

The Canadian Rockies wouldn't be the Canadian Rockies to visitors unless they saw a scarlet-coated Royal Canadian Mounted Policeman and his horse. Here is one of the "Mounties" who is stationed in Jasper National Park with his horse "Blackie" and in the background is multi-colored Pyramid Mountain across the Athabaska Valley from Jasper Park Lodge, a village of log bungalows, operated by the Canadian National Railways. Bleeding with the mountain scenery, the Lodge offers tourists all the modern facilities of a city hotel.

### Kits for Asian, Latin American Midwives

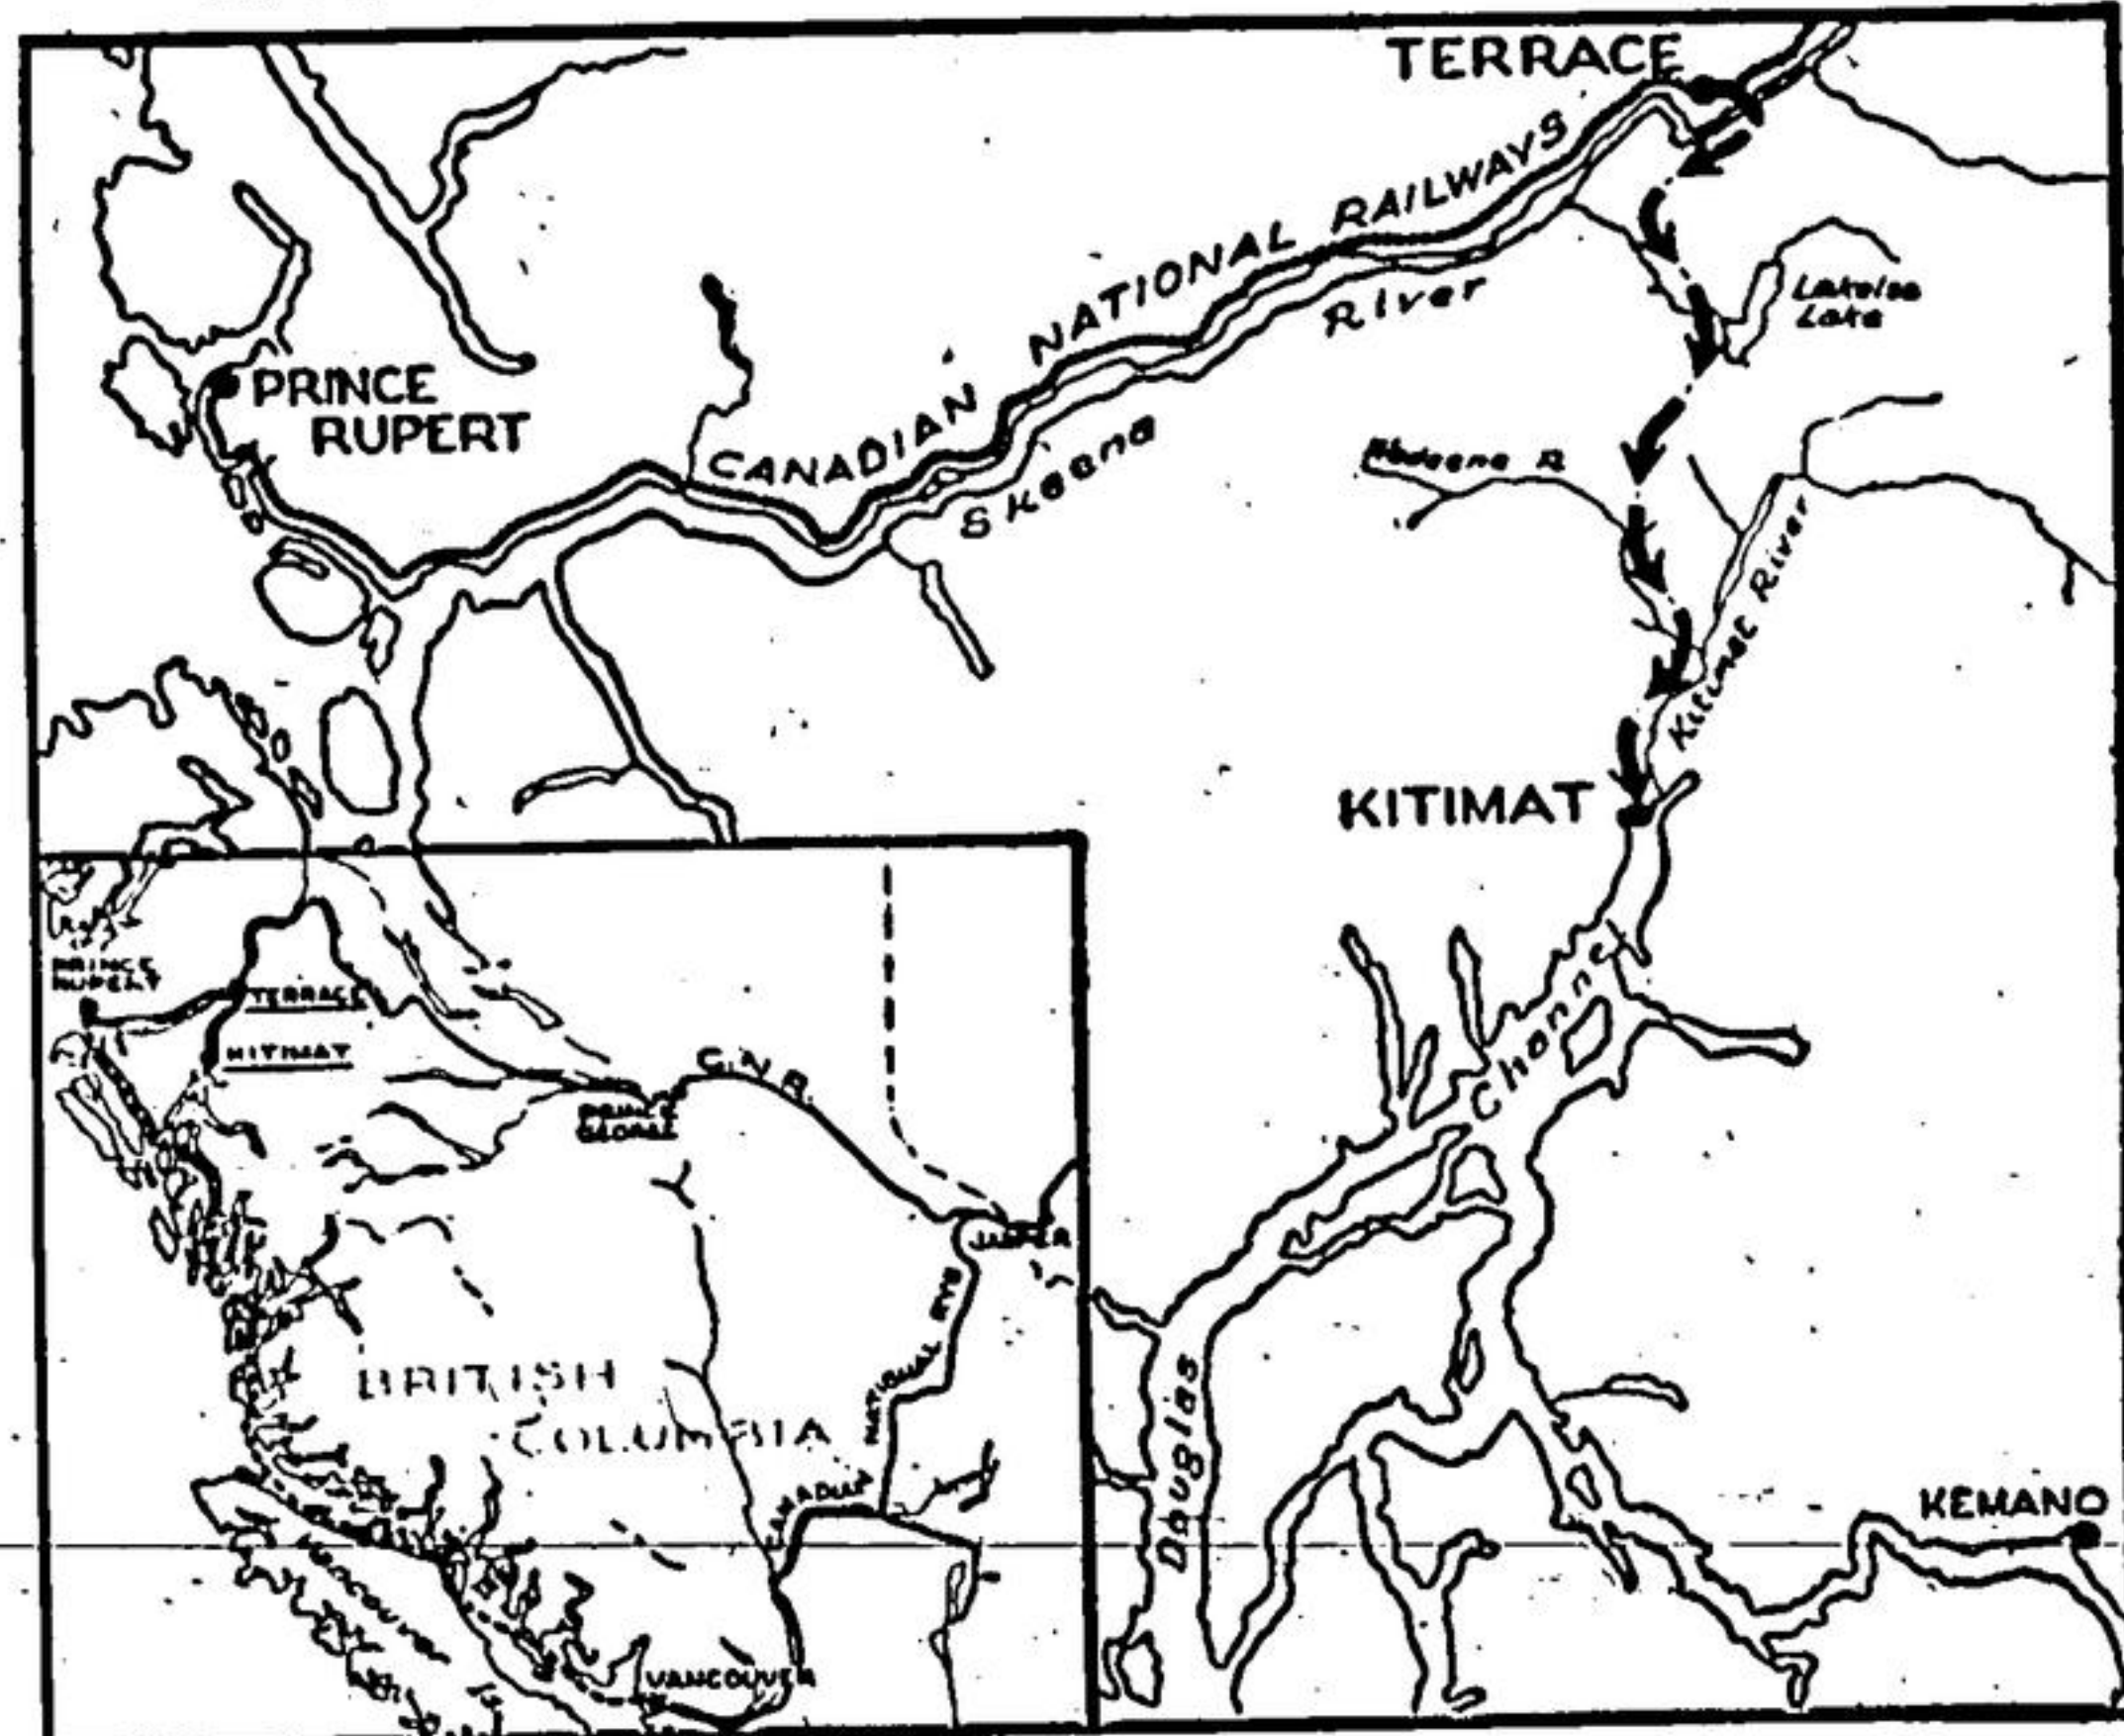

The United Nations International Children's Emergency Fund (UNICEF), is supplying 2000 midwifery kits to countries in Asia and Latin America. The kits (as shown above) will be used by village midwives on whom women in those parts of the world are almost wholly dependent. For the first time, these kits will have at hand the essential instruments, medicine and material for modern midwifery practice. They weigh about fifteen pounds, and can be carried on the midwife's back or separated and carried by hand.

## NEW C.N.R. LINE WILL SERVE KITIMAT

The Canadian National Railways, already the largest on the continent, is adding to its mileage. Parliament has passed a Bill authorizing the Company to build a new line from Terrace — east of Prince Rupert — to Kitimat where the Aluminum Company of Canada is building a huge water power and aluminum manufacturing industry.

To go from the Skeena River down to the sea at Kitimat, the new line will traverse some of the most rugged mountain country in British Columbia, and it is estimated that 2,500,000 cubic yards of material (enough to make a pile almost twice as big as New York's Empire State building) will have to be moved to provide for the right-of-way.

The first engineering problem to be encountered will be the crossing of the Skeena River near Terrace and, for this purpose, the Canadian National will have to build an eight-span bridge, 1,013 feet long. Four smaller bridges will have to be erected to cross the Lakelse, Wedoene, Little Wedoene and Coldwater Rivers, which will be met along the 43-mile route.

Assuming that there will be no delays in the delivery of essential building materials, it is hoped that the new C.N.R. line will be ready for operation about the end of 1954.

The sketch map shows the route that the new line will take from Terrace to Kitimat; and the insert charts the general area, including the famous C.N.R. triangle tour route from Vancouver to Jasper, to Prince Rupert and back to Vancouver.
