## URBAN BOARD PLANS TRADE FAIR EXHIBIT

Further plans were made for the exhibit of North Halton at the International Trade Fair when the North Halton Urban Board met for its inaugural meeting in Milton last week.

Chairman Jack Armstrong expressed his appreciation for the cooperation during the last year. E. Tyler Acton, was appointed to the position for 1955. Mayor Tyler expressed his hope that the accomplishments of the board could be continued.

The secretary, J. McGeachie, was authorized by the board to complete the necessary contracts with the Trade Fair for the industrial promotion booth at the fair on May 30th, including payment of the balance of \$225 for the booth space, \$15 for the cleaning service and \$11.75 for rental of a six foot counter.

Decoration of the booth was discussed and the services of the professional decorating firms to be investigated as to price and style.

The proof submission of the Dilla Printing & Publishing Co. on the brochures for distribution at the Trade Fair was approved with minor changes. The purpose of the brochure as an attraction piece was emphasized and the problems of referring contacts between various town representatives to others was considered.

Known expenditures totalled \$6000, the treasurer reported, pointing to a present overdraft of \$185.05. A resolution was approved that each municipality be asked for a budgeted allowance of \$2,500, with payment of \$1,000 to carry the present expenses and the balance by June 1st.

Compensation coverage for the engineer, Ross Simmons, was to be investigated and discussed at the next meeting.

By resolution the salary of the engineer was increased at the rate of \$300 per year.

Mr. Simmons asked if the break down of time spent in each town was still required and members suggested the breakdown would not require as much detail if a record of the projects was retained for the information of future boards.

Three memberships were approved for the engineer in the American Waterworks Association, the Canadian Institute on Sewage and Sanitation and the City Engineer's Association.

Reporting to the board, the engineer urged councils to call him in during the early stages of discussion to receive the full benefit in economies and other recommendations of his engineering services. He also suggested broader discussion at the board meetings, with respect to specific jobs, for the enlightenment of all members.

Considerable discussion followed on the suggestion of necessary staff increases to put the plans and documents of each of the municipalities in good order and to then keep up with the continuing expansion in the three centres. Staff increases, the engineer suggested, should include a full time assistant and a summer student.

Mr. Simmons said he felt there was sufficient drafting to keep a draftsman going full time for an indefinite period. He pointed out he was serving a population equal to Brampton, where a staff of five is employed.

Further reviewing the budget, it was pointed out an expenditure of \$4,000 to \$5,000 on the part of each town would be required for engineering services.

Members voiced unanimous complaints about the recent drastic cut being made in road grants by the Ontario Department of Highways. Each town reported an amount on which grants were receivable as set at \$25,000 where most of the three towns had almost doubled that amount this year. The individual action of each town was considered toward increases in the grants payable.

The next meeting of the board was set for February 8 in Georgetown.

### NORVAL

#### Dies in Washington During Business Trip

Member of one of Norval's oldest families, George E. Gollop, 60, died suddenly in his hotel room in Washington, D.C. early Saturday morning.

Mr. Gollop, who had been visiting for five weeks with his father in Norval, left last Monday on a business trip to the States. He had lunch with a relative Miss Irene Maguire that day and had phoned his wife in Montreal that evening only a few hours before his death.

A chemist with Du Pont, of Canada, Mr. Gollop retired on December 1st, concluding more than 33 years' service with this and predecessor companies.

Born in Toronto, Mr. Gollop received his early education at North Bend, Nebraska, and returned to Canada to attend the University of Toronto where he obtained a B.A. degree in Chemistry and Mineralogy.

Prior to joining the Canadian Salt Co. at Windsor in 1921, he worked for the Pennsylvania Salt Manufacturing Co. for seven years in the States.

During his service with the company he was for four years engaged in the production of alkali-chlorine products and later was sales manager for Windsor Salt for ten years. He was transferred to Montreal in 1935, and had held various managerial positions, served as foreign relations committee secretary, also in charge of Newfoundland sales office and was appointed special assistant to Herbert H. Lank in 1951. He joined the research and development department in 1954.

Mr. Gollop had planned to spend his retirement years as a writer and was working on an assignment for publication on "The Current Position of the Chemical Industry in Canada."

Mr. Gollop had been active in several organizations. He was a Fellow of the Chemical Institute of Canada and a member of the following: Chemical Market Research Association (USA), Vice President, 1947-48, Commercial Chemical Industry (Past Chairman, Montreal Section); University of Toronto Alumni Association (President, Montreal Branch, 1949), The Engineers Club of Montreal, Marlborough Golf and Country Club, Connaught Lodge, No. 111, AP & AM, GRQ.

He is survived by his wife, who was Nancy Brooks of Philadelphia, and his father, 94-year-old W. George Gollop, oldest resident of Norval.

A funeral service in Norval this afternoon at the home of Miss Prairie Maguire followed an earlier service Tuesday afternoon in Montreal. He was buried in Hillcrest Cemetery, Norval.

#### Funeral in Georgetown For Cheltenham Farmer

A district resident all his life, Thomas Henry Soper, 84, was buried in Cheltenham Cemetery last Wednesday following a funeral service at the McClure Funeral Home, in town. He died the previous Sunday in Peel Memorial Hospital, in Brampton.

Mr. Soper, who was the son of John and Mary Elizabeth Dixon Soper was born at Sand Hill in Peel County. He attended Grahamsville School. He farmed for 35 years at Cheltenham and had lived in Georgetown since his retirement 14 years ago. He was a member of the United Church.

He is survived by his wife Maude Weatherall and four children: Cecil of Georgetown, Gordon of Cheltenham, Norma, Mrs. Richard Forster of Georgetown, and Clifford at home. There are four grandchildren, Ethel, Jean and Linda Soper of Cheltenham and Richard Forster, Jr. of Georgetown.

He was predeceased by a daughter Pearl in 1920. Last member of his family, he was also predeceased by three brothers and a sister, Will Soper of Weston, who died last March, Mike of Alberta, Joe of Weston and Mrs. George McLaughlin of Grahamsville.

Rev. Morgan McFarlane conducted the funeral service and pallbearers were Joe Soper, Weston, and Bill Soper, Woodbridge, Leslie Soper, Thistleton, Clarence and Norman McLaughlin, Weston, all-nephews of the deceased.

## Milliere Television

7th Year in Television in Georgetown

### Engineered by C.B.S.

Just what does engineered by CBS mean to you?

1. CBS Television has continued to concentrate its greatest energies in creative network programming, and because of this, has become America's No. 1 network.
2. The majority of the Nation's Top Ten television programs are presented by CBS Television: "I Love Lucy," "The Jack Benny Show," "My Favourite Husband," etc.
3. Climaxing the progress of black and white television was the announcement that CBS Television had perfected colour television... as CBS again demonstrated its leadership in the industry.
4. The best-selling sound was produced by another CBS Division: Columbia Records, with the introduction of the new Hi-Fi playing records, and the equally fabulous "360" high fidelity phonograph.
5. Now with the background of leadership in these fields, it was only natural that CBS should design a line of Television receivers "engineered" to receive their broadcasts. Thus CBS introduced their "360" sound system to give the customers CBS Full Fidelity TV Sets.
