Support is Swinging To CCF Says Allen

Stan Allen, CCF candidate for Halton, expressed confidence in the outcome of the election, speaking at a meeting in the Union Hall at Oakville. He said it was evident that support was forthcoming from people who had not previously voted for the CCF.

He compared the recent budgets of the Ontario Conservative and the Saskatchewan CCF governments and said they offered an interesting contrast in public programmes. "In Saskatchewan, the CCF government has maintained a balance in expenditures. The roads program isn't neglected, but it isn't permitted to crowd out other important social needs.

The supplementary pension for old age pensioners was doubled and is now \$20.00 per month; mother's allowances were increased; rates in government-sponsored auto insurance were cut approximately 25 per cent; the public debt was further reduced. He pointed out all this was done with no election in the offing and despite a drop of 42 per cent in the province's basic farm income. "Here in Ontario," he continued, "the Conservative Government brings in a completely lopsided budget. It offers nothing to fulfil the 1943 Tory promise of province-wide hospitalization coverage; no increase to old age pensioners; or mother's allowances; nothing to meet the acute housing shortage, and nothing to meet the immediate needs of unemployed or the financial burden they pose for the municipalities."

But it does contain expenditures of over \$200 millions on highways and public works (mostly for highways). This will result in another \$100 million increase to our public debt, which has already been increased tremendously since the Frost government took office. I ask you which government has the needs of the people at heart?"

Mastitis Losses are Ten Million Annually

Halton Milk Producers were out in force at Stewartrtown Hall on Wednesday evening to hear Dr. Norman Fish of the Ontario Veterinary College. Dr. Fish, an old Snyder's Corners resident, spoke on Mastitis and its control.

Mastitis, stated Dr. Fish, is one of our major dairy cattle diseases and causes a loss of between 8 and 10 million dollars annually, in Ontario alone. While antibiotics give some measure of control against the disease, in the final analysis, sanitation with proper milking procedure and good herd management, remain the most effective weapons with which to keep it under control, he stated.

Along with his excellent address Dr. Fish presented two educational films on the subject. Others who spoke briefly included W. H. Wilmut, secretary manager of the Toronto Milk Producers Association, Wm. Hoiles, president of the Ontario Whole Milk Producers' League and Roy Randle, manager of the Co-operative Surplus Milk Plant. The latter along with director Schmidt reported that the plant can and will be a success but we must have a uniform supply of milk. To date we have received as low as 2400 lbs. per day and as high as 180,000 lbs. Mr. Randle reported a good demand for their products including cream for ice cream; casein and skim milk powder. All in all it was an excellent meeting and bouquets are in order for president W. R. Royle and secretary John M. Bird, for the excellent leadership they continue to give the Halton association.

Callumlea Dispersal Successful Sale

On Wednesday evening the well-known Callumlea Guernsey herd of M. T. McNabb and Sons was sold by public auction at the Hays Sales Arena. Some fifty head were sold — twenty of which were cows and balance open heifers and calves. Top price was \$430, paid by the Ontario Agricultural College for one of the good Callumlea show cows.

It is reported that the sale average was around the \$200 mark. Keeping in mind that over half the consignment was calves and yearlings, and also that at this season of the year the demand for milking females is limited, this can be considered a most successful sale.

CONTROL PLOTS SET FOR WILD CARROT

Last week with the cooperation of custom sprayer Medforth Peatress, another series of wild carrot control plots were laid down on the 4th Line of Trafalgar, between the CPR tracks and the Given Road, by the Halton Soil and Crop Improvement Association.

While Wild Carrot is stated by research authorities to be susceptible and easily controlled by 2-4-D, that has not been our experience in Halton under roadside spraying conditions. However, we are optimistic that this year's efforts will bring some interesting results. Some eleven mixtures have been applied, and they should be worth watching.

IT'S FRIDAY THE 1st

Readers would be confused at two small items in last week's Herald indicating two different dates for Dominion Day holiday. The proper date is Friday, July 1st.

Leatherbarrow Farm Bus Trip Highlight

The annual bus trip sponsored by the Halton Soil and Crop Improvement Association has become an established event. Ross Segsworth, president of the Halton Association, says that this year's event is to be a one day effort, and will be held on Monday, June 16th. Present plans call for a visit to the Alfred Leatherbarrow farm near Elora. He was the speaker at the annual meeting of the Halton Association last December. His address, coupled with Mrs. Leatherbarrow's book entitled "Gold in the Grass," has aroused in many the desire to see the Leatherbarrow farm.

From this point the group will jump to the outskirts of the city of Waterloo, where it is expected visits will be made to the Waterloo Artificial Unit, the Swine Testing Station and the farm of Fred Snyder, president of the Holstein Friesian Ass'n of Canada.

Thursday, June 9th is Ontario election day. Remember to vote!

Hello, Daddy! Coming home now?

At the end of the day there's nothing more exciting than Dad's voice to report when he will be home for dinner.

It makes such a big difference to little people who have waited all day for Daddy's voice. It makes a difference to your wife, too — she likes to have some warning when you have been delayed.

This is just one of the countless ways your telephone pays its way as it makes life happier, easier, more secure.
