**E. TETRAULT, D.C.**  
**CONSTIPATION**

A Roman poet living nearly two thousand years ago, prosaically, but understandingly, wrote: "Sickness seizes the body from bad ventilation." That phrase contains more truth than one would think.

Abnormal or imperfect functioning of the intestinal canal is often the first symptom of ill health.

Josh Billings is credited with the unesthetic but practical assertion that of the three, a healthy regularly functioning set of bowels is of more value to a man or woman than a generous supply of brains or a handsome figure. It should not be overlooked, however, that the mind is influenced to an important extent by the body and vice versa.

Consequently I would conclude that brains and bowels are equally essential to health.

This highly modern (artificial) age attaches considerable importance to cleanliness of the skin so that consequently a profusion of cosmetic appliances are being bought to hide coarse, sallow and pimply skin by people who have not learned that beauty is more than skin deep.

Your chiropractor pays particular attention to this common, but important condition.

**SCOUTS TAKE OVER  
CENOTAPH CARE**

Improvements to the grounds surrounding the war memorial on Guelph St. will be made through joint action of the town council and boy scouts.

The town is paying for flowers which the scouts will plant and scouts gave the cenotaph a facelift last week when they cleaned the lettering on the plaque.

Monday, council decided to expend \$100 on flagstones which will replace the present bare patches where attempts to grow grass have been unsuccessful. The scouts will care for the property in future as a civic project.
