## What Council Did

ON MONDAY, DECEMBER 22nd

Accepted the tender of Nesbitt, Thomson & Co., for purchase of \$26,300 in Georgetown debentures at a price of 100.65.

Signed an agreement with Esqueving Township which will create a fire district in a portion of the township surrounding Georgetown.

The township will purchase a fire truck and maintain it and the town will man the truck and house it in Georgetown.

Will prepare by-laws for the new addition to Georgetown High School which will be built by North Halton high school district board.

Were interviewed by John Cordaro about a drainage condition in front of his Main Street driveway. Head chairman Goodlet said he would have this fixed.

Town clerk Charles Willson told council his resignation was not caused by any disagreement with council, and that it was prompted because he did not relish the tax collecting job and preferred another type of work.

Reeve W. G. Marshall, who is retiring from council this year, said he had enjoyed his three years in office and that it had been a real pleasure to be associated with a fine group of men in conducting the town's affairs. Councillor Petch moved a vote of thanks to the mayor for the manner in which he had carried on town business during the year, and councillor McGillivray also spoke briefly.

## Mammoth Xmas Party For Legion Children

A Fergus man who has one young son a patient in Sick Children's Hospital and another who must go there for treatment soon, had a happier Christmas when he won \$50 as second prize in the Legion Christmas Tree draw.

His ticket 2446 was one of those drawn at the Christmas tree party last Tuesday. First prizewinner of \$75 was George E. Cook, 396 Oakwood Ave., Toronto, ticket 1914. Third prize, \$25 went to a Georgetown man Dick Packer with ticket 3133.

The Legion party, for children 10 years of age and under of members, and Auxiliary members, was again a big success. Over 400 children received beautiful gifts from Santa Claus, with such treats as dolls, orchestras, games and garages. The evening was in charge of Mr. and Mrs. William Roney who have taken full charge of the party for several years. This year Mr. Roney had Charlie Day help him on the ticket committee, and Les Clark, Bob Muir and Charlie Day helped Santa with the prizes.

## TWO RAFFLES HELD BY THE TRUE BLUES

As a fund raising activity, two groups of the local True Blue Lodge held lucky draws during the Christmas season.

Winner of a fruit cake in the group convened by Mrs. Gordon Jennings was Mrs. K. Rawson, of Guelph. A group convened by Mrs. Harry Shortill raffled a pair of pillow slips which were won by Bob Harris.

## STEWARTTOWN

## ST. JOHN'S GUILD ANNUAL ON TUESDAY

The annual meeting of St. John's Guild will be held at Mrs. John Standish's home next Tuesday evening, January 6th.

Congratulations to Mr. and Mrs. Poulson in the birth of another little daughter.

Mr. and Mrs. Sanford spent Christmas Day in Limehouse.

Mrs. J. H. Smith visited with her sisters in Toronto for the Christmas holiday.

Mrs. Bally spent Christmas at Islington and Toronto.

Mr. and Mrs. Walter Lawson, Hob and Donald visited with Mrs. Peden for the day.

Evalonne Smith took charge of the organ and played at St. John's Church for the Christmas Day service.

## FARM NEWS

## Revolutionary Methods Increase Corn Yield

J.E.W.

High grain corn yields in Ontario are normally associated with south-western Ontario. Yesterday, however, we had a chat with Sam Newell, who operates around 150 acres on the Wentworth side of the Town Line near Millgrove.

During the past two or three years we have heard reports of high yields of grain corn on the Newell farm, and rather revolutionary methods being practiced by Sam. So much so that we had definitely planned this past summer to pay him a visit. However, it was another case of plans which didn't materialize. Yesterday, however, we got at least part of the story, and to say the least, we are amazed.

As everyone knows, the summer of 1952 was a dry year. Despite this, Sam informs us his 65 acres of grain corn averaged 74 bus. of shelled corn per acre. What to us is even more startling, two-thirds of the acreage was in corn for the fifth consecutive year, and the remaining twenty-odd acres in corn for the fourth consecutive year. Sam describes his farm as very rolling and ranging from blow sand in spots to black loam in the valleys and gravelly on the knolls.

Here in Halton on our heavier clay loams the recognized sound procedure is to fall plow. Most of us feel that fall plowing is practically a "must" if the crops the following year are to be worth while. However, Sam has a different soil type and furthermore, it is normally the first of December or even later before he gets his corn plowed. Consequently, for the past three years at least, he has practiced the spring plowing.

The first operation is to run a shredder over the refuse of the previous corn crop. This chops or shreds the corn stalks into a condition which makes plowing much easier. Prior to plowing however, he spreads 400 lbs. of 0-12-20 commercial fertilizer over each acre, Ammonium Nitrate (32 per cent plus another 100 lbs. per acre of Nitrogen). In other words he plows in 500 lbs. per acre of commercial fertilizer containing 32 lbs. of Nitrogen — 48 lbs. of Phosphorus, and 80 lbs. of Potassium. Then at planting time and by the way he uses a corn planter, he side dresses with another 200 lbs. per acre of 4-12-10. Then along about the last cultivation, when the corn is about a foot high or better, he side dresses again with 200 lbs. per acre of Ammonium Nitrate. That according to our mathematics totals 900 lbs. of fertilizer per acre in one season, or in terms of Nitrogen, Phosphorus and Potassium, means 72 lbs. Nitrogen, 72 lbs. Phosphorus, and 100 lbs. Potassium per acre. Yes, Sam also practices spraying with a chemical weed killer to control such annual weeds as lambs quarters, pigweed, etc.

The idea of growing corn year after year on the same land is contrary to all orthodox ideas. We would normally anticipate that such procedure would burn all the organic matter and fibre out of the soil. How long this programme can continue, we do not know. On the face of it, it seems all wrong and yet Sam states his yields in recent years have been higher than a few years ago. At that time he was plowing down alfalfa. He also states that by leaving his corn stalks standing in the field over winter there is less erosion than when he left it in grain stubble. In 1951 he had a 90 bus. per acre crop. His lower yield this year in his opinion was entirely due to lack of rainfall.

IT'S BEEN OUR PLEASURE TO SERVE YOU IN 1952, AND WE LOOK FORWARD TO YOUR FRIENDSHIP IN THE COMING YEAR.
