

Elmira Here Tonight For Play-off Game

Som exciting hockey is promised tonight when Elmira meets Raiders here in the second of their best-of-7 playoffs in the Intermediate A semi-finals.

Although beaten 6-0 in Elmira on Monday, the game was a good one and Raiders gave the home team a good battle in the first two periods. Del Beaumont was back with the locals for his first appearance this season, and teamed with brother Junior and Harvey Chappel on one forward line.

Raiders ended their regular schedule in Oakville on Saturday when the Clippers won 10-1.

T. J. Brownridge Heads Halton Mutual Insurance

T. J. Brownridge was elected President of the Halton Union Farmers' Mutual Fire Insurance Co. at the annual meeting held in Acton recently. Vice president is Cameron Kitching and directors remain the same as last year with A. T. Moore as secretary treasurer.

The annual statement presented to policy holders showed another year of successful operation. Losses were more than the previous year, but the increase was largely due to re-insurance claims. Total losses for the year were \$34,103.31 and of this amount 62 re-insurance losses accounted for \$15,925.14.

Surplus at the end of the past year amounted to \$144,265.11 of which amount \$8,545.03 was accumulated in the present year. Donations were made during the year to the Wellington County and Halton County Tuberculosis Associations and the Sick Children's Hospital.

During the year the company inaugurated an inspection pro-

gram and appointed William Norton as inspector. The inspection is designed to help policy holders protect their buildings and equipment against fire hazards and give direction in changes from defective electric wiring.

LOCAL MEN FLY TO DISASTER SCENE

Jack Vandervoort, and his brother-in-law Leen Bydevate flew to Holland last Wednesday.

The previous week word had been received of the death of Mrs. Vandervoort and baby Jackie and her parents, whom they were visiting in the flood.

ROYAL ARCH DEGREE FOR FOUR ORANGEMEN

On Tuesday at the Oddfellows Hall, four candidates were advanced to the Royal Arch degree at a meeting of Royal Oak Orange Lodge.

The work was exemplified by the Georgetown lodge, assisted by a number of past county masters. Visitors from Acton, Hornby, Milton and Caledon were welcomed by the Worshipful Master, Ernie Rawson.

After the degree work, a hot dinner was served under direction of Wor. Bro. David Bowman's entertainment committee.

LIONS JAMBOREE SATURDAY

There is keen interest in the Lions Jamboree Saturday. It is the first time in several years that people have had an opportunity of skating to the Lorne Scots Band and this, with races, costume, prizes, and a hockey game???, should provide a full evening's entertainment.

This service club deserves everyone's wholehearted support, as the proceeds are always used for child welfare.

High Price Of Tin Causes Pocketbook Pain

Ancient metallurgists called tin "Diabolus metallorum" — devil among metals. Uncle Sam, suffering a sharp pain in the pocketbook because of tin, is apt to agree.

For pens and cans and bottle caps, for bells and books and tooth-paste tubes, America depends almost entirely upon far-away mines and miners. This country has next to no tin of its own. Yet its industries swallow nearly half of the world's total output each year.

Since the Korean war began, the price of tin on the world market has taken a hitch on a skyrocket. It has soared to the highest level in history, nearly two and a half times its value of eight months ago. Amid congressional charges of international price gouging, wartime controls have been reimposed on U.S. buying of tin.

Southeast Asia, ridged by tin-bearing mountains which sweep from Burma, Thailand and Malaya to the Indonesian islands, is the world's major tin source.

Who Controls Rice Supply Controls Asiatic Supply

Rice is the most important food in the world.

To many Americans, that statement seems a gross exaggeration—but to most of the peoples of the world, it is simply a statement of fact which has been true throughout the entire history of civilization—and is just as true today.

Rice is today, as it has always been, the basic food of more than half of the world's population. In the Orient, rice is virtually the only food of millions of people—their means of sustaining life.

The supply of rice is a matter of life or death for millions of people. He, who controls the supply of rice, will control the destiny of the entire Asiatic orbit. The most important thing to the majority of the people of Asia is not Democracy, nor Communism, nor any political ideology—but food, which means life itself. And in most of Asia, food is rice.

Store Bread in Refrigerator

Is bread likely to dry out if kept in a refrigerator instead of on a pantry shelf? The primary reason for storing bread in a refrigerator is to retard or prevent mold, of which the rate of growth increases with temperature. With normal load conditions, the relative humidity in a convenient electric refrigerator is around 40 to 50 per cent. Probably the pantry shelf is seldom much higher than that, and generally it is lower, so refrigerator storage would not be likely to dry the bread more quickly.

Crocodile Worship

The crocodile was worshipped in some parts of ancient Egypt and despised as evil in others—a fact leading to serious feuds between neighboring towns. El Faiyum, 52 miles south of Cairo, is but one of several sites once known as Crocodilopolis—City of Crocodiles. In some places where they were worshipped they were feed bread, meat, and wine, and their numbers increased so that "it was not safe for anyone to wash his feet or draw water at the river without extreme caution."

Motorists' Direct Cops

Motorists direct the traffic cops in Belgrade and other cities of Yugoslavia. Approaching a traffic officer on duty, they signal their intentions by horn—one toot to continue straight, two for a right turn, three for a left. Instantly the policeman wheels and points the way with a white gloved flourish. Not recommended for New York or Chicago, the method works in Belgrade because motorists are so few.

Time Forgot Morocco

French Morocco, North African gateway to ancient lands of the Arabian Nights, in many ways is a land which time and change forgot. Tribes in the remote Moroccan mountains still regard the camera as an instrument of the devil, fiendishly designed to capture and imprison men's souls. Nonbelievers may walk into a temple in Peiping or Calcutta, but still not into a mosque in Marrakech.

Korean Cats

In mountain-crumpled Korea roam some of the world's biggest cats, immigrants from Siberian forests to the north. Occasionally measuring 12 feet from nose to tail, tip, the Korean tiger is far longer than the lion, with a shaggier, more luxuriant coat than his tropical cousin, the Bengal tiger. Siberian tigers have been known to prowl down from the mountains to Seoul itself, carrying off human victims from the suburbs of the South Korean capital.

Good Fruits

The sour cherry is one of the best fruit trees for planting. It is highly important that the trees be planted early in the spring. The trees don't survive satisfactorily if transplanted after growth begins. Early Richmond and Montmorency are old varieties but still the most satisfactory. The insects which cause wormy cherries can be controlled by permitting poultry to run among the cherry trees.

Improving Ethiopian Grain With U.N. Aid

FINDING OUT about Ethiopian grain is Michael Miller (center), a Canadian agronomist. Mr. Miller, who is shown with his assistant (left) and an Ethiopian farmer, holding a basket of grain, is a member of a team sent by the U.N. Food and Agriculture Organization to advise Ethiopia on improving its grain crop.
