

OLDSMOBILE OFFERS NEW 1950 FEATURES

The new 1950 Futuristic Oldsmobile just announced by General Motors is available in either the Series 76 or Series 88—the latter powered by the 135 h.p. high compression Rocket engine teamed with the newly-developed Whirlaway Hydra-Matic Drive. Standard Hydra-Matic Drive is an option at extra cost on Series 76 models. The 1950 Oldsmobile also features smartened exterior appearance, new interior trim design, new colors and sturdier construction—shown here is the Series 76 deluxe four-door Sedan.

The first five men will represent Georgetown in the C.B.A. tournament

Molds: Allergy Leaders, N. U. Specialist Explains

Molds, borne on the air from crop fields, play a part second only to that of pollen in causing allergic symptoms and, it has been estimated, about 20 per cent of allergic persons are clinically sensitive to molds, a Northwestern university specialist reports. Dr. Theodore B. Bernstein, a member of the allergy division faculty in the medical school, spoke before the opening session of the week-long orientation course in clinical allergy, sponsored by Northwestern and the American Academy of Allergy. The most important molds, from the standpoint of allergy causation, are the group known as fungi imperfecti, Dr. Bernstein said. In this class are included the most important molds commonly found in the air, such as Alternaria, Hormodendrum, Aspergillus, penicillium, and monilia. Mold spores (cellular reproductive bodies) are present in the air all year 'round, and some types show seasonal fluctuation. Others, which are usually less important as allergens, do not. Alternaria and Hormodendrum account for 73 per cent of the total number of molds in the air, and about 80 per cent of the total alternaria crop is found during the six-month period of June through November. Hormodendrum and smuts also occur in large numbers during this period. These statistics, the specialist said, were compiled after surveys conducted in Chicago during the last 10 years, and hold true in general for conditions existing between the eastern and western mountain ranges. (The mold committee of the academy last year instituted a nationwide survey of atmospheric fungi.)

'Flower Pot' Atom Smasher To Detect, Count Neutrons

A tiny atom-smashing machine, no larger than a flower pot, has been developed by Westinghouse scientists to detect and count neutrons—vital building blocks in matter's structure. The new device, which contains a very small amount of uranium 235, generates a series of tiny atomic explosions to reveal the presence and behavior of neutrons. It is expected to enable scientists to penetrate more deeply into the core of the atom and eventually, to solve more of the mysteries involving the powerful forces at work there. Called a "neutron counter," the instrument was developed jointly by Dr. William E. Shaupp, manager of nuclear physics and electronics at the Westinghouse research laboratories and Dr. Kuanfan Sun, Chinese-born research physicist. "With the aid of this new instrument," Dr. Sun said, "we will be able to make more accurate studies of the number and speed of neutrons."

Hunters Need Geological Map

Every deer hunter, or for that matter every hunter who enters large stretches of strange timber, should make it a point to know just about where he is at all times. This is not so difficult as it sounds. Unless he is going with an experienced guide and is willing to follow that individual's instructions implicitly, he should, when planning his trip, secure a U. S. geological map of that area. These maps are quite detailed and are ideal for the deer hunter, not only in allowing himself to "keep up with himself" but to locate the best hunting places. They show all the physical characteristics of the land—swamps, lowlands, ridges, cliffs, streams and mountains. Having a fair knowledge of the use of his compass and possessing one of these maps, practically any hunting tyro can find his way around by frequently referring to both.

Rat Control Program

There's scarcely a farm that isn't troubled by rats at some time. Michigan State college extension specialists are urging farmers to continue rat control campaigns through the whole year. If you'll make it hard for the rats to find food, they can be easily poisoned or trapped. Feeds should be stored properly and scraps and garbage kept in ratproof containers. Rat-proof buildings are a good measure to keep rats away once you've rid a farm of them. Putting metal sheets around building supports and protecting sides of cribs with metal stripping are two good steps. Keep scrap lumber piles away from cribs since they attract rats and provide a shelter for them.

Royal Couple's Income

Income of the royal couple (Princess Elizabeth and the duke of Edinburgh) is paid from a fund made available by King George from savings on his own income effected during the war years. During 1940-41, for example, the king drew less than one-tenth of the amount he is granted. Annual sums paid to the king are given in exchange for property inherited by the royal family, and the public gets far more back in revenues from the royal lands, than it pays out to royalty. Last year the British public made a "profit" of nearly four million dollars on the exchange.

SLIDING ALONG THE BOARDS by Diner

The time has come, the Walrus said To speak of many things, Of land and sea, and people too And also of the Raider crew. Now, at long last, the group league is over, except for a few postponed games which do not affect the Raiders. The latest figures we have are: GEORGETOWN 29, WESTON 28, MILTON 23, OAKVILLE 18, BRAMPTON 14, DIXIE 2

The exhibition game in Simcoe this Saturday will prove plenty interesting to goalie Fred Lawrence and to yours truly. Simcoe is an Intermediate A club and has won 15 games so far without a loss. Every week-end when we go home we hear about how powerful they are. Maybe revenge will come on Saturday and don't think I won't rub it in down there if we win. Checking over our column for the past few weeks, we find we have been neglecting the Junior Raiders. To bring you up to date, last week they trounced Oakville twice and lost to Brampton. Aurora and Brampton are tied for first place. Georgetown is second. Oakville-third and Acton last. As Georgetown and Acton are the only 'D' teams in the league, they will soon be playing off in a best 3-of-5 series.

The Junior Raiders have a fine team, built around such stalwarts as Bob Hepburn, Jack Hamilton, Harold Hills, Jim Golden and Ross Dillon. Under the capable management of Leigh Bradbury, they hope to bring a junior championship to Georgetown. In addition to the above-mentioned, they have a high scoring line in Gerald Inglis, Bill Hewitt, and Ivan Huffman and a "kid line" of Al Gills, Terry Bludd and Bud Heines able to hold its own with the best of them. On defence Blake Baxter and Joe Louth perform in stellar fashion. A recent addition is Dave Barber who has been playing wing for the Smith and Stone industrial league team. Earl Walters is alternate goalie and showed lots of promise in the Brampton game. From the size of crowds at recent games it would seem few realize that such a team as the juniors even exists and that these young players are the stars of tomorrow. Let's give them some support in the play-offs.

Maher Shoe Move, Buy Ross Thompson

A business change of importance occurred this week when the Maher Shoe Stores purchased the Ross Thompson Shoe Store and moved to this location. The company is conducting a large clearance sale at their new location at present. Bill Charlton of Brampton has replaced "Spud" Patterson as store manager. Mr. Charlton has been assistant manager in Brampton for three years. He is the son of Mr. and Mrs. R. T. Charlton, R. R. 2, Brampton and is married to the former Jean MacDonald of Brampton.

Mr. Thompson has been in business here for four years. He purchased the business from W. F. Smith after selling his farm near Stewarttown to Vern Pickett. Prior to farming Mr. Thompson was employed in town at the Alliance Paper Mill. He is a Past Master of Credit Lodge AF&AM. LABOR UNIONS REPRESENTED AT THE ROSS THOMPSON SHOE STORE. In the evening, the IODE Valentine Dance in the Rose Room on Friday night.

STEWARTTOWN

Mr. and Mrs. Will Lawson and daughter Beth of Toronto were visitors with Mrs. Lawson last week. Mrs. Peden of Belwood is visiting with her daughter, Mrs. Walter Lawson and Mr. Lawson. Happy Birthday wishes this week to Mrs. Lawson on Wednesday the 8th to Ruby Tennant, Saturday the 11th, who will be 10 and to June Faragher next Monday the 13th, 7 years old. A devotional and business meeting of the WA was held last Thursday afternoon at Mrs. Cecil Spith's home. Also a sale of home made quilting and candy. As usual everything was sold quickly. Stewarttown AYPA held a euchre and dance in the community hall Thursday evening. St. John's Church Vestry meeting was held in the Church Sunday evening. Mr. Ken Murray was appointed Vestry Clerk. Reports were heard from the Rector, Rev. J. E. Maxwell, the People's Warden, Mr. J. Sanford, The Sunday School, W.A., Junior W.A., The Little Helpers and the AYPA. Mr. Ken Murray was appointed Rector's Warden. Mr. J. E. Sanford, People's Warden, Mrs. James McBride, treasurer, Mr. G. English, Lay Delegate to Synod. All sidesmen were re-elected with the addition of Mr. T. Clapham, Mr. S. Mileham, Mr. R. Harris, Auditors Mrs. E. Hodge, Mr. J. Bird. The Esquering W.I. meeting will be held at Mrs. C. A. Grant's home on Thursday at 8.30 p.m. Members will note the change of date.

NORVAL

Mrs. Laird was hostess for the February meeting of Norval Women's Institute. Roll call was answered with home made valentines. Mrs. Moreton gave current events and Mrs. Webb took the topic—Time and tide wait for no man. Mrs. M. Laird gave an interesting history of the A. M. Laird farm and showed the deed of land which the family received from the crown in 1836. She compared early prices with those of today and gave some early history of Norval. A flower contest was held and winners had their choice of valentines. The hostess and her assistants served lunch. Mrs. Wilbert Cleave will be hostess at the next meeting. New hardwood floors have been laid in the Presbyterian manse and the Norval church basement has been sanded during the past week.

EUCHRE PARTY HELD BY ST. GEORGE'S DAUGHTERS

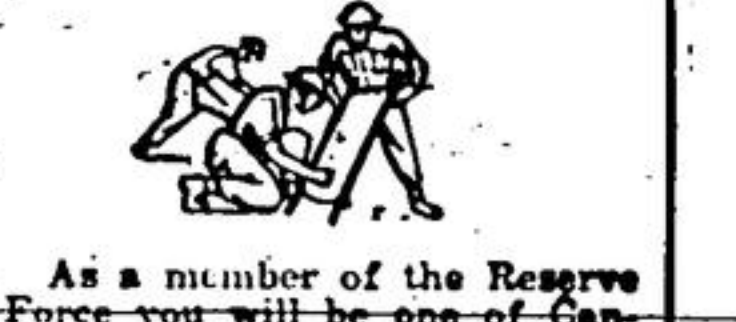

Douglas Marshall, with ticket 13, won a hamper of groceries in a lucky draw on which tickets had been sold by the Daughters of St. George's. The draw was made at a euchre party in the Oddfellows Hall on Friday. Eighteen tables played and prizes were won by Mrs. Dickenson, Mrs. M. Lawr, Mrs. T. Collier, and Mrs. Mary Jourdain.

The Lorne Scots Regiment (Canadian Army Reserve) is offering something really attractive to men of 17 and over who are physically fit and anxious for a spare time occupation that pays off.

Here's a Regiment that offers you many personal advantages; trade and technical training; Active Service rates of pay for time spent in training; a full programme of sports and social events for men who get a kick out of working together.

As a member of the Reserve Force you will be one of Canada's Citizen-Soldiers engaged in an all-important job. The spare evenings devoted to training help to assure the well-being of Canada, because the Reserve Force forms an important part of this country's defence force.

JOIN THE LORNE SCOTS (Peel, Dufferin & Halton Regt.) For Further Details Visit

THE ARMOURY GEORGETOWN TUESDAY AT 8 P.M.

ST. JOHN FUND CAMPAIGN STARTS NEXT WEEK

Mrs. Thomas Grievie will head a committee which begins a fund campaign for the St. John Ambulance next week.

Fund Furnishes Flannel for Finland

As part of its world-wide drive to aid underprivileged children and mothers, the United Nations International Children's Emergency Fund (UNICEF) has been providing supplementary food, shoes and garments for the children of Finland. Here, Finnish school girls make garments for their schoolmates from flannel provided by UNICEF.
