

TOP TRAFFIC CHANGES: Alistair Fraser, M.C., K.C., one of the most popular and widely known railway officials in North America, will retire on March 15 from the position of vice-president in charge of traffic, Canadian National Railways. At right, is John Pullen, the new vice-president, who is well known in transportation, industrial and commercial circles, having travelled extensively in Canada, the United States and the United Kingdom.

Mrs. Ostrander's Father Dies at Toronto Home

Father of Mrs. W. A. Ostrander, R. R. 4, Georgetown, William N. Johnston died at his home, 210 Fulton Avenue, Toronto on Friday. Mr. Johnston, who was in his 84th year, had been bedridden for the past year. A native of Huron County, he had lived in Toronto since his marriage to Isabella Marshall who predeceased him 43 years ago. He was a blacksmith by trade, but had been retired for twenty years. He leaves a family of four children, William, Evelyn and Pearl of Toronto and Mrs. W. A. Ostrander, and six grandchildren. A son Walter was killed while serving overseas in the first World War. Two other children died in infancy. The funeral service was held on Monday at the Trull Funeral Home with interment following in St. John's, Norway cemetery.

GLEN WILLIAMS

PLASTIC DISPLAY BY FREEMAN LADY

Mrs. George Foster opened her home on Friday to Mrs. Hugh Young of Freeman, who gave a display of plastic articles to the large group of ladies present. Afternoon tea, with sandwiches and cake was served.

Mr. and Mrs. Raymond Addy, who have been living in an apartment at the home of Mrs. John D. Moore, Main Street North, in town, have moved to the Glen. They will live in the house on the Glen Road formerly occupied by Mr. and Mrs. Jack Fry, Sr. who have moved to Hamilton.

Miss Marion Hepburn and her sister Maureen were guest soloists at a banquet given by the Men's Club in Palermo United Church on Friday evening.

Mrs. C. Thornton of town is visiting with Mr. and Mrs. Jack Crawford. Another recent guest at the Crawford home was Mr. Roger Guyot, Sr. of Toronto.

Mr. and Mrs. Tounson and family of Hamilton and Miss Helen Rogers of Port Colborne were Sunday visitors with Mr. and Mrs. J. Hepburn and family.

Mr. and Mrs. Harold Davison and Garry of Lakeview were week-end visitors in the Glen and Erin. Happy birthday from all her friends to Marilyn Barth who was nine on Sunday.

PUBLIC SCHOOL NEWS

Describes Maritime Trip At Federation Meeting

The Women's Teachers Federation of Esqueving Township met on Tuesday evening at the home of Mrs. Joseph Dwyer. Twelve members were present. Miss Mildred Eason presided for a brief business period and Mrs. Dwyer reported on the financial status and literature received. The highlight of the meeting was an address by Miss Nellie Jardine of Hornby who told of her bus trip to the Maritimes during her last summer vacation.

Plans were made to hold the next meeting at the home of Mrs. James Evans. It will take the form of a social evening. Delicious refreshments were served by the hostess to close a very enjoyable meeting.

STEWARTTOWN

MARY LAWSON HAS 7th BIRTHDAY PARTY

Mary Lawson celebrated her 7th birthday Friday with a party to which she invited Verna and Doris Pickett, June Farragher, Judy Walker, and her sister Lillian.

We extend a welcome to Mr. and Mrs. Cecil Walker and family who have moved into our community from Georgetown recently.

Mr. and Mrs. John Foster have moved into their new house beside the home of Mr. and Mrs. David Barclay.

Mrs. M. Bailey spent last Wednesday in Toronto at the Kiwanis Music Festival.

There were nine members present at the AVPA meeting held in the school Friday evening. The president, Mrs. John Foster was in the chair. There was a short business session. Mrs. Blizard's group had charge of the rest of the meeting. Materials were given out to members hoping the results would uncover hidden hobby talents in the members.

Lespedeza Plantings Urged To Feed Quail in Winter

Shrubby lespedeza plantings on land that might otherwise produce little or nothing can give a great boost to quail hunting for sport and for game that can be kept long as frozen food. The soil conservation service recommends these shrubby lespedezas strongly for soil conservation and to feed quail. They are legumes, and after the first year supply their own nitrogen on infertile soils. For the South, the SCS particularly recommends lespedeza bicolor; farther north other hardier lespedezas will do better.

Lespedeza seed is about all that quail need to carry them through the season of short feed in the winter. Most other birds do not relish the seed and leave most of it for the quail. The SCS suggests planting it in fence rows on the land that is not plowed, in thin spots and clearings in woodland, or at the edges of woodlots. It will yield far more quail feed than the weeds it will displace. A strip with an area of an eighth of an acre will supply a covey of quail and hold them through the winter. Eight strips of this size are better than a patch of an acre. As a hedge along a cultivated field the bicolor lespedeza has a season of beautiful bloom in summer, and bees find it a good source of honey. A fence row around a pasture will not feed quail because horses and cattle like it and will browse on it.

How to Avert Deadly Smog Revealed at Chemist Meet

Smogs like that in which 19 persons died in Donora, Pa., sometime ago, can be averted by a simple electrical device which filters factory fumes, Professor Frank T. Gucker Jr., of the University of Indiana, declared at a meeting of the American Chemical Society.

Explaining that the smog found so frequently in industrial areas results when water vapor condenses upon particles of dust and smoke in the air, Professor Gucker asserted:

"No fog or rain at all might form in an atmosphere which was completely free of dust."

There are several methods of eliminating small particles from the air, the most obvious of which is passing fumes through a fine filter," according to Professor Gucker.

This would not be a practical way of removing commercial dusts, such as those put out by smelters and cement works, which may be a considerable economic waste and health hazard.

These aerosols may be removed rapidly and completely by means of a high voltage electric discharge, which charges the individual particles and draws them over to one of the electrodes where they are deposited. Such an arrangement known as the Cottrell precipitator, will deposit tons of material in the course of a day.

The Garden of Song

At the northernmost tip of the northernmost peninsula of Celebes island there lies a region of fertile valleys, bordered by coconut groves and surrounded by active volcanoes. It is the Minahasa, the "Land that has become one," where eight original tribes, with as many individual languages, have in the course of the centuries become united, and where disruption and conflict are virtually unknown. Since the arrival of the Portuguese in the 18th century, the Minahasans have adopted the Christian religion, which is now adhered to by 90 per cent of the population. Every town, every rural area has its own church, usually small but charming, and tended with great care by its members. Since 1934, the Minahasa has been granted an independent church with a synod of its own.

Home Repair Kit

A suggested simple kit for home repairs includes: Small cans of paint, varnish, enamel and shellac, selected for matching purposes. Turpentine. A three-inch paint brush. A one-inch paint brush for small work. Caulking compound. Patching plaster. Furnace cement. Portland cement. Plastic wood. Glue or other suitable adhesive. Shellac in stick form for filling small cracks. Putty. Putty knife. Razor blade and holder. Sandpaper "O" and "OOO." Steel wool. Wall cleaner. Metal polish. Art gum. Screwdrivers, large and small. Hammer and wrench. Many more items can be added, but those listed will be outstandingly useful.

Cook Pork Thoroughly

Out of every 100 hogs that go to market, at least one of them is capable of causing trichinosis among meat consumers, declares the American Veterinary Medical association. Thorough cooking of pork is the only home safeguard against this serious disease, since cooking destroys the worm parasites which cause it. Intestinal irritation, muscular pain, and fever are typical symptoms, although some people become infected without showing definite symptoms. Pet animals also are susceptible to trichinosis, the AVMA says, and therefore should not be fed uncooked pork.
