NEWS OF HOLLYWOOD HER SPECIALTY

Latest news of filmdom is here discussed by Susan Fletcher, radio commentator, and Donald Crisp, motion-picture character actor, in preparation for one of her 'Flicks and Flashes' broadcasts. A weekly report on events and personalities in the film and theatre world, 'Flicks and Flashes' is broadcast from Vancouver, Thursdays at 9.30 p.m., over the CBC Dominion network. Miss Fletcher does not, however, depend entirely on visiting celebrities for her program material. She is a frequent visitor in Hollywood, where she also interviews the stars for news of interest to motion-picture enthusiasts.

I wish to thank the gentlemen who nominated me as Councillor for Ward 2 and I assure the citizens of Georgetown that I will serve to the best of my ability in 1948.

**IN THE MAIL BAG**  
Georgetown, Nov. 24th, 1947  
To the Editor of the Herald:  
Dear Sir:  
May I offer a couple of observations in regard to the question of the method of appointment of School Boards in Georgetown? We shall be asked if we are in favour of a Board of Education, which will be elective. At present the High School Board, of which I am a member, consists of persons appointed, some by our Municipal Council, and some by the County Council. This method means that these bodies appoint persons whom they consider suitable, after asking them if they will serve, or learning that they are willing to serve. If a Board of Education is favoured, then nominations will be made and a poll taken. The difference is, in few words, that under our present system the office seeks the man, while under a changed system the man would seek the office.  
I am not opposed to a change. There are, no doubt, many points in favour of an elective system, but I think the public should know that the change would probably entail a change in personnel in the membership. It is one thing to be asked to give your services, but an entirely different thing to seek the office.  
Faithfully yours,  
Wm. G. O. Thompson.

**WITH THE ANGLERS, HUNTERS, AND CONSERVATIONISTS**  
by G. H.

**LUCKY HUNTERS**  
While hunting in the North recently Jack Crichton was lucky enough to bag a large black bear with two well placed shots.

Last Friday, November 21st, Jack Tost killed a jack rabbit at 50 yds. with the 3rd shot from a 22 automatic rifle. It was a running broadside shot. Shooting rabbits with a shot gun is one thing, with a rifle entirely different. It's much better sport and you have to be good. Now shooting rabbits on November 21st is common. This, however, is not so with ground hogs. Perhaps it is a sign of an open winter. Jack claims he killed, with one shot a large grey hog that was running himself on a side hill. By the way he has a witness to this. Just in case any one is in doubt.

**BELIEVE IT OR NOT**  
Bob Hoare was rowing around on Jack Lake, north of North Bay when he sighted several ducks that had just rose off the water. Bob drew careful aim and fired. One duck hit the water. The rifle used was a 38.55 carbine. The range 800 yards. It took Bob about 15 minutes to row through the choppy water to where the duck lay.  
If any one is surprised at this it makes things even because so was Bob.  
P.S. He has a witness! So . . . I found out.

Actual size of populations. Effectiveness of releases of farm-raised birds.  
This involves:  
1. Determination of pheasant distribution and numbers by census and questionnaire.  
2. Correlation with climate and land use, through study of records and field work.  
3. Correlation with diseases, parasites, predators, by field work and examination of specimens.  
4. Study of pheasant relationship to food plants and vegetational types by field work.  
5. Study of dispersal and survival of released birds, by banding.  
6. Determination of kill by hunters during the open season, by game bag census and field checking.

So while expressing gratitude There's one thing we should do Let's offer Him our heartfelt thanks For the hunting and fishing, too.  
Chic. Hannan, Hamilton

THANKS  
for again electing me by acclamation

**Deputy - Reeve**  
FOR THE TOWN OF GEORGETOWN

It is my desire to continue serving the citizens of Georgetown and Halton County to the best of my ability.

**JACK ARMSTRONG**

**HORNBY**  
Miss Ralda Neilson is wished a speedy recovery after her recent tonsil operation.  
The United Church shed has been sold recently.  
Mrs. James Bailey's sale attracted a large crowd on Saturday and Monday evening.  
The natives are enjoying venison since the local hunters have returned from the North.  
Miss Irving, home economist, was guest at the Girls' Club last meeting.  
Mrs. J. A. M. Taylor is wished a speedy convalescence after her recent operation.

**NARROW ESCAPE**  
The hunter's name has slipped my mind. However the story goes as follows:  
A hunter was patiently waiting at his stand for a shot at a deer. He turned his head sideways for a second, then he was knocked flat on his back. It was some time later that he realized that he had been struck by a stray bullet from a high powered rifle. Had he not turned his head the bullet would have struck his adam's apple. He has a long deep burn and a small puncture. No shot was heard. This happened near Noxville which is 75 miles from North Bay.

**ASHGROVE**  
Now that the wedding of the Princess is over, and the Fall work nearly completed, the winter will soon be with us and Christmas is not far distant.  
The W.I. meeting was held at the home of Mrs. Milton Bird last Tuesday afternoon, November 18th with a good attendance and the President, Mrs. R. Cunningham was in the chair. Roll call, answered by "Why I am proud to be a Canadian Citizen" brought some splendid responses. Mrs. Arthur Ruddell gave the motto "Know the past to make better builders for the future." Mrs. Dick's splendid paper on "A home endures not by the strength of its walls, but by the quality of the life within," brought out some splendid thoughts. Following this A Salad Demonstration was put on by four ladies, Mrs. Archer, Mrs. C. Austin, Mrs. W. Bird and Mrs. C. Hunter which was very interesting, the salads being served later with the lunch. Meeting closed with the National Anthem.  
Mr. Douglas Fisher of Toronto spent the week-end with Mr. and Mrs. C. B. Dick.  
Miss Ismay Kean spent Sunday with Miss Bessie Reid of Acton.  
Miss Muriel Laidlaw of Toronto spent the week-end with her cousin, Miss Betty Ruddell.  
Those who were present Sunday morning listened with interest to our pastor Rev. Fred Ainsworth who spoke on missionary life and conditions as he knew it in Japan. Their need for religion and schools is very great and we who have everything should be willing to help those not so fortunate.  
We are very sorry to report that Mrs. Murray Bridgen while carrying her little girl down the stairway at church slipped and fell with her in her arms. Fortunately, no bones were broken but the mother was badly bruised and shaken up.

**INTERESTING FACTS**  
In a comparatively limited area at the head of the Gattineau River in Quebec 560 moose are known to have been shot in the past four or five years, and approximately 150 have been taken in each of the last two.  
Through the three ports of Rainy River, Fort Frances and Rainy Lake, 3,002 deer and over 200 moose were exported to the United States in the autumn of 1946.  
During 1945 in only five consecutive days a total of 365 deer and 40 moose were shipped into the United States, and up to November 19, 1,247 deer and 181 moose were cleared through the U.S. Customs at the International Falls alone.  
On the Caribou highway, British Columbia, in the autumn of 1946, 2,292 moose and deer were taken out, 973 going to the United States 781 of which were moose.  
Many local residents of Kenora are becoming alarmed at the number of deer being taken out of the district this year by the record number of American hunters. At the International Bridge, an average of 150 deer are crossing the border daily. The record for one day stands at 281 deer.

**PHEASANTS**  
(continued from last week)  
It is evident that in Ontario we need immediate information on a number of aspects of pheasant management, especially the following:  
1. Pheasant population.  
2. Pheasant hunting regulations.  
3. Pheasant raising regulations.

**THANKSGIVING**  
Once a year, at harvest time, Humanity from coast to coast Stop their work to thank their God For what they've needed most.  
They've received of bounteous blessings From His Almighty hand For He's been a good provider Of fruits for this glorious land.  
So when the time has come To thank our God for all He's done For us and for our land Let's praise Him with a grateful heart And thank Him for His goodness.

**ELECTRICITY IS PRECIOUS**

Ontario's fast-growing industry and agriculture, demands more and more electricity. New power developments cannot be built fast enough to supply the immediate need.

**SAVE ELECTRICITY MAINTAIN EMPLOYMENT**
