CAN YOU IDENTIFY THE FARM?

TO GIVE YOU GOOD VALUE...
Because telephone hands and brains are working all the time to find better and cheaper ways of doing things, the most anybody pays for a home telephone is 18¢ a day.
Chances are you pay even less than that . . . less than the cost of a casual soda at the corner drug store.
We will go right on keeping your telephone service good, your telephone cost low.

FARM NEWS
RECENT SHOWERS
STRENGTHEN CROPS
The showers of last week were gratefully received in all sections of Halton. Despite the current prices of agricultural products every rural face wore a smile after last Thursday morning's shower. True the county as a whole will need frequent showers like that of last week if we are to harvest a bumper crop. Frosts have stunted the timothy in some areas but without exception crop prospects in the mixed farming areas of the county are a lot more promising than they were when we were writing our column a week ago.
Speaking of agricultural prices, there isn't too much wrong with them when one looks back over four or five years — in our opinion, there would be little or no kick from agricultural producers if the cost of feed, fertilizers, farm machinery, farm labour — in fact, practically everything which the farm operator has to buy — would react accordingly. In relation to the world prices, our prices in Canada are still high, which adds to the difficulty in securing markets for our surpluses. However, as conditions exist, with feeds, fertilizers, and other purchased commodities at last year's figures and in some cases higher, Canadian farmers are certainly caught in the squeeze. That this is already reacting on their buying power, is indicated by the drop in sales by local merchants. While we do not pose as an economist we can't help but feel that another twelve months may present an entirely different picture. After all one can get out of hogs and poultry very rapidly, and judging by reports there are a lot of hogs going to market, which under normal conditions would have been

get us into difficulties, and on the other hand neither does it take much of a shortage to turn the scale in the other direction. While it may be wishful thinking, some of our authorities still feel there are possibilities of the U.S. embargo being lifted sometime this fall. If it does materialize, the picture could change rather rapidly. Certainly the eastern states want our dairy cattle — the U.S. could utilize quite a quantity of our beef. In the meantime it would appear to us that Halton farmers would be well advised to carry on a balanced programme. In other words, this is no time to get panicky, neither is it time to be unduly optimistic.

FARM NEWS
FOLK SCHOOL LEADER
WINS SCHOLARSHIP
Halton Folk School enthusiasts will be delighted to learn that Clifford Waite has been awarded a \$800 scholarship at Harvard University. This will enable him to further his studies towards a doctor's degree in Adult Education.
Cliff was leader of the Halton Folk School this year and was very popular with all who met him. According to those who attended, Mr. Waite made each one feel that he or she had something to contribute to the success of the task at hand. The wealth of information which he left with the students will enable them to take their place as better citizens in their respective communities.
Halton Folk School leaders and students in extending heartfelt congratulations on his achievement, also express hope that they may be fortunate enough to have

Pressed into Service

During the war of 1812, every able-bodied man from 16 to 60 in the Niagara Peninsula was pressed into serving in the Militia. Farmers from all over set aside their hoes and took up muskets in order to defend their country.
It is with this spirit . . . a desire to serve their country . . . that descendants of these same farmers continue to cultivate vines unsurpassed in clarity, flavour and bouquet, the products of which have delighted generations of connoisseurs.
