

GLEN WILLIAMS

**NORTHERN FAMILY
BACK IN ENGLAND**

Residents of Glen Williams for the past year, Mr. and Mrs. Michael Northern and family left on Monday to return to England.

During their stay in Canada, Mr. Northern was employed at Smith & Stone, Ltd. Son Michael was in Grade 9B at Georgetown High School and Richard was in Grade 7 at Glen Williams school. The Northerns also have a small daughter Gilliane.

The house owned by Tom Haines which they rented in the Glen will be occupied by Mr. and Mrs. Armitage and family. Mr. Armitage is employed at the Malton Avro plant.

The first airplane flight across Canada was in 1920.

A scene from the children's classic field which is playing a three day engagement of the local Roxy Theatre the latter part of this week.

FARM NEWS

**ARMY WORM DAMAGE
NOT TOO SERIOUS**

At the end of last week no very serious damage had been done by the Army Worms in Halton. A few farmers found it advisable to use the poison bran bait. Bruce Reid of Norval, one of those who had a badly infested field, reports plenty of dead worms the day following the broadcasting of the bait. This week the danger of further damage appeared to be past.

The majority of the fields of spring grain are now too mature to be very attractive to the Army Worm, but corn fields should be watched carefully. In most cases the Army Worm hides in the day time and does most of his work and travelling after sun down. In the case of corn fields, which adjoin badly infested grain fields, it might be advisable to plow a furrow along side the corn field and distribute poison bait in the furrow. Fresh bait should be put out every second day at least. Once Army Worms get into a corn field, poison bait is not very effective and it is a question of using a DDT dust or spray and this is more costly and difficult to apply. It is now at least two weeks since the Army Worm outbreak and if they behave in a normal fashion it is about time for time to go into the pupa stage.

FARM NEWS

**CNE HERD ENTRIES
HOLSTEINS, JERSEYS**

Halton will again be well represented in the Holstein and Jersey Breed Shows at the 1954 Canadian National Exhibition. In addition to the individual classes Halton will have an entry in the Holstein County Herd Class and also in that of the Jersey County Herd. In 1953 Halton placed second in both these herd classes and Halton breeders are out to at least maintain their standing when the ribbons are being handed out at the Coliseum on September 2nd and 3rd. There is some uncertainty as to whether or not the Halton and Peel Guernsey Club will make an entry this year.

FARM NEWS

**EXCELLENT MEETING
AT MALDEN FARM**

Halton's 4-H Beef and Dual Purpose Calf Club members met on Thursday evening at Malden Farm, where the manager, Jim McKay, brought out two excellent classes of Aberdeen Angus. Art Bennett, associate agricultural representative, assisted by club leaders Sandy Buchanan and John Willmott, was in charge of the program. Interested visitors included Harold White, secretary of the Canadian Shorthorn Breeders Association, and Bob Kohler, well known Angus breeder of Meadowvale. Lynne Coulter expressed the appreciation of his fellow-club members to the McKays and through them to Dr. Wm. James, owner of Malden Farm.

**GOLF CLUB PRO
IN TWO TOURNEYS**

Larry Edwards, North Halton Golf Club pro, entered two recent tournaments and gave a good account of himself, though he didn't bring home the prize money. In the Lakeshore Open at Rochester, N.Y. he tied for 4th place among the professionals. The winner was Bob Burns of Cherry Hill, Golf Club, Niagara, Ont. Last week, Larry played in the Miller Trophy at Islington, match play for Ontario professionals which was won for the second year by Gordie Brydson of Mississauga.

Canadian public libraries carry 6,800,000 books.

**Important Notice
to all
SHORN SHEEP:**

OUR OVINE FRIENDS will be glad to know that in future they may be spared the undignified and chilly experience of being sheared of their wool to keep us warm. A new lightweight lining material for men's and women's clothes combines fabric and aluminum to give more than three times the insulating value of a similar weight of wool cloth.

Humans, too, will be glad if this hastens the end of heavy, bulky winter wear. The material can be dry-cleaned, draped well and is sufficiently porous to let the body "breathe". Just one more example of the way Canadian manufacturers are combining aluminum and imagination for better, easier living. Aluplume Company of Canada, Ltd. (Alcan).

FAMOUS LAST WORDS

"I don't sunburn easily" now belongs to the Famous Last Words category as far as N&G lacrosse star, Junior Beaumont is concerned. After a recent game at Lewiston, Junior stopped at the Curuso cottage for some fishing, and uttered his history-making sentence as he embarked by boat on a beautiful sunny day for the sport.

The result — so many blisters that he missed a couple of days work and still is on the lacrosse sidelines until he develops some new skin to replace the charred areas.

FARM NEWS

**Recommend Prices for
Fall Sown Wheat**

The Seed Marketing and Publicity Committee of the Soil and Crop Improvement Association recently suggested the following minimum prices for the fall of 1954:

Winter Wheat, No. 1 Seed, \$1.80 per bushel, Reg. 1 Seed, \$2.00 per bushel, Reg. 1 Genesee, \$2.15 per bus., Rye, No. 1 Seed, \$1.40 per bus.

These prices are recommended for retail sales f.o.b. farm or shipping point bags included and treated.

This year, all wheat in order to be eligible for registration, must have a clean reading for Dwarf Bunt, both in field inspection and in a microscopic test of the sample. There is no known treatment for Dwarf Bunt, which once introduced into a field, the organism is carried over in the soil. As yet, we have not heard of any Dwarf Bunt being found in Halton.

In addition to Dwarf Bunt, there are the other two types of smut, Loose Smut and Stinking Smut or Bunt. All farmers are familiar with the latter type, which in the days of inside threshing, on occasions, made the job of threshing a real headache.

Fortunately treatment with one of the mercuric dusts or liquids will control this and no one should sow seed without treatment. In the case of loose smut, there is a hot water treatment but this is not very practical and consequently the solution is to sow seed free of the disease.

The newer varieties, namely, Cornell, Dawbul and Genesee are all resistant to the disease.

Dr. Don Huntley, head of the Department of Field Husbandry, Ontario Agricultural College, when addressing the large group which took in the twilight tour held in mid July, to Dr. Wm. James and J. H. Willmott and Son farms, stated "There is not too much difference between Cornell 595, Dawbul and Genesee varieties and I have no hesitation in recommending all three."
