Season's Greetings

TO ALL OUR FRIENDS

from

B R I L L ' S

YOU CAN'T PICK WINNERS

WITH A PIN . . .

but through careful selection, we have picked many for our clients

Some people pick their investments almost as recklessly as the gamblers who make a list of horses starting in a race, close their eyes and jab a pin into the paper. Then they bet their money on the horse whose name has been picked by the pin. This "method" sometimes works as well as any other, but one rarely hears of anyone getting rich that way. Selecting stocks is a serious business. We know that the safest and best investments are those in companies which produce or handle products which the people must have, whatever happens. With this in mind we have selected four companies which produce or handle some of those essential commodities whose market is assured in peace or war.

THE INTERNATIONAL NICKEL COMPANY OF CANADA, LIMITED

RAO produces petroleum products, including crude oil, motor and aviation gasoline, lubricating oils, highway and building material, etc. Sales are at an all time high, and should increase because of expanded facilities. Profits have been consistently good, but the expansion undertaken in recent years has eaten into profits. Purchases of this company's stock now should pay off handsomely in the future. Dividend rate \$1.00. In 1932 we recommended the purchase of The British American Oil Company Limited's shares. They were then selling at \$34. Our recent market price around \$37.00 per share.

THE BRITISH AMERICAN OIL COMPANY LIMITED

BAO produces petroleum products, including crude oil, motor and aviation gasoline, lubricating oils, highway and building material, etc. Sales are at an all time high, and should increase because of expanded facilities. Profits have been consistently good, but the expansion undertaken in recent years has eaten into profits. Purchases of this company's stock now should pay off handsomely in the future. Dividend rate \$1.00.

In 1932 we recommended the purchase of The British American Oil Company Limited's shares. They were then selling at \$34. Our recent market price around \$37.00 per share.

LOBLOAW GROCETERIAS CO. LTD.

This Company operates 122 stores strategically located in centres of population.

THE BELL TELEPHONE COMPANY OF CANADA

The company owns and operates the most important telephone system in Ontario and Quebec. It services close to 2,000,000 telephones, and has a huge backlog of applications for more installations.

In June of this year there were 50,000 shareholders whose average holdings were 100 shares, currently selling around \$40.00 per share. Dividend is \$1.00 per annum and the company has a good record of paying dividends.

We consider Loblaw Grocerias Class "A" stock as an attractive investment when it is selling at \$30.00 a share. It is now around

Three of these investments have been on our lists of recommended stocks since the early 1930's. The other investment has not, until a couple of years ago, been what we call "a good buy". As soon as it was, we began recommending it to our clients.

THREE CONSISTENTLY GOOD SELECTIONS . . . and a new one

There are four sound stocks, with the seeds of growth in them, which should do well whatever world conditions may be. They are not stocks to buy and forget. On the contrary, the records show, we have advised their sale when market prices have appeared to outrun values, but we have recommended their repurchase when more attractive levels have been reached.

should buy Nickel at the then price of \$45. Present market price is around \$38.00. Earnings for 1950 will probably be around \$2.00 per share. Dividends \$2.00 per share.

The Company is the world's largest producer of nickel, platinum and palladium, and is fifth among the world's copper producers. Because International Nickel products are in such demand that it has become necessary to ration the supply, and because we see no reason to believe the demand will slacken to any appreciable extent, we recommend International Nickel common stock as a worthwhile investment, at current prices.

We consider BAO attractive at its present price, especially in view of the huge amounts of money which have been ploughed back into the company.

Growth has been steady and is continuing. Although profits of only 2 cents on the dollar are made, yet good management and the vast amount of business done—sales for the year ended June 3rd, 1950, amounted to \$161,000,000—enabled the Company to make a profit of \$2,350,000, of which \$1,000,000 was paid out in dividends.

We recommended Loblaw Grocerias Class "A" stock as an attractive investment when it was selling at \$30.00 a share. It is now around \$33.00 a share. Dividend \$1.00 plus 25 cents extra.
