FARM NEWS

German Combine Makes Canadian Debut Here

Halton farmers who took advantage of the opportunity of seeing the Claas Super Combine in action at the demonstration held on the Charles Austin farm, near Hornby, on Thursday of last week were astounded with the all round efficiency of the German built machine. It would seem as though the engineers who designed and built this combine had thought of everything. The Claas Super Combine is a huge machine—appears to be sturdily built and yet gets around the field at an amazing speed. Hauled by a jeep it appeared to almost float around the field on its huge aeroplane tires. It takes a nine foot swath and does a perfect job of threshing with little or no loss of grain. Along with the threshing it cleans and makes four different quality separations and at the same time bales the straw. We had the opportunity of seeing the machine in action on two different farms and in neither case could the fields be considered level—yet it did a beautiful job. It was the first opportunity which Canadians have had of seeing a combine with a built-in straw baler. We understand however, that this machine is in general use in Great Britain and most European countries and many other parts of the world. Frankly it was a bit of a job to many of us to learn that in Europe they have for many years been manufacturing and using a combine which certainly appears to many combine enthusiasts to be very much superior to any Canadian or American machine now on the market.

We understand that the Claas Super Combine is going to be at the Wheatland Day, scheduled for the Kohler Airport, near Cayuga,

on July 31st. If so, and the Claas machine gets an opportunity to put on a demonstration, many Halton folk who saw it in action locally, prophesy that it will steal the show. It is an all purpose machine and is stated to be suitable for all crops from cereal grains to every type of small seed, including corn, beans and peas.

Only two of the machines are now in Canada. In addition to the one demonstrating in Halton, the second machine is doing similar work in Waterloo County near Kitchener. Following the Wheatland Day at Cayuga, the machines head for Western Canada.

It will also be of interest to our readers to learn that the young man demonstrating the Claas Combine is George Humerfauth, a young Swiss Agricultural College graduate. He was employed on the farm of James Carney, Lot 5, Concession 5, Esqueping Township in 1951. The operator of the second machine now in the Kitchener district was employed a year ago on the farm of Wm. Marshall, near Milton. These young men in their demonstrations are certainly presenting a real challenge to Canadian and American agricultural engineers.

Will Be Principals In Western Wedding

Dr. and Mrs. John Kerby are en route by motor to the west and will visit at Humboldt and Regina, Saskatchewan, during their three weeks away from town.

At Humboldt they will attend the wedding of Dr. Kerby's brother, Dr. William Kerby, who graduated last year, with his brother from the Faculty of Dentistry at the University of Toronto. He will marry Miss Doreen Ogilvie. Dr. Kerby will be his brother's best man and Mrs. Kerby will be bridesmaid.

AROUND THE HOME

For that open-air BARBECUE... bricks produce neat and substantial results. Use 1/2 inch iron rods or bars, set between bricks or laid on a ledge of projecting bricks. Base may be of concrete—at least 10 inches deep, placed on gravel or packed cinders. Suggested size: 3 feet 5-3/4 inches by 3 feet 1-1/2 inches.

Two cramp crates will make a neat dressing table for the cottage. Stand on end, 18 ins. apart. Braces across back with strips of 1/2-in. pine or plywood. Curtain of chintz.

Many other suggestions like these in the booklet "Around the Home Again". Write for copy to: **Molson's (Ontario) Limited, P.O. Box 400, Adelaide St. Station, Toronto.**
