Brighter Stars for Drive-in-Viewers

Your favorite movie star's smile
beams three times as clear and
bright from an aluminum screen
recently developed for outdoor
theatres.
The new screen has won the
praise of both audiences and
owners. Little wonder the latter
like it; one operator found his
receipts increased by \$40,000 in
two months after he replaced his
conventional screen with the
highly reflective, weather proof
aluminum job.
And so it goes... Still another
improved product, still another
use for this versatile modern
metal. The result: everybody
gains by production from Canadian
smelters that already ac-
count for a quarter of the world's
primary aluminum.

CANADA, LTD. (ALCAN)**

Peach blossoms in Ontario are just now making their appearance. Although two weeks later than usual, it is not expected that they will affect Ontario's annual crop of approximately 100,000,000 pounds of peaches. To mark the occasion of peach blossom time in Ontario, a blossom festival involving a big parade was recently held in Niagara-on-the-Lake. Representing the Ontario Peach Growers Association in the blossom festival was pretty, eighteen-year-old Jean Myers, U.S.A. National Peach Queen from Kell, Illinois.

STREETSVILLE ORGANIZES CHAMBER OF COMMERCE

Coinciding with the announcement of a 10-unit new residential and industrial construction this year, the formation of The Streetsville and District Chamber of Commerce.

Organization of this branch of the chamber of commerce was announced May 10th. At the first regular meeting on last Wednesday was announced that an initial membership of 50 has been obtained. Plans represented by members include manufacturing, distributing and all types of merchandising organizations in the area. It was reported that the total of members will likely be formed within the next few months.

Officers elected on the organization of the new chamber are: President, Homer Macdonald; Vice President, Frank Furman; Secretary, Mrs. Reg Broadhead; Treasurer, Jack Wright; Bill McLaughlin; Howard Barr; A. S. McNeil; and Harry Jones, directors.

Mr. Macdonald explained that the organization's committee had already met Mr. Macdonald of Graham Bell Ltd., as the first president because of his wide experience in business and manufacturing. It was also mentioned that a chairman of commerce must guide the new unit through its first year of operation.

A year ago last November, said Macdonald, Mr. Macdonald, then president of the local branch of the Ontario Chamber of Commerce, Ltd., had the executive assistance of the president of Canada Health and Accident Assurance Corporation, H. M. Barnes, president of Management Consultants, a former chief of the Ontario Board of Trade, Mr. Macdonald, assistant in forming the young men's section of the Montreal Board of Trade and the inclusion of a committee which must include an economic study of northwestern Quebec the report of which later sold at \$1000 per copy. Mr. Macdonald is a former vice president of the Canadian Credit Institute.

Mr. Macdonald's education included studies at McGill University, University of Toronto, The London School of Economics and the University of London, where he wrote his thesis on Economics. He holds the degrees of CMA and MCI.
During the World War II he served overseas in the Armored Reconnaissance with the 17th Duke of York Royal Canadian Hussars.

LEGION NOTES by Les Clark

A very late "thank you" to all the branch members and others who remembered the writer either by visit or card during his recent stay in the "butcher shop." They certainly were appreciated.

We'd like to add a rather late note of appreciation to those who handled the fireworks display again this year. It was far bigger this year, and it takes quite a bit of planning, however, the results were well worth it, judging from the estimated 2500 people who flocked out to see it.
That particular display cost some \$300 with council putting up \$200 and the Legion \$300. Maybe next year we could talk some one else into going in on it and go to the \$700 display which is the first of the electrically controlled exhibits, and is well worth the extra money. Who knows? We might just see representatives of another group in town, persuade their group to do it.

Orenda to Begin Lay-off Plans Cutback in Production at Malton

Orenda Engines Ltd. of Malton is to start laying off employees and cutting back production.

Walter R. McLachlan, vice president and general manager, in a statement to the company's 5,000 employees, said the layoff would extend gradually over a two month period starting in the next week or two. About 350 workers will be affected.

To date, more than 3,000 Orenda engines have been produced for the twin engine CP-100 and the single engine FB6 Sabre, the RCAP's two front line fighters. Orders have also been filled for the South African and Colombian governments.

A spokesman for the Defense Production Dept. in Ottawa said production of the jet engine reached a peak of 100 a month during the Korean war. Since hostilities ceased, production has been cut to about 50 per month and is to be cut still further on a sliding scale for about the next year.

The current layoffs will affect both production and service workers in some departments of the plant.

The company statement added, however, that the size of the labor had been reduced by increased activities in the Orenda engineering and experimental plant, where work is proceeding on a large turbojet designed for supersonic flight.

The new engine is being designed for the CP-105, a supersonic fighter plane being developed for the RCAP.

The addition of a third unit in the experimental plant, described many employees who otherwise might have been affected by the cut in layoff, an estimate of engine numbers.

A week ago Tuesday night was the last regular meeting and we expect to hold a last for another week or so after the last based on the enthusiastic sentiment of the members. The meeting seemed to prove it, and the club's present.

The meeting, a 40th anniversary commemorative and certainly add to the importance of the occasion. Sam Macdonald and family planned the whole affair and the work was done by the Hamilton crew in the garden. Macdonald and McLaughlin. Bowen then were made a date of "Thank You" for the time he has spent in running the various clubs and in operation in the industry. It has been fortunate to have such expert advice always available and so much enjoyed.

When last a den about a Branch 1200 crew with their beautiful town cars, some. This is about a year ago to any organization and we hope Georgetown will follow suit in the not too distant future. Incidentally, when last we were telling the pictures of their found in the Legion with one last month and two in the current issue. This month's one pages feature scenes of their anniversary. One shows the three original chapter members still active. Ben Macdonald, Fred Wright, and George Macdonald and Don Buchanan. The other shows a group of people and a group of people. Buchanan, Macdonald, and Macdonald.

The annual big event Branch 1200's home is just about upon us. So we hope and wish this summer next year for all the details. This year is a must, certain to get a reward for it. Stand by and we hope that every man, woman and child will turn up. Full details next week.

Professional Design
**HOSELINE AUTO
WASH
BRUSH**

Here's the "most wanted" style — at a low, low price —

- Generous, full-thick 2" bristles
- Flexible Plastic Head — won't scratch
- Water-Control Valve and Shut-off in Handle
- Fits any 3/4" garden hose
- Keeps hands and clothes clean and dry

Quick-Wash the Car in Easy Minutes

You can bet that Dad will give a loud cheer when he gets his hands on this good looking "Professional Design" Auto Wash Brush. Designed to do a better job, faster... neater, too — no slopping water over hands or clothes. Controlled spray forced through jets in the brush head quickly loosens dirt and floats it away. Wash and rinse in one easy operation. Shaped to fit all contours of the car, the soft rubber-like plastic protects car finish. It's colourful and handsome, built for natural convenient action with comfortable corrugated hand grip on handle. Simply attach to garden hose — Wash cars, windows, screens, in less than half the time. Yes, here's a gift that's "top with Pop!" — and it's priced right down your alley.
