

St. George's Centennial Year

1852-1952

My God, is any hour so sweet,
From blush of morn to evening
SUN.
As that which calls us to Thy
feet,
The hour of prayer?

K's GRILL

Beat the heat at Mike's place. Try ice cream sodas then. For a tasty, tempting sandwich. Try Tomato and Bacon or Ham. Sure, we're always glad to serve you.

With the foods you want to eat, for tasty tempting dishes. We know, Mike's place can't be beat.

LIMEHOUSE

MISSION MEETING AT MRS. BENTON'S

The WMS met at the home of Mrs. A. W. Benton on Thursday evening when Mrs. Kirkpatrick read Scripture and Mrs. Mills led in prayer. Kathleen Kirkpatrick and Kay Norton sang two duets, accompanied by Mrs. H. Norton. Text word "Nation" was answered by a verse of Scripture. Mrs. Benton read from the study book "Meet the South Americans" and Mrs. Glsby read an article "The New Year". All articles for the missionary bale are to be handed in by next meeting. Refreshments were served by the hostesses after the meeting.

Mr. Ross Norton and Mr. Bill Inglis left Sunday evening for the Western provinces.

The Latimers spent a week-end in Hamilton recently.

The James Kirkpatrick's spent the week-end at Drayton. Diane Shelbourne has been holidaying with her sister, Mrs. W. Brown at Strathville.

Mr. Pargeter of Acton judged the school children's garden plots on Saturday afternoon.

Recent visitors: Mrs. Warrington of Sharbot Lake, Mr. and Mrs. Jack Warrington of Oshawa a week ago, and Mr. and Mrs. Dainty and Mrs. L. Campbell of Hamilton on Sunday with the A. W. Nortons.

Mr. and Mrs. W. Thurston of Meaford with Miss Swackhamer. Miss Doris Mitchell home from Toronto where she is enrolled in the teachers summer music course.

Mr. and Mrs. Jack Smethurst and family of Islington and Mr. and Mrs. C. A. Grant and Kenneth of Stewarstown with Mrs. Smethurst on Sunday.

Mrs. Ford and children of Acton with Mrs. E. Karn.

Mr. and Mrs. Fred Cox of Orono with the Shelbournes.

you can eat your cake and have it too...

When that important scene is photographed by our expert wedding photographer.

We take a lot of pride in the wedding photographs we have made. Drop in at our studio at 65 Main St. North, Brampton, UPSTAIRS, and see our display. Open until 9 p.m. Saturday, and evenings through the week by appointment.

Eyeglass Wearing Today Not Like Yesteryear

Nearly 100 million Americans are wearing spectacles today, the Better Vision Institute reports. And these modern eyeglasses not only act as seeing aids but they look good.

They are a far, far cry from the glasses invented by Italy's Salvino del Armati 645 years ago, and from those framed in wood, bone, leather, and other materials in the centuries that followed.

The Florentine's eyeglasses swiftly gained favor, and by the year 1300 Venetians were sending spectacles to customers throughout Europe—customers who could afford their high prices. By that time, the Chinese—who had probably invented spectacles independently—were making many pairs. The Chinese made tortoise shell rims because they considered the tortoise a sacred animal whose shell would bring long life and good luck. As glasses were used in China for reading, they became the badge of scholars and aristocrats, and even legless rims were sometimes worn as a symbol of position.

The invention of printing in 1483 brought eyeglasses into more widespread use in the western world. For more than two centuries thereafter, peddlers roamed the roads of Europe with trays of spectacles, marked "young" or "old". There were no prescriptions or adequate examinations then. Not until about 1700 were glasses fitted to the individual, and even then examinations were pretty primitive.

Candy Cams Long Way From Sugar-Coated Pill

The little sugar coated pill has come a long way.

A penny's worth of candy used to keep a youngster happy for quite a while. And an old-fashioned "laffy pill" was lots of fun, but well worth it. It's a different story today. The national sweet-tooth has come into its own, and Grandma's fudge kettle has turned into a \$365,000,000 a year business.

It all really started some 500 years ago in the English apothecary shops, ancestors of our drugstores. About that time, apothecaries began using sugar to coat their pills. Before long, the sugar coated medicine became so popular that the medicine was left out and the pills were manufactured with sugar only.

Descendants of the old English medicated sweetmeats can now be bought in more than two thousand different forms or varieties. Candy counters and sweetshops in the United States annually sell over two billion pounds of confections.

Migraine Headaches

Doctors believe that attacks of migraine headaches can be shortened by starting treatment as soon as trouble begins. About 5 per cent of the nation's population is affected by migraine headaches, although it ranks only about third as a cause of headaches. They occur two or three times more frequently in women than in men. Migraine headaches, will last anywhere from thirty minutes to three or four days, are restricted to one side of the head, and can occur on either half in an alternating manner. The headaches are described as causing a dull, throbbing, piercing pain often accompanied by nausea, exhaustion, depression, nervousness and blurring of vision. Migraines are associated with certain personality characteristics since "thinkers" rather than "doers" are generally affected by them. Typical victims of migraine attacks are meticulous housewives and overambitious, perfectionistic men with an exaggerated sense of responsibility.

Our Sense of Taste

It is believed that the tongue has specific sense organs which respond to different chemicals. According to the classical view there are four types of such taste receptors, each with their own nerve fibers, through which impulses are sent to the brain. One type is for sour, one for sweet, one for salt and one for bitter; our taste sensations being made up of various combinations of these fundamentals. The exact process by which a particle of matter stimulates the nerve endings is not known.

Persecute Christians

One aspect of the Korean war of particular concern to religious leaders is the manner in which the Communist armies are reported to have singled out Christians as special targets of persecution and retaliation. According to a report in the Pusan Christian Times, 20,000 Christians, including priests and pastors, have been slain by the North Korean Communists since the beginning of the war.

Indoor Air Purifier

A new household air purifier which utilizes short wave ultraviolet rays to change oxygen into ozone, nature's own air freshener, has been developed by Roy C. Stone and Company, Chicago. The stanninum unit plugs into any AC outlet and is said to destroy unpleasant odors with electronically produced ozone.

Combine More Grain In Less Time . . .

MASSEY-HARRIS
Super
26 and 27
COMBINES

Balanced Separation

You've watched a traffic officer on a busy corner on Saturday night, directing . . . controlling . . . keeping traffic on the move. And that's exactly what balanced separation does in the combine. Balanced separation regulates the flow of materials—keeps them moving at top speed . . . keeps them from overloading or clogging. Saves time . . . saves grain. Gives economical combining.

Multiple Speed Drive

Thirty-six controlled ground speeds give a range from 3 to 7 1/2 miles per hour. Gives fingertip control on any type of field . . . for any stand of crop. You'll combine faster . . . get more grain . . . with the Super 26 or Super 27 than any other machine in the field. The Super 27, with 16-foot cut, combines up to 70 acres per day. The Super 26 similar in design, does up to 50 acres daily.

Come in soon and let us tell you the whole story.
