SOCIAL & PERSONAL

Mrs. Jessie Adams returned to St. Thomas on Monday after spending a few days in town with relatives. Mrs. R. W. Robb is back in town after spending several weeks at Siesta Key, Florida. Mr. E. L. Miller and Mrs. W. J. Rob visited last week at Meadowvale with Mr. and Mrs. T. Rogerson. Mr. and Mrs. J. A. Marshall, L. L. Town, were week-end visitors in town with their daughter Mrs. William Fleming and family.

Mr. and Mrs. Harold McClure returned last week from a motor trip south. They visited at Cleveland en route to Florida. Mrs. Leslie M. Clark, and children David and Pamela are spending a few days this week in Walkerton, with her father, William Anderson. Mr. and Mrs. Don Barrager and Mr. and Mrs. Vern Archer were away part of last week on a motor trip which took them through parts of Pennsylvania and Ohio, and home via Dresden where they visited with Mr. and Mrs. Spence McKinnon.

Miss Jean Adams of the staff of Meyer Memorial Hospital, has returned to Buffalo after spending two weeks in town with her mother, Mrs. Annie Adams. Mr. and Mrs. Harold Cleave, who spent the past month in St. Petersburg, Florida, are home again. They returned via Alabama where they visited with relatives. To celebrate her tenth birthday April 1st, Betty, daughter of Mr. and Mrs. Oliver Carey had a party at her home. Her guests were Sharon Swartz, Davis Mackenzie, Karen Iteve, Phillipine McDonald, Heather Lealg, Barbara Avery, Robert Wigglesworth, Klaurtje Yantervoort, Elaine King and her brother Bob and sister Linda.

ONTARIO CCF LEADER TO SPEAK HERE

Ontario leader of the CCF party Donald C. MacDonald will visit Georgetown next week to speak at a meeting sponsored by the local organization in the Legion Hall.

Beaty Jersey Awarded Gold Medal Certificate

One of the leading Jersey herds in Canada is that owned by Maurice C. Beaty at Milton, Ontario. For several years there was at the head of this herd the internationally famous Superior Sire, Hampton Basil Ward, who did much to bring the Beaty herd to the fore.

One of the daughters of Basil Ward has recently been awarded a Gold Medal certificate by the Canadian Jersey Cattle Club. Lindale Basil Gamboze 2nd, went on test as junior 3 year old, and in 365 days produced 10,548 lbs. of milk, 723 lbs. of fat, with an average test of 6.84 per cent.

FARM NEWS

SELF FEEDING OF HOGS PRACTICAL

Two beliefs held by some hog breeders were recently dispelled when W. P. Watson, Ontario Live Stock Commissioner and Chairman of the Advanced Registry Test Station Board, reported that tests conducted at the Waterloo Pig Testing Station last year showed that self-feeding of pigs did not necessarily result in over-fat carcasses and that feed consumption per pound of gain was if anything somewhat lower than by hand feeding.

It was also revealed that not only had tests brought out these two important facts, but in addition, pigs fed by the self-feeder method had been marketed one month earlier than those fed by hand in 1952.

A ration containing about 16 per cent protein is fed until the pigs average 100 lbs. then the ration is changed to one containing about 14 per cent protein, stated Mr. Watson. "Although self-feeding has been condemned on the grounds that it tends to produce pigs carrying too much fat, such criticism is scarcely justified on the basis of the 1953 results at the Pig Testing Station. As a matter of fact, 444 or 69.7 per cent of the 636 pigs that completed the test qualified for A grade. During that same period only 32.2 per cent of Ontario's market hogs were classified in the top grade. Our readers will also be interested to learn that at the test station under the self-feeding method, one pound of gain was produced with 3.5 pounds of feed; this marks the highest rate of feed efficiency obtained in any year since the station was established.

"Despite the fact that Ontario's pure bred pigs make a very creditable showing when subjected to the A. B. test, two weaknesses were exposed upon analysis of the carcass," stated Mr. Watson. The two factors were length and back fat. Since these characteristics are inherited breeders should select additions to their breeds from strains that have high scores for length and back fat.

FARM NEWS

HOG PRODUCERS VISIT CITY PACKING PLANT

Sixty Halton producers with president Clayton May in charge, spent a profitable five and a half hours at Canada Packers plant in Toronto on Friday. The group had the opportunity of discussing classes and groups of live hogs, and later of seeing the same hogs on the rail. They also had the opportunity of following the hogs through the various steps from the killing floor to the cutting demonstration of two sides, one from an A carcass, and the other from a B or C carcass, -- both cut into the four main domestic cuts.

The 70.25 pound side from an A hog yielded 83 lbs. of saleable meat, against 59.45 lbs. of saleable meat from the 70.75 pound side from the over finished carcass. The moral of the demonstration is "Why put over finish on our hogs?" -- fat which at wholesale prices is only worth from 8 to 11 cents per pound -- fat which decreases the quality and resulting value of the domestic cuts over the local butcher shop counter!

A week this Friday, April 16, will be Good Friday. This is the best public holiday.
