MACKENZIE NEWS

Do you ever ponder on some system of storing this excess summer heat for use next winter?

Until our scientists are able to work out such a system, the next best scheme is to put your winter's coal in during the summer. This way you will be sure of your next winter's fuel and save yourself money.

We are expecting to have some nut and stove shipped this week which will probably be the last shipped for a month or more. The miners take their holidays next week and won't return to work until a new union contract is negotiated. There may be a surplus of soft coal on hand but there are no anthracite stocks on hand. The low production already this year, the coming holiday and the probable strike will make a tight supply situation next winter. Let us know if you would like your coal now.

See you at the I.O.D.E. tea on Saturday.
