First naval vessel to circle North America is HMCS Labrador, which recently made its way through polar seas from Atlantic to Pacific. We're proud that the three specially built landing craft she carried to ferry men and supplies to Arctic shore bases were made of welded aluminum — and that they did the job.

Aluminum is active in the patrol and defence of our coasts, lakes and northern waters. So it is good to know that Canada is the world's second largest aluminum supplier with five producing plants in Quebec and British Columbia.
