

LIONS FINANCIAL STATEMENT SHOWS YEAR'S SERVICE WORK

August, 1954

The People of Georgetown and District:

A Lions Club is a service club, existing to perform service to the community and help make it a better place to live. It draws its strength both from the members and the support given by the public. We are grateful to all of you who backed our enterprises during the season of 1953-54 and thank you heartily.

We are publishing here the two financial statements of the year. You will note that the funds to operate the club are quite separate from any money raised from the public. You will also see that the Lions themselves pay all expenses so that every dollar raised in an activity goes into a separate fund which eventually goes back to the people.

Again we would like to thank you for your support.

Yours Sincerely,

Georgetown Lions Club
Jack Gunning, President, 1953-54

ACTIVITIES ACCOUNT

RECEIPTS	
Bank Balance	\$ 1846.83
Bonds	1000.00
Net profits from carnivals, etc.	804.59
Peanut Day	500.00
	\$ 4151.42

Sundries	55.60
Bank bal., June 30, 1954	79.84
	\$ 984.94

SILVER-WOOD

Township Clerk Recalls Esqueasing Pioneer Days

Pioneer days in Halton County and Esqueasing Township makes a very interesting subject and K. C. Lindsay gave a talk to the ladies of the Silver-Wood Women's Institute on Thursday, August 12th, at the home of Mrs. George Henderson which made them all glad they are living in 1954 instead of 1854.

In the summer months, there isn't very much business to discuss, and after welcoming visitors, Mrs. R. H. Corbett, the president, asked Mrs. John Glynn for a report on the progress of the work being done by the Stone School Association. The ground is being levelled and the shed being renovated. Mrs. George Hart, Historical Research convenor was in charge of the meeting and called upon Mrs. Don Lindsay for current events and Mrs. A. McClure for the motto "History repeats itself." Mrs. McClure spoke cleverly on the everyday things which are constantly repeated, even to the Institute meetings making history from month to month throughout the year. An article on the flower of the month, the Gladiolus, was read by Mrs. George Henderson, Jr. Hostesses with Mrs. Henderson were Mrs. F. L. Ruddell and Mrs. D. Lindsay. The next meeting has been changed, and will be held at the home of Mrs. Don Lindsay.

Visiting Mr. Ben Case for a few days is Mr. Clyde Teasdale of Nova Scotia.

Beetles, Skunks, Birds Cause ?*? - Angry Words

Many residents are complaining of damage to lawns and flowers this year from the larva of the June beetle.

Early each summer the adult June beetle lays its eggs, whenever possible in lush green sod and the larva, an inch long soft white grub gorges itself on grass and flower roots. Besides the damage which the grub does, there is just as much from birds and animals which consider it a tasty delicacy.

Skunks are abroad every night, burrowing for their midnight snack and leaving sod uprooted. In the daytime robins and starlings can be seen drilling into the lawns for they too are June bug fanciers.

The bugs seem to come in three year cycles. The last peak cycle in this area was in 1951.

Put your soil to work through the "Off Season"

With the season of cropping now finished, you have depleted your soil of a great amount of minerals and plant food. Your soil organisms can restore this loss in the "off season" if you provide the necessary organic matter for conversion to plant food.

Plow under method
Six tons of hay or straw per acre "turned in" with AERO Cyanamid adds organic matter equal to 20 tons of average manure. Your field trash is extremely valuable in building soil—put it to work now with AERO Cyanamid to promote rapid decomposition and plow under for soil organisms to work on through the off season.

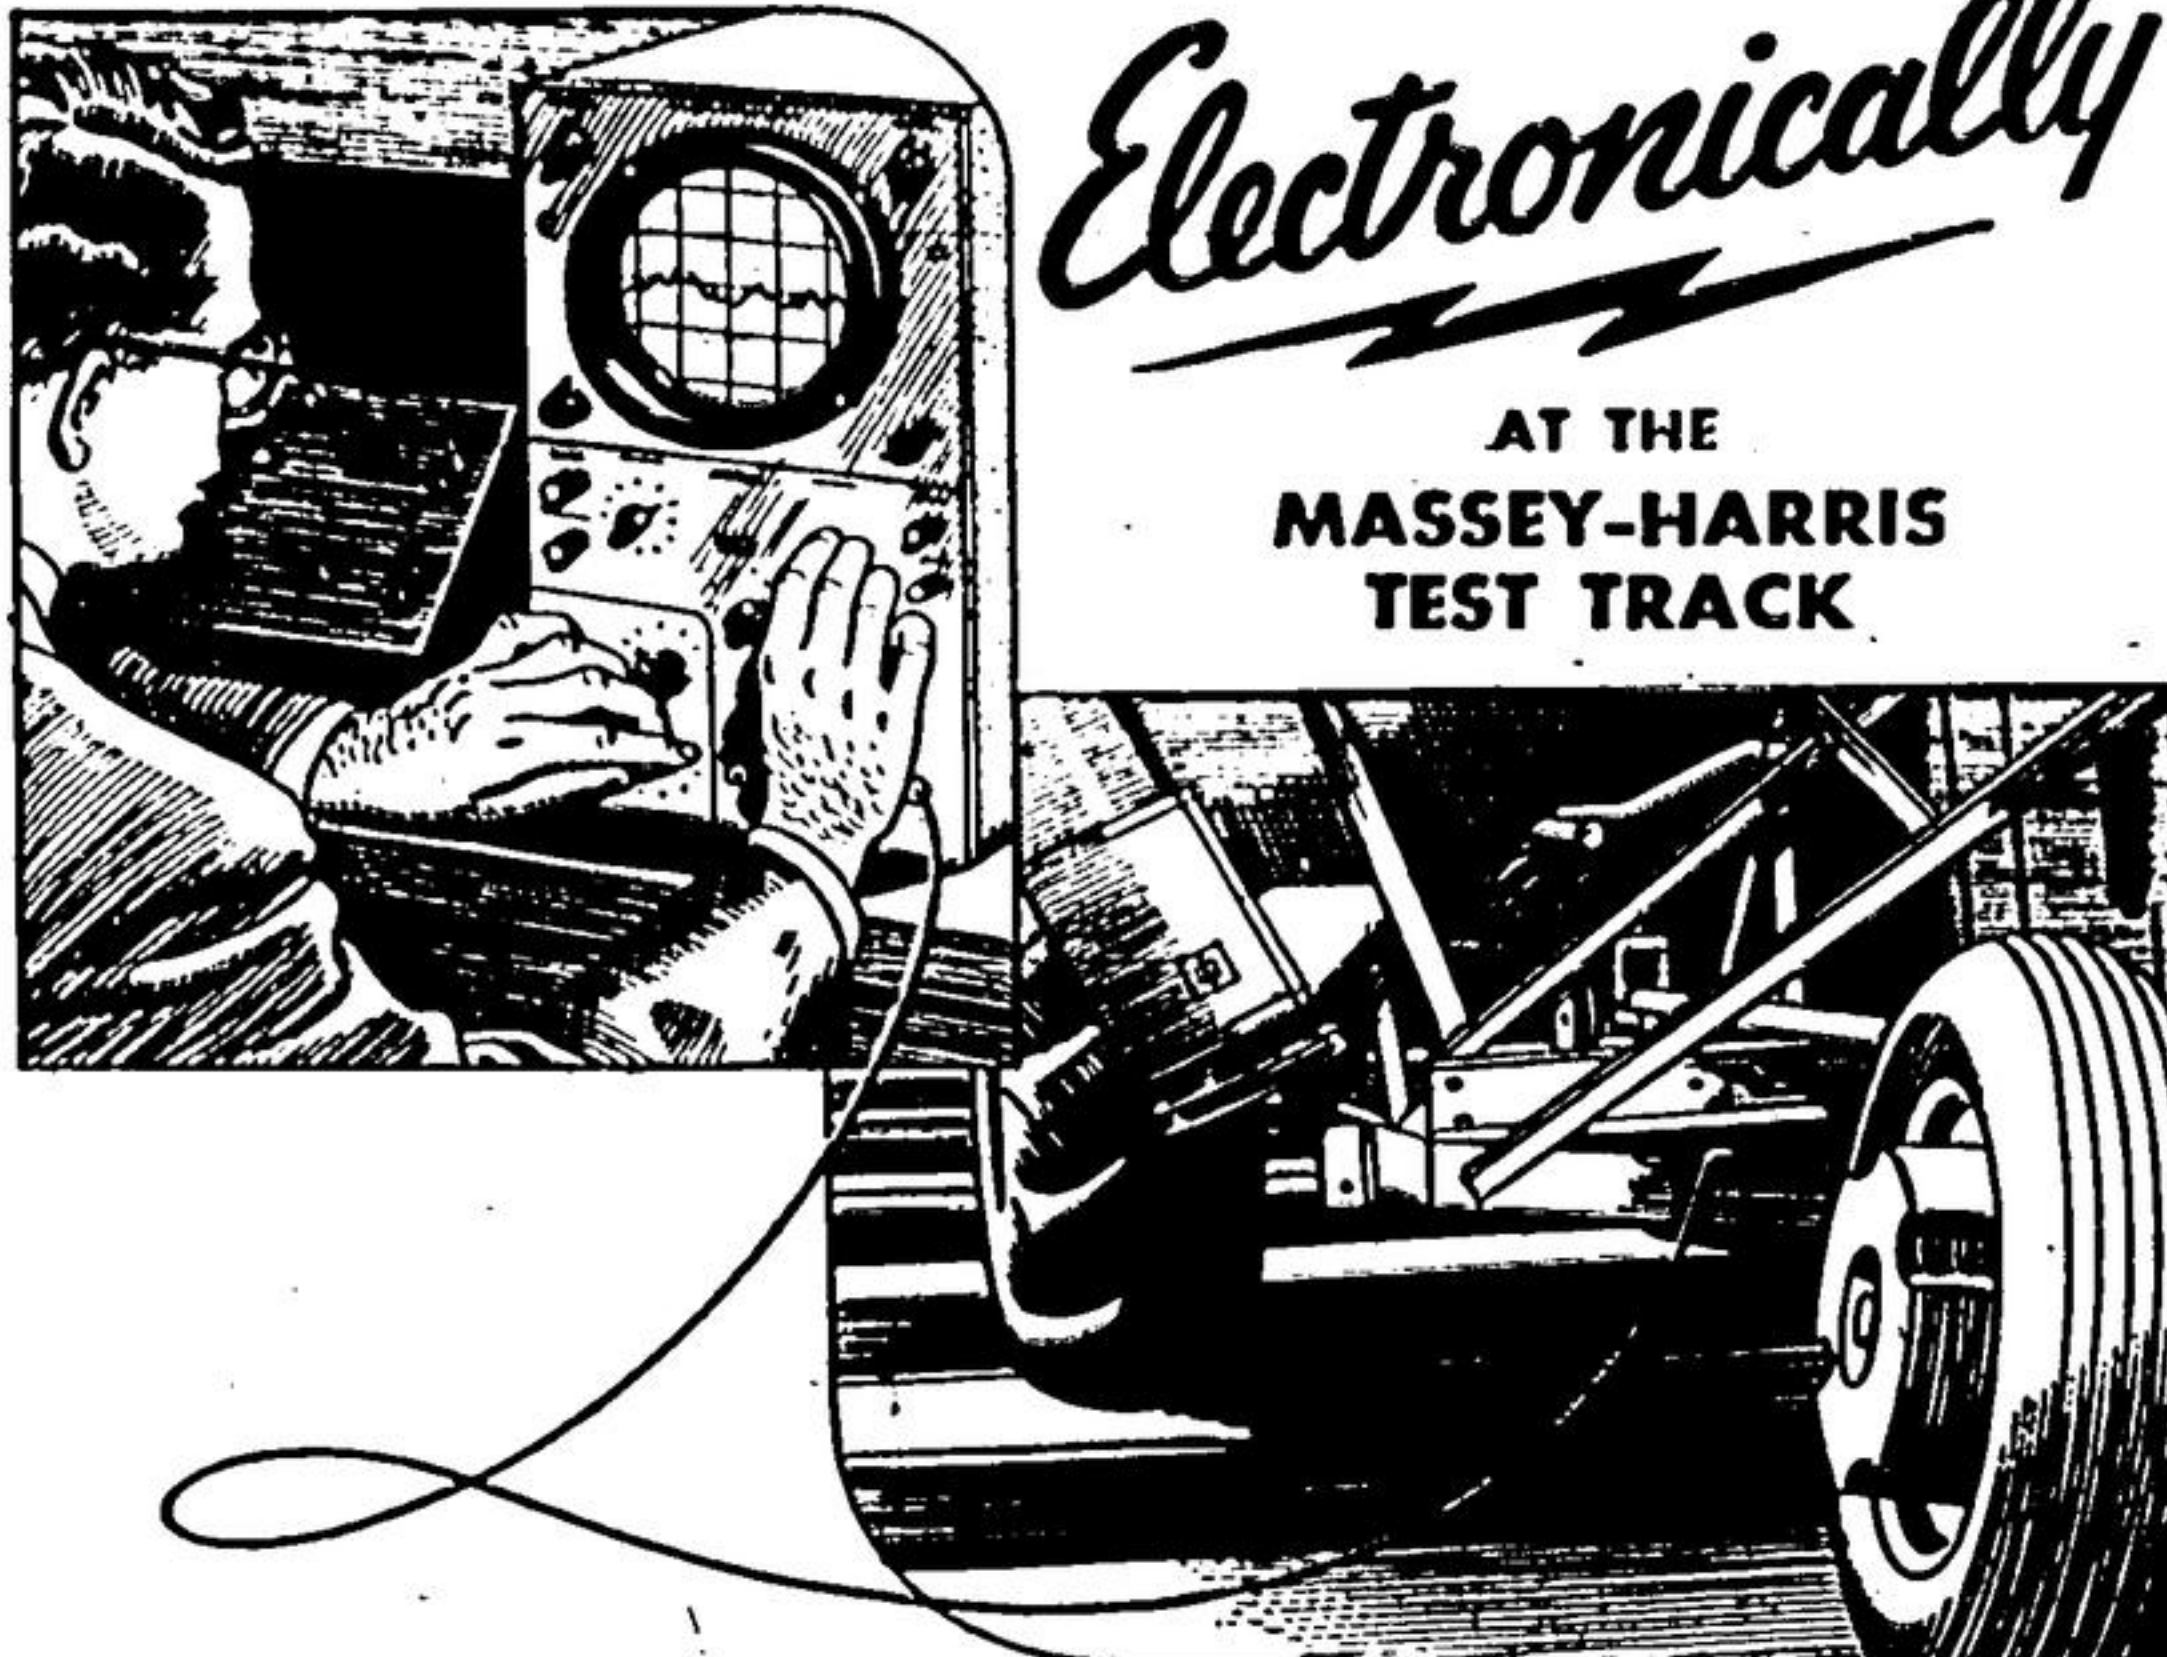

Orchards
Now is the time to build up a nitrogen supply for your fruit trees. Nitrogen, the major requirement in orchards, can be supplied by slow acting AERO Cyanamid either broadcast or turned in with green manure or trash. Heavy cropping depletes nitrogen and now is the time to return it to the root systems to boost early Spring growth.

Get AERO Cyanamid at your local farm supply DEALER now

GETTING THE INSIDE STORY

Electronically

AT THE MASSEY-HARRIS TEST TRACK

As Massey-Harris machines go "over the bumps" on the test track, the inside story of strains and stresses set up in frame members and working parts is recorded by special electronic apparatus.

Modern "stress analysis" with scientific apparatus gives Massey-Harris engineers information helpful in the development of machines that will give long wear with low upkeep cost.

In design and construction Massey-Harris machines offer the latest developments in modern engineering and research, bringing advantages that enable work to be done easier, quicker and at less cost.
