### NEWS AND ITEMS OF INTEREST TO HALTON FARMERS

#### CHECK GERMINATION OF SEED WHEAT

Last week we reported wheat badly sprouted. We note the same condition is reported in most Western and Central Ontario counties. We are glad to be able to report that this condition is not quite as general as we anticipated a week ago. Nevertheless, it is sufficiently general to necessitate a close check on the germination of the seed to be planted this fall. Certainly those buying fresh seed should only purchase seed which includes a germination test. Those wishing to use their own seed would be well advised to immediately forward a one pound sample of their wheat to the Plant Products Division, 80 Collier St., Toronto.

The Seed Marketing Committee of the Ontario Crop Improvement Association recently met and reviewed the wheat situation including suggested prices for seed wheat. It is the feeling of the Committee that when a grower goes to the trouble of cleaning up his wheat for seed and the securing of a government grade, that such seed should be worth at least fifty cents over milling price. It is also the general opinion of this committee that when the wheat market gets straightened away that milling prices will be around \$1.75 per bus. This means \$2.25 per bus for Commercial No. 1 seed wheat. Registered Dawson's Golden Chaff will likely be available at \$2.75 per bus. Insofar as Cornell 595 is concerned very little registered seed will be available this fall, and that which is available will sell at a premium over the \$2.75. However, irrespective of price it will be poor economy to take a chance on seed of poor germination. In many cases the extra \$1.00 invested per acre for good seed will be a cheap investment. We would again urge our readers to treat their grain for smut, and furthermore, wheat is one crop which nine times out of ten will give returns for the extra investment in commercial fertilizer. By the way, if you haven't a fertilizer drill it will pay to rent one. A lime and fertilizer spreader is a good piece of equipment when it comes to applying fertilizer on a pasture or distributing lime, but when it comes to applying commercial fertilizer on grain experimental work both in Canada and the United States reveals that it takes at least twice the amount to get the same results when it is broadcast as when it is drilled in.

#### NEW SEED TREATER FOR STEWARTTOWN MILL

It has just been brought to our attention that the Seed Cleaning plant owned and operated by Walter Lawson, Stewarttown, is to be equipped with a new Swedish machine which automatically treats the grain against smut at the same time as the grain is being cleaned. Mr. Lawson is to be congratulated on this progressive step which will fill a long-felt want in Halton County. The power cleaning plant, properly equipped and operated, has many advantages over the old fanning mill with poorly equipped streams. It is to be hoped that in the near future another central cleaning plant will be installed at some suitable point in the southern half of the County.

**GEORGETOWN FAIR SPONSORS DAIRY CALF SECTION**

In recent years the Georgetown Fair, thanks to an energetic board of officers and directors has developed into one of the most outstanding township fairs in the Province. One of the new features of their 1950 Fair scheduled for September 16 is a Commercial Dairy Calf Section. Judging by the prize list offered it would seem as if every boy and girl in Halton, 20 years

and under, who has dairy cattle at home should be interested in getting ready a dairy calf, grade, or pure bred, born after January 1st, for the Georgetown Fair.

Here is the prize list:  
First 5 prize winners, \$10.00 each  
6th to 10th prize winners, \$8.00 ea.  
Balance of competitors \$5.00 each  
In addition there is to be a Showmanship Competition and for this the winner will receive a Bujova wraat watch. The second and third prize winners in Showmanship will receive \$5.00 each.

#### Beware of New Grain

The small carry-over of grain from last year means that a lot of new grain is likely to be fed to poultry before it is safe for use. Digestive troubles caused by new grain poisoning are quite serious. The feeding of new wheat has possibly been the most dangerous, but new oats and barley have also been known to cause trouble. To be on the safe side it is recommended that new grain should not be fed until at least two months after harvesting.

Some of the symptoms of grain poisoning are listlessness, dark blue comb and wattles, and diarrhoea. The treatment for new grain poisoning is a flush with a laxative immediately this condition is suspected. The most effective treatment is the feeding of a milk flush for two days with nothing else to eat but plenty of water to drink. As a substitute treatment use Epsom salts at the rate of 1 pound to 5 gals. of water for one day only. Another new treatment highly recommended is to incorporate 1 1/2 per cent muriate of potash (ordinary fertilizer grade) into the dry wash, or it can be administered through the drinking water, using one tablespoonful per gallon. This should be given for five or six days, followed by a flush.

#### Glen Williams Will Get Two-Party Phone Service

Glen Williams will have complete two-party telephone service by early October. This news was announced by W. O. Misener, manager of the local Bell Telephone office and all individual telephone users who will be affected by the change in service have been notified.

There has been a growing need for improved telephone service in Glen Williams which, though not incorporated as a village and still officially only part of Esqueping Township, has had tremendous growth in the last ten years. Most business firms as well as a few private individuals have put in two party service but the large bulk of the population are still on rural lines.

#### SOCIAL & PERSONAL

Mrs. Aileen Bradley and son Paul of Oshawa are visiting with relatives in town.

Mrs. J. F. Gillis and Miss Gwen Gillis are spending this week at Lakeland Lodge, Bracebridge.

Mr. and Mrs. Frank Whetstone and Mr. and Mrs. Will Summerlin of Hamilton were visitors on Sunday with their aunt, Mrs. C. Freure.

Mr. and Mrs. Harry Hale are vacationing this week at Glenwood Beach, Lake Simcoe.

Douglas McGilvray, son of Mr. and Mrs. Garfield McGilvray, celebrated his eighth birthday on August 10th with a picnic supper for his friends, Curtis Dwyer, Donny Clark, Ricky Chapman, Terry Ritchie and Philip Rau.
