**SAVE TIME & MANPOWER**  
with the **Bale-O-Matic**

**HERE IS THE WAY BALER THAT ADJUSTS ITSELF TO ALL FIELD AND CROP CONDITIONS**

It's the progressive farmer who preserves the food value of his hay, saves valuable storage space, makes hay easier to handle, saves time and manpower by harvesting his hay the modern way with the M.M. Bale-O-Matic.

THE Bale-O-Matic effortlessly lifts hay from the windrows or swath, slices it into uniform layers, and ties it with two strands of steel wire while the bale is still under compression.

THE Bale-O-Matic has a pick-up mechanism which operates equally well in grass or cured hay or straw, handles light, uneven, or extra heavy windrows and swaths. The new Uni-Matic Power raises and lowers pick-up mechanism "on-the-go" over ridges and ditches.

THE Bale-O-Matic can be used as stationary baler just as it is. The sturdy, quality M.M. construction assures you of trouble-free service and minimum maintenance.
