

*if you do it with HEAT
you'll do it better with GAS!*

RESIDENTIAL

What is Natural Gas?

Natural gas is a fuel having countless uses in the home, industry and business. Known as "The Modern Miracle Fuel," natural gas was formed millions of years ago. It is found by drilling wells far below the earth's surface and brought direct from the well site to your home, ready for instant use, through a vast network of pipe lines buried underground. While man has harnessed natural gas and reaped the benefits of this wonderful fuel, it was Mother Nature who produced it. There are many scientific explanations, but no one knows exactly how Nature accomplished this miracle.

In ancient China thousands of years ago, natural gas was used industrially as fuel to evaporate salt brine. And it was reported by early travelers to China that the women in certain villages cooked their food over flames which shot from holes in the ground . . . undoubtedly natural gas seepage. First discovered in America in 1821, it took the natural gas industry a century to grow up.

On Monday, December 12th, the citizens of Georgetown will be called upon to decide, by ballot, whether or not they wish to have natural gas distributed in Georgetown. It will provide you, and your community with many advantages. It is you who must decide.

- Natural gas is energy in its most efficient form -
- Natural gas in overall comparison shows up better economically -
- Natural gas can be used just as it comes out of the ground -
- Natural gas gives a tremendous concentration of heat instantly -
- Natural gas creates no storage, delivery, soot or ash problems -
- Natural gas is one of the safest fuels in homes, industry and business -
- Natural gas is the most easily controlled and most efficient fuel -
- Natural gas is essential to the nation's economy and comfort -
- Natural gas industry, as it expands, means more jobs for more people -

... well over 23 million customers in North America can't be wrong!

Because Natural Gas Will . . .

- COOK YOUR FOOD
- REFRIGERATE
- DRY YOUR CLOTHES
- HEAT YOUR HOME
- HEAT WATER
- BURN YOUR GARBAGE

Natural gas is used extensively by industry because it offers instant heat with no warm-up period, precise temperature control and a high degree of efficiency and dependability at low cost.

Better than any other Fuel!

The United Suburban Gas Co. Ltd.

It was during World War II, when German submarines were sinking the oil tankers on a wholesale basis off our shores, that the gas industry stepped in to fill a pressing fuel need. The demand for this premium fuel for home, industry and business has been skyrocketing ever since.
