We See This Week

THAT the road grader was on the job last week putting roads back in shape after the winter.

THAT Norman Hill is constructing a new store on King Street across from his present location.

THAT Scott Motor Sales are planning an official opening at their new garage sometime in April.

THAT the Herald was a week in advance with an account of the induction of elders at Norval Presbyterian Church. The service took place yesterday and not a week ago as was reported.

THAT Mr. and Mrs. Tom Warnes and family are moving this week to the former George Munn home on Guelph Street which Mr. Warnes has purchased.

THAT Mr. and Mrs. Bob Rayner and baby daughter Rosemary sailed last week for England, where they will make their home.

THAT the Hockey Club sponsored a program at last Thursday's game with Penetang and realized a good sum from sale of advertising and of programs at the game.

THAT Frank King has given up Brown's Bread agency and is making cleaning and pressing pick-ups for the White and Sons Company.

THAT the Roxy had particularly fine bookings for their Easter shows with "The Secret Life of Walter Mitty," "Fun and Fancy Free" and "The Yearling," all in technicolor.

That Cordaro Candies, which are manufactured in Georgetown by Mr. John Cordaro, were sold from the McGibbon Store on Easter

week-end and his Easter novelties displayed there and in Penson's Fish and Chip proved very popular.

THAT most Georgetown ladies seemed to prefer the "old look" in the Easter parade this year — and we don't blame them at all, because we predict the "new look" fad will be of short duration.

SMITH and STONE BOWLING NEWS

by E. H.
The tension of the coming playoffs seemed very apparent by the play of most of the teams last week. All players with one or two exceptions seemed to be trying too hard to make a good score. However, some of the teams improved their positions in the standings considerably.

On Monday the Merry Pats came to life by administering a 4-0 shut-out to the Bakelite Moulding "A" team. In fact all Girls' teams won their games with the Assembly Girls taking the Ganarsky Rats 3 to 1 and the Punchers taking the Engineers 3-1. In the other game the Glazers after a very close battle defeated the Baked Pins by 3 to 1.

On Wednesday the top Tool Room team was taken into camp by the 3 to 1 score by the Press Line. The other game saw Drafting white-washed by the Possums by 4-0.

STANDINGS TO DATE (72 games)

Tool Room Timber Topplers	23
Glazers	21
Baked Pins	21
Assembly Girl (60 games)	19
Possums	18
Bakelite Moulding 'A' and 'B'	18
Engineers	18
Ganarsky Rats	16
Drafting Dipsey Doodlers (60')	16
Punchers	13
Merry Pats (60 games)	13
Press Line Panels (60 games)	12

This week "Gob" Collier formerly of the Stock Room team but now bowling for the Glazers took the High Single with a 310 score which incidentally was the only 300 game of this week.

For the girls Ethel Webster of the Assembly team was high, bowling 266.

Dave Stamp (Tool Room) took the High Triple for the week with 667. Other good scores were "Gob" Collier (Glazers) 629; John Bell (Engineers) 616; and Ace Bailey (Ganarsky Rats) 608.

Millye Davidson of the Assembly Girls took High Triple with 618. Other good scores were Alma Stringer (Merry Pats) 586; A. Christensen (Assembly Girls) 583; A. Gummer (Punchers) 546; Ethel Webster (Assembly) 534 and Jean Harley (Punchers) 529.

INDUSTRIAL
After finishing out the season in first place the Combines went down to defeat at the hands of the Alliance team in the first group of sudden death games. The Alliance were really "on" bowling 4,014 pins for a 3 game total to take the Combines by over 300 pins.

In the other group the Smith and Stone team entered the finals, by defeating the Provincials by bowling over the 3900 score, with an advantage of over 200 pins.

Tonight will see the final game for the Industrial for this series when the two winning teams, Alliance and Smith and Stone, play off for the cup donated (we believe) by Al Norton, of the Lucky Strike Bowling Club. This should be a well-matched game.

So far this year, the Smith and Stone team has been up of the following players with Ev Wilson as Captain — Dave Stamp, Maurice Herbert, Reg Ryall, Harold King, Ted Vahl, Doug Sargent, Ernie Peters, Earl Hornby, Ace Bailey and Jim King.

The curtain rises on THE NEW FERGUSON TRACTOR

MORE POWER
MORE SPEEDS
AUTOMATIC HYDRAULIC OVERLOAD PROTECTION
HYDRAULIC IMPLEMENT CONTROL
FRONT WHEEL TREAD ADJUSTABLE
No other tractor combines ALL these features.

Beginning... another great era in power farming!

A Great New Farming Machine to help you cut the costs of food production still more! A powerful, rugged tractor with many new high-performance features designed from the experience of over 300,000 Ferguson System users. Stopped-up power lets you walk away with two 14-inch plows—with reserve for the tough spots. You can brake both wheels with a single pedal, or use the individual brake pedals for turning. And many other improvements for greater safety, economy and convenience.

A Miser on Fuel! Powerful Continental valve-in-head engine, combined with the weight-saving and automatic traction control of the Ferguson System, gives you more work from a gallon of fuel than you ever dreamed possible! High-torque design to give you amazing lugging power at low engine speeds. Responsive governor, fully enclosed from trash and dust. High-efficiency cooling fan and removable "wet" sleeves with full-length water circulation. An engine built to "take it!"

A New System for Low-Cost Hauling with revolutionary method of linking trailer to tractor. With this new Ferguson System of transportation you can haul loads of 8 tons or more out of soft fields, up steep grades, on slippery roads or over rough ground. On countless farms, located at average local market distances, this latest Ferguson invention slashes costs of hauling farm products—a revolutionary new solution to your farm transportation problems.

Only the Ferguson System, invented, perfected and patented by Harry Ferguson, and authorized only for use in the new Ferguson Tractor, gives you all five of these big advantages: 1. Traction without excessive implement weight. 2. Both finger tip and automatic hydraulic depth control. 3. Traction without excessive built-in weight. 4. Keeps the tractor's front end down. 5. Automatically protects both implement and tractor when the implement strikes an obstruction.
