FARM NEWS
Annual Meetings Set For Farm Societies
 The first part of January would appear to be a series of annual meetings for various Halton Agricultural organizations. The Halton Crop Improvement Association starts the series off on Friday, January 4, when they meet in the Milton Town Hall. This progressive organization has secured W. P. Watson, Ontario Live Stock Commissioner, as their guest speaker. Mr. Watson's subject will be "The Outlook for 1952." Other local farmers will give brief reports on such topics as "My Experience with Grass Silage"; "Deep Litter with Cows"; "The Pit Silo for both Grass and Corn Silage"; "The Hay Drier Method of Handling Hay"; "Harvesting the Grain Crop with the Forage Harvester"; "Top Dressing the Meadow with Ammonium Nitrate"; "Mulching the Spring Grain Crop"; "An Alfalfa Seed Settling Experiment"; "The Seed Grain Situation for 1952." The programme gets under way at 10.30 a.m., with a free lunch at noon.
 The following Tuesday, January 8th, the Guernsey breeders have their annual meeting at Hornby, when Dr. Robertson of Renwood Farms at Cobourg will give an illustrated address on an expedition in which he participated, to the Arctic.
 The Holstein breeders of Halton meet the next day, namely January 9th, at Trafalgar and here Professor George E. Raithby of the Animal Husbandry Department at the Ontario Agricultural College is to be the main speaker.
 The Halton Jersey Breeders have secured Everett Biggs, Ontario's new appointed Dairy Commissioner, as their chief speaker for their meeting at Hornby on January 15th. Mr. Biggs, who has given considerable study to the marketing of milk, both in Great Britain and some of the Northern States, will explain the proposed formula method which may be used in establishing milk prices for the whole milk markets in the future and also an illustrated address on his tour of various European countries in 1950.
 All three of the dairy breed organizations apparently believe in looking well after the inner man, because we noted that in all cases the business sessions are to be held in the morning followed by noonday banquets. Speaking of banquets we can safely state from the experience of former years that these noonday meals will be banquets in every sense of the word.

great majority of those participating in this programme of adult education are most enthusiastic, nevertheless there are a few weaknesses here and there and an effort is being made by the committee in charge to rectify these prior to the courses reopening on Tuesday, January 8th.

FARM NEWS
Halton Flocks Vaccinated For Newcastle Disease
 Newcastle disease in poultry first broke out in Halton County last spring. Since that time local poultrymen have been living in dread of an outbreak in their respective flocks. It is a highly infectious disease and consequently comes under the "Animal Contagious Diseases Act" administered by the Health of Animals Branch of the Dominion Department of Agriculture. The only control measure where an outbreak occurs is the slaughter method. The Animal Disease Research Institute at Hull, Quebec, has been working on the problem and some time ago produced a vaccine which has been under test. In each flock ten birds have been removed each month and challenged with a virulent virus. At the end of six months all have withstood the challenge, indicating that immunity has lasted for six months and will likely last for a longer period of time.
 Early in November of this year, Dr. T. Lloyd Jones, acting principal of the Ontario Veterinary College at Guelph, announced that approved hatchery operators may apply to the Ontario Veterinary College for Newcastle Disease Vaccine to be used in hatchery supply flocks. We also understand that all practising veterinarians throughout Ontario have been informed of the plan of vaccination and hatchery operators may make arrangements with them for the administration of the vaccine.
 Incidentally, quite a number of flock in Halton which are supplying eggs to hatcheries have been vaccinated during the past two months. In so far as we can learn from such flock owners the vaccination has not interfered with the egg production nor have there been any ill effects. This marks another forward step in controlling contagious disease in the poultry kingdom.

BIRTHS
