New Residents of Georgetown

Mr. and Mrs. Jan van Meerveld are new Georgetown residents following their marriage recently in St. Barnabas Church, Toronto. The groom's parents live in Amsterdam, Holland, and the bride, Kathleen Casey is daughter of Mr. and Mrs. J. Casey, London, England. They are pictured with their attendants, Miss Catherine Hanson and Mr. Anton Rimming.

Don't be surprised if one of these days you see a coal truck go by loaded with shining stuff that certainly doesn't look like coal. One big coal company now sprays its anthracite with aluminum paint. Not only makes it cleaner to handle, it burns better, too.

We note, too, that aluminum is involved in another fuel operation—this time in capturing heat from the sun. An aircraft company operates a solar furnace that focuses the sun's rays by means of a 120-inch aluminum reflector to create temperatures up to 8,500 F. It is used to test materials under extreme heat.

ADEQUATE WIRING for Better Electrical Living

Adequate wiring in your home assures convenient, economical electrical living at its best. If you are planning to build a new home, have your local Hydro or your Electrical Contractor explain why it is to your advantage to have sufficient circuits, switches and convenience outlets in order to derive the full benefit from today's many electrical aids to living.

Too often the unsatisfactory operation of electrical appliances is due to inadequate wiring. Many older homes, and some newly built homes, are not wired to efficiently operate more than a few electrical appliances.

Specify "Red Seal" wiring to the standard of The Electric Service League of Ontario, a non-profit organization maintained to assist you with wiring problems. See your local Hydro Manager, or send for the FREE BOOKLET, "Facts About Electrical Wiring For Your Home." Write to: The Electric Service League of Ontario, 4 Carlton Street, Toronto 2.

This Red Seal on the service box is your assurance of an Adequately Wired home.
