NEED DAIRY INDUSTRY FOR NATION'S HEALTH

THINK FOR YOURSELVES WHAT YOU WANT-HEALTH OR MONEY FOR A SHORT TIME?

Dear Mr. Editor: Do the mobs of people want us to be like China or India?

Who wants to starve? Who wants to be sick? Isn't health more than money. Healthy people are happy people and the makings of a good com-

munity. With regards to your editorial in last week's paper, what if farmers went into the soya bean industry? People would soon starve and their health would be affected worse than now. Look at the cancer now from improper foods. We

all need proper foods: True, drugs help a lot but affect the heart, making a shorter life.

If we grew soya beans and ate margarine, we get no carrotene, poorer blood and poor eyes. Enough people wear glasses now as a hindrance to health and work. How often do people say. "Oh, I could not see because of my glasses" (not the fault of the glasses not being good, but light shining on them, steam, etc.)

If we grow soya beans (no cattle, no manure). What keeps the land up? Poor land always means starving people. Can't people think? Look at China and India. The land is terribly run down and there is starvation. Do people want us to be the same, all for the glory and honour of doing something for the other fellow.

Proper advertising does not atways help as people look for something cheap and they certainly get it and ruin their health, especially children, and old people get a shor-

ter life. When soft drinks go up in price not a word, when milk does, oh boy! Soft drinks make poor kidneys. Some people like to pay their money to the doctor instead of eating to health, and doctor's fees could buy a lot of natural health.

Do people stop to think for themselves or always run with the mob - one yells then all follow.

How can we have a good healthy community, if they do not stop to think for themselves. A healthy community is a prosperous one. An example: a farmer near Georgetown took a piece of new land just to see how soon it would run down and cropped it. In five years it was not very good so if we cannot have our cattle and grow soya beans, how long will we have soya beans? Then what, will we farmers have to work in town and take jobs away from others and eat the last food on the farms. Where will the town ones eat when we are

eating the last? Do town people really understand the farmer's situation and . God's way of nature to keep all things

good. Good farmers are trying to better their farms. . Will you help?

Sincerely,

Mrs. Mac Alexander, Norval

P.S.: Honey also a nature food helps health. No germ lives in honey, even if put in.
