 1 tsp. salt, 1½ tbsps. mustard, ¼ tsp. paprika, 4 tbsps. flour, 2 tbsps. butter or mild flavored fat, 2 slightly beaten eggs. Add eggs after sauce has thickened. Form meat mixture into 8 balls and brown lightly on all sides in hot lard. Pour sauce into casserole, add meat balls and bake uncovered at 325 degrees in electric oven for about 45 minutes.

GINGERBREAD

½ cup butter, ½ cup brown sugar, 2 eggs, 1 cup molasses, 2 tbsps. baking soda, 2 tbsps. ground ginger, ¼ tsp. salt, 1 cup sour milk, 2½ cups sifted pastry flour. Cream the butter, add the brown sugar, gradually and continue creaming. Beat the eggs, add the molasses and combine with the creamed mixture. Sift together the flour, baking soda, ginger and salt and add alternately with the sour milk to the first mixture. Turn into a greased pan and bake in an electric oven

325 to 350 degrees — for 45 to 60 minutes.

COCONUT SAUCE

1 cup skim milk, 2 eggs yolks, 3 tbsps. sugar, one-eighth tsp salt, ¼ tsp. vanilla, ½ cup shredded coconut. Scald milk and add gradually to egg yolks which have been beaten until light and combined with the sugar and salt. Cook over hot water, stirring constantly until mixture coats a spoon. Chill, add vanilla and and coconut.

THE SUGGESTION BOX

Mrs. M. J. says: We keep the contents of opened packages of brown sugar and marshmallows soft and moist by storing them in the bread box.

Mrs. T. K. says: Sweet potatoes have more natural sweetness than other vegetables. Let them add sugar to your meals.

Mr. M. C. says: Plastic measuring spoons in the medicine cabinet assure the family of accurate doses and at the same time good silver is not being tarnished or stained.

Miss J. J. says: Tart jelly stirred into stiffly beaten egg whites makes a frosting of sweet smoothness in a lovely pastel of colour.

THE QUESTION BOX

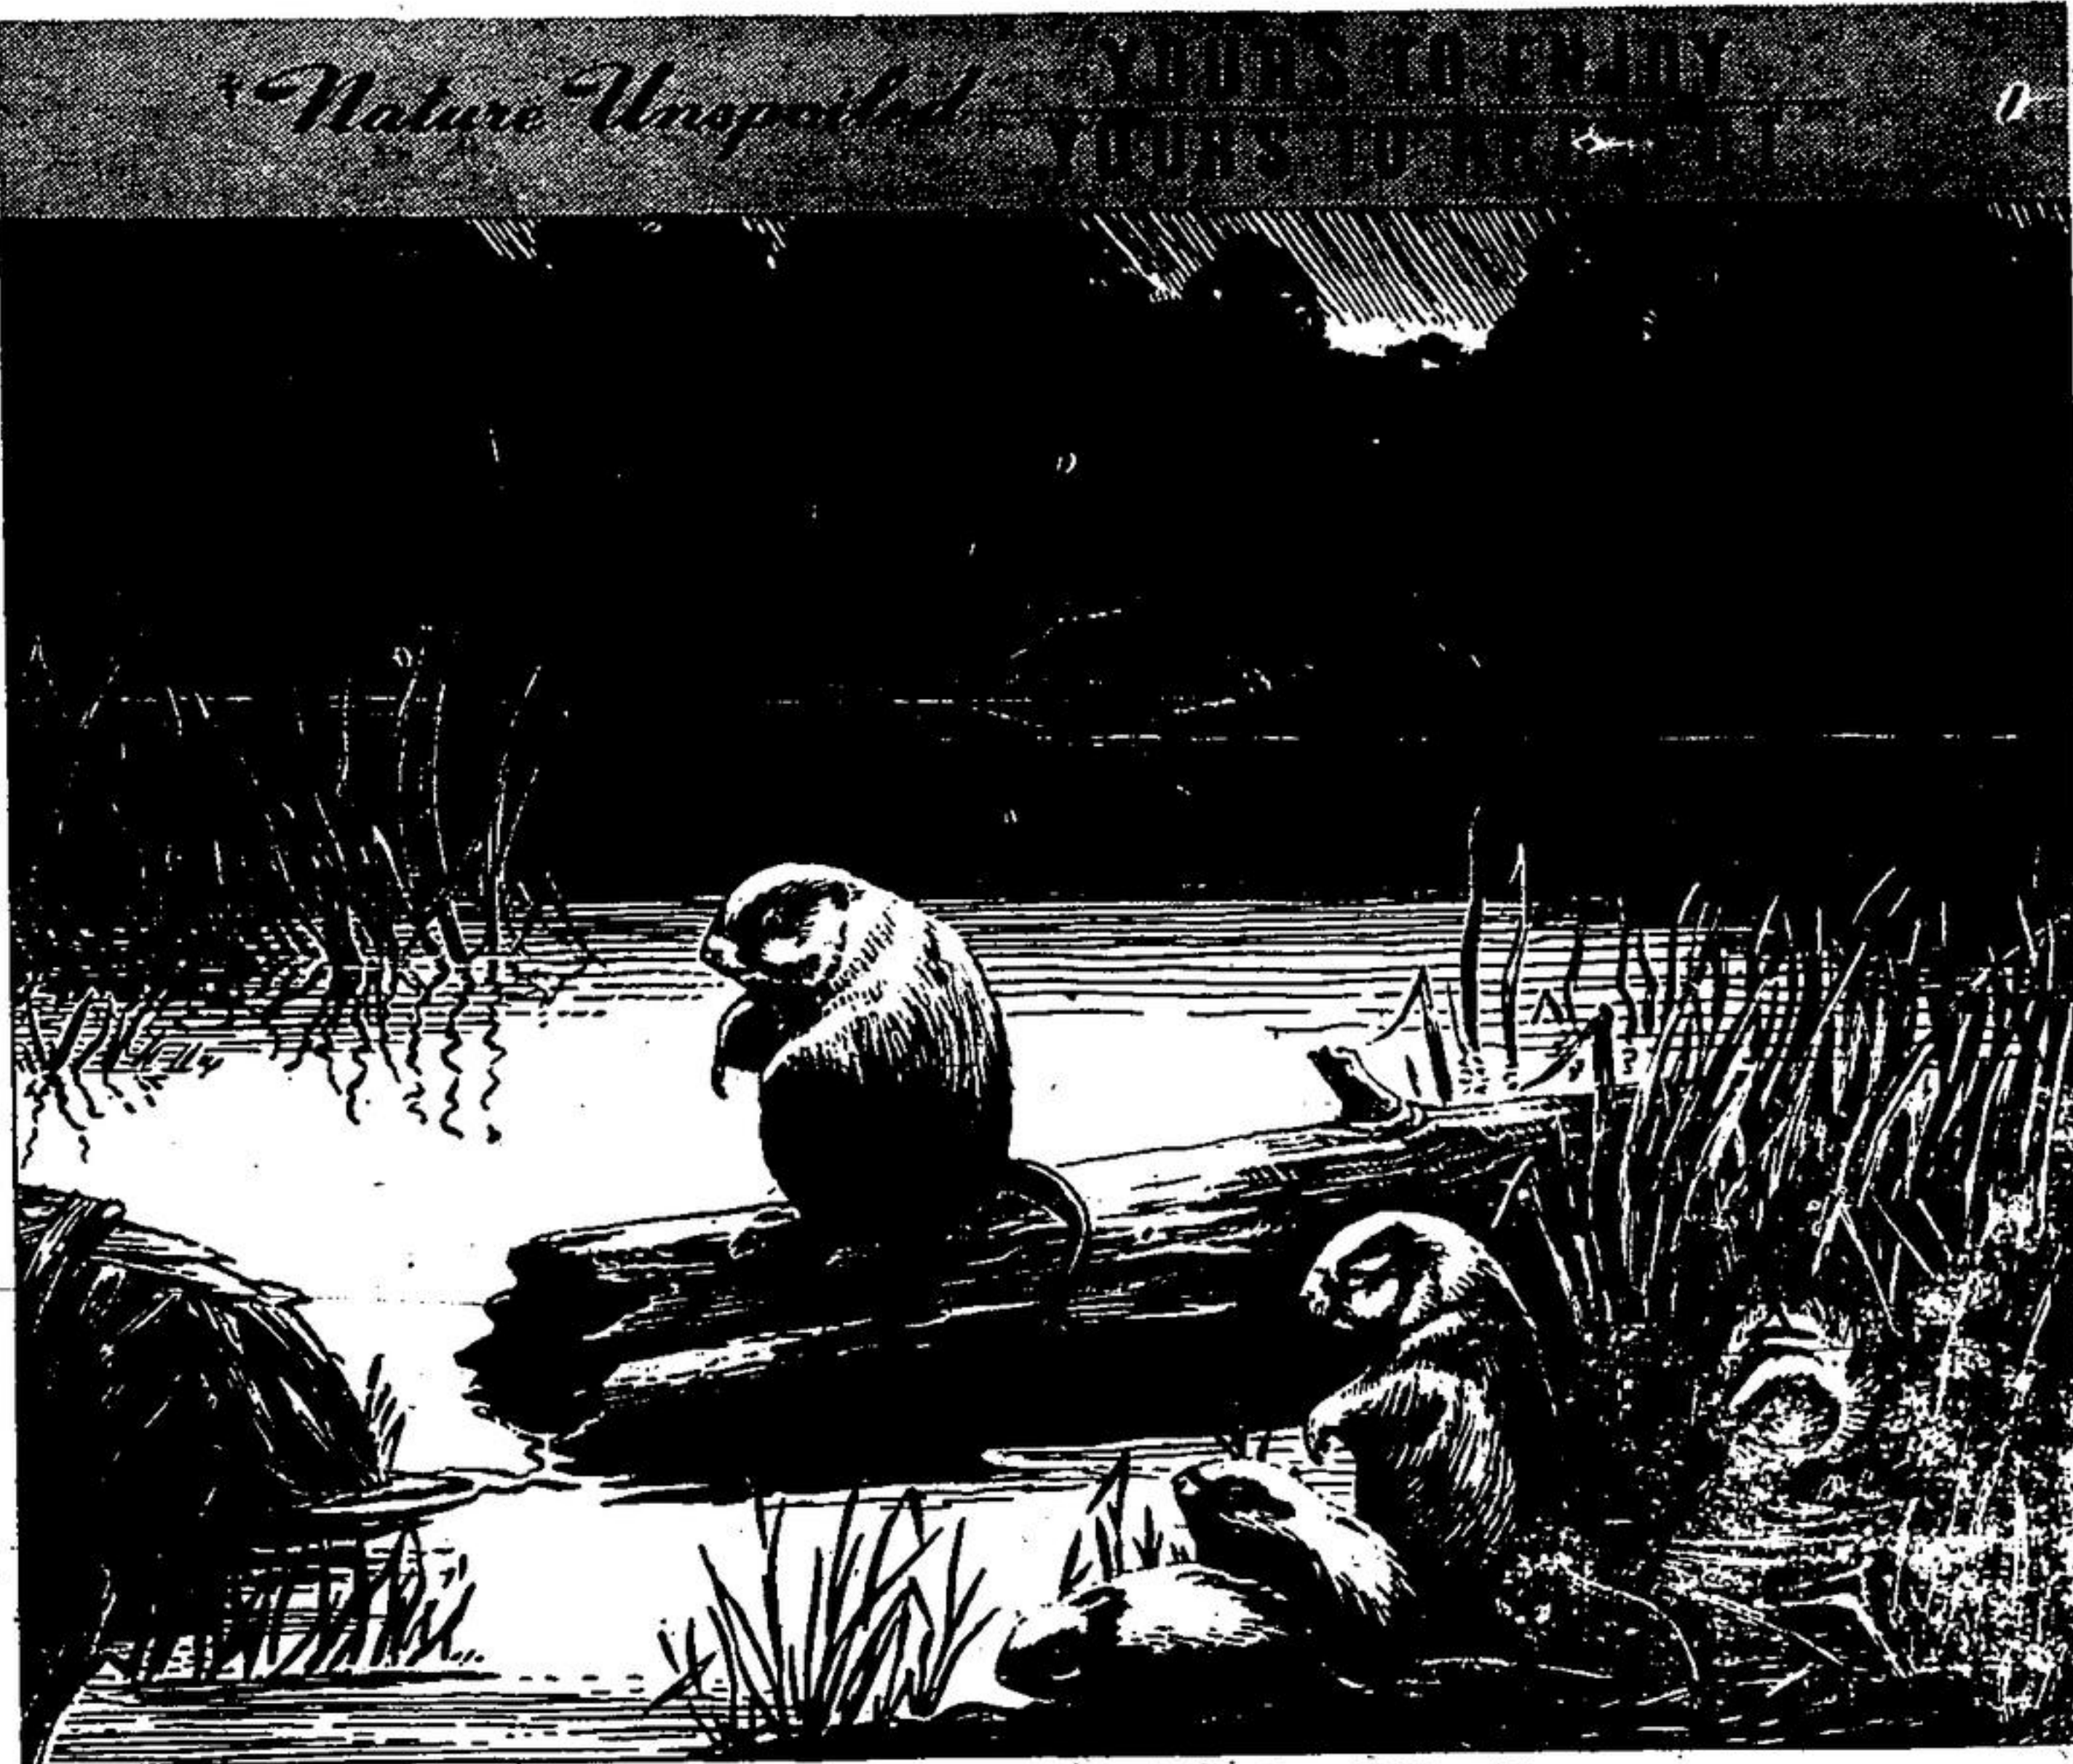

Mrs. S. M. asks: What apple varieties do you recommend storing? Answer: Greening, Newton, Northern Spy, Golden Russet, Stark, are best kinds to store.

Mrs. B. A. asks: What is your method of canning apples? Answer: Wash, pare and quarter, or slice and drop into weak salt water to prevent discoloration. Boil 1½ minutes. Cook-dip. Pack in sterilized jars, and cover with water or thin syrup (1 cup sugar, 4 cups water) to overflowing. Half seal. Sterilize 60 minutes.

Former District Clergyman Appointed Oakville Rector

Rev. Fred O. Jackson, rector of the Norval, Eberly and Stewarttown churches about ten years ago, was inducted as rector of St. Jude's Church of England, Oakville last Tuesday night. Conducting the impressive service was the Right Reverend L. W. B. Broughall, Bishop of Niagara, assisted by Venerable W. G. O. Thompson of Georgetown, archdeacon of Halton and Wellington, Canon R. O. Blagrove, rector of St. Thomas Church, Hamilton and domestic chaplain to the Bishop and Rev. Dean C. F. Hoethoote, Burlington. Mr. Jackson succeeds Rev. W. C. Bockleton, now of Niagara Falls, New York.

Grafting was known to horticulturists at least two centuries B.C.

"THE MUSKRAT" after a painting by Audrey McNaughton

With its under-water entrance, the home of the muskrat shelters him from most of his enemies—but not from the trapline. Closed seasons have been declared by each province to prevent over-trapping. Intelligent, far-sighted trappers realize the importance of observing these laws in order that a rich harvest of muskrat fur, the raw material of 'Hudson Bay Seal', may be reaped year after year.

The closing of the fall season for muskrat gave the animals the protection of a shortened open season, and at the same time increased the value of the annual catch by eliminating unprime fall skins.
