New SWEETENED SUCKLING PIG RATION

gives fast, economical gains

The twelve pigs, littermates, photographed at 56 days weighed 612 pounds, an average of 51 lbs. per pig. Started on Pioneer Sweetened Suckling Pig pellets at two weeks, they had consumed an average of 50 lbs. of food per pig.

A controlled test with three litters on six uniformly divided groups of weaner pigs demonstrated a preference of 10 to 1 in favour of Pioneer Sweetened Suckling Pig pellets. Pioneer Sweetened Suckling Pig pellets start baby pigs to eat early in life, and make possible fast uniform gains in weight. Weaning is no problem any time after four weeks if pigs are eating well.

Rapid early growth is always the most profitable—less feed is required per pound gain.

Give your next litter of pigs a palatable nutritionally balanced ration—Pioneer Sweetened Suckling Pig pellets.

Profit 5.2c on Dollar Sale Says CMA Official

Profits on each dollar of sales in Canadian manufacturing industry during 1954 averaged only 5.2 cents, D. G. Currie, of Montreal, chairman of the education committee of the Canadian Manufacturers' Association, reported today.

This figure was exactly the same as 1953's profit, but two-tenths of a cent more than the 1952 figure. Mr. Currie's report was based on a national survey of the breakdown of industry's sales dollar, conducted by the Association's Education Department, and published in a booklet entitled, "Harvest of Enterprise." This illustrated booklet, which contains in table form the sales dollar breakdown for the years 1951-54, also deals with the need for profits to ensure an expanding Canadian economy and maintain a high level of employment.

The survey, which took more than two months to complete, broke down profits even further by showing that 24 cents of the 1954 sales dollar profit of 5.2 cents was paid out in dividends, while 2.8 cents was retained in the business. These figures compared with 23 cents paid out in dividends and 2.9 cents ploughed back into the business of the 5.2 cents profit on the 1953 sales dollar.

The authority of the survey was proven by the fact that the 1,100 CMA members responding to the questionnaire accounted for net sales of more than seven billion dollars, a figure equal to nearly a third of Canada's gross national product.

"These CMA surveys began seven years ago," Mr. Currie said, "and were aimed at discovering the true facts surrounding manufacturers' profits. The public, according to public opinion surveys, has always believed manufacturing profits were far higher than they actually are. Our findings over a period of seven years have proven conclusively that profits are barely half what the public thought a fair profit should be."

The first survey we did covering 1948, showed a profit of 6.2 cents. The following year it dropped to 5.8 cents. In 1950, a year marked by lower corporate income taxes than 1951, profits jumped to 7.1 cents. In 1951, even though net sales of companies responding to our national questionnaire were a shade over five billion dollars, taxes of all kinds were higher and the sales dollar profit dropped back to 5.8 cents, the same as in 1949. In 1952 the figure again dropped, this time to 5.0 cents.

Mr. Currie explained how the profit figures were obtained.

Members were asked to state in a questionnaire what money they received during their last fiscal year, from both sales and other sources," he said. "This questionnaire also asked members to say how they had spent that money, how much for materials, how much for wages, how much for taxes and how much for other expenses. We asked them what they did with what they had left, how much was paid out in dividends and how much was kept for plant improvement and expansion."

Dairymen Budget \$400,000 Dollars for National Advertising

With Ontario on a new basis of contribution in 1955, Dairy Farmers of Canada national advertising budget should be better than \$400,000 in 1956, states Erle Kitchen, secretary, manager of the national organization. Previously the best national total set aside by producers was \$365,000 in 1953.

The new basis of Ontario contribution to the national advertising budget is tied in with the central fund recently announced by Ontario producers to start August 1st. The Ontario fund to be contributed by all dairy producers in Ontario is a self-help program designed to advertise milk and milk products, conduct market research and move surplus product if such action be necessary. The Ontario producer groups will pay out of this fund, an amount equal to the June set-aside potential, into the national advertising budget. In order to avoid duplication of two collections, the June set-aside, as previously conducted in Ontario, has been abandoned this year, states Mr. Kitchen. All purchasers of milk and cream have been notified accordingly.

The new basis of participation in the national program will insure that Ontario producers more nearly carry their share of the national budget than has been the case in the past. In 1954 all English provinces which made the set-aside provided nearly 100 per cent of their potential while Ontario, with a potential of \$200,000, raised \$141,000. In all provinces outside Ontario the old system of June advertising set-aside will prevail, according to Mr. Kitchen.

HORNBY CHURCH HOLDS SERVICE AT HALTON MANOR

The Sunday afternoon service of the Victoria Day weekend was an especially enjoyable event at Halton Centennial Manor, when Ian Williams, pastor of the Hornby United Church, and a choir of 16 young girls and boys came to conduct the service. Mr. Williams delivered a very thoughtful sermon on the 15th verse of the 50th Psalm.

The choir, led by their choir-master, Mr. Carman Cantelon, who also accompanied them on the piano sang two beautiful anthems, "Soft and Low" and "When I survey the Wondrous Cross." Mrs. Harold Leamont sang a solo "Good night and Good morning."
