Today we Live in a Greater Canada

MORE JOBS for Young Canadians

TODAY CANADA'S manufacturing capacity has been increased—and diversified—to an extent never thought possible in pre-war years. Now Canada can do more—can make more—offers far more opportunities to young Canadians commencing their careers today. While established industries have been expanding, new ones have been springing up. Over 200 new products formerly imported are now being made here.

EMPLOYMENT figures, too, tell the story of our emergence as one of the world's great industrial nations; today almost twice as many Canadians are engaged in manufacturing as there were before the war.

CAPACITY for steel production doubled; chemical output more than twice 1939 level; pulp and paper mills operating at 50% above pre-war; everywhere the magnitude of the advance is evident.

DEVELOPMENT continues: on new plant and new equipment nearly four times as much was spent by Canadian industry last year as in 1939.

"... UNTOLD OPPORTUNITIES"

"If one wants to give service and work, Canada is full of untold opportunities—greater than ever. It is well, too, for young Canadians not to overlook small towns and rural parts, because in these places the door is ajar, life can be gloriously free and very full."

... says ROY SHIELDS of Cobourg, Ontario. He and his brother Charles have, by industry and initiative, supported by loyal, hard-working employees, attained a remarkable success as General Merchants in their rural community. Their store has been referred to as the "Biggest Little Department Store" in the country.
