HOLSTEIN HERD STRAYS RETURNED TO OWNER

Eleven head of pured young Holstein cattle were returned to their owner last week after spending a month at the Martin Estate near Glen Williams. Recently Mrs. Elsie McBride, owner of the property, had advertised in county papers.

The cattle were claimed by Norm Armstrong who farms near Victoria. He had left them to pasture on 175 acres of land in Esquesing and had not missed them since they strayed early in November.

SUNDAY WORSHIP AT ST. JOHN'S CHURCH

Regular morning worship was conducted in St. John's on Sunday by the minister Rev. John M. Smith. The sermon subject was "Helps for the Christian Life" and was the third in a series of sermons based on the general theme "The Christian Life". The anthem "Seek Ye the Lord" was sung by the choir with Reg Broomhead singing the solo parts.

The evening meditation was entitled "Famine in the Land" and was based on the text Amos 8-11-12. Joan Bishop accompanied the congregational singing at the piano and a trio consisting of Sue Crabtree, Beverley Hyde, and Patsy Willson sang "Have Thine Own Way Lord." It was announced that special Christmas services were being planned for December 16th and 23rd. On December 16th the annual White Gift Service is to be held at 11 a.m. and a Carol Service at 7 p.m. Christmas worship will be held on the morning of December 23rd and the Candle Light Service in the evening.

An Analysis of the Canadian Hog Market

The Livestock and Meat Trade Report issued weekly by the Marketing Service of the Canada Department of Agriculture provides a kind of interesting information. To-day (Thursday, November 29th), it took the trouble to summarize the weekly hog marketings for Canada from January 18, 1951 to November 17th, 1951 — the weekly average price dressed weight for hogs A's and the hog marketings at the same periods a year ago. In few exceptions the weekly marketings were lower for the seven months of 1951 than they were a year ago. On July 28th this year we had marketed a total of 122,827 hogs in contrast to 120,000 hogs in the same period in 1950, or 122,827 hogs marketed. At the end of July, however, the marketings had been in the opposite direction. On November 17th our marketings for the year were 120,000 hogs of the 1950 figure. As a matter of fact for the week ending Nov. 17th we had the average marketed

17,313 more hogs per week than we did a year ago in the same period. The disastrous slump in hog prices which occurred in early September ties in fairly closely with increased marketings. While we do not pose as any economist nor any authority on live stock marketing it would appear that just as soon as it became evident that the weekly hog marketings were likely to exceed domestic consumption, the prices skid went into effect. According to our understanding our domestic consumption of pork is the equivalent of 80 to 90,000 hogs per week. During the first seven months of the year that is what our hog marketings were. However, since early October our weekly marketings of hogs have ranged from 94,000 to 132,000 hogs. This would indicate to us, first, that the packer is a clever prognosticator of hog marketings and was determined that he would not be caught with his coolers full of \$35 to \$40 pork when marketings exceeded domestic consumption; and secondly, that in order to move present marketings to the consumers' table, pork had to be offered at a price which was attractive in relation to beef and other meats. There is of course, a third point and that is our Canadian price must relate very closely to that of the American market, otherwise we would be deluged with American products. As a matter of fact at the present time the Canadian price is approximately 4c per pound higher than the American price.

That picture, however, will not be of much consolation to the hog producer who finds it necessary to purchase western feed grain at present prices. What the future holds in store for us we hesitate to suggest. It would appear, however, that present prices may remain in effect until March at least. However, we still think that the hog producer who stays with the game will be the one who will have hogs to sell when hog prices move up again to a point where they bear their proper relationship to other meat prices.
