Concert Association Seeks Membership for Fall Series

The membership drive of the Canadian Concert Association of Georgetown is now in progress. The object of the drive is to secure 400 memberships.

The value of such concerts to a community is obvious. The membership dues are most reasonable for a series of three concerts by such outstanding artists.

In former years, a series of concerts had to be underwritten by a few generous citizens who would guarantee perhaps \$100 each in the event that a sufficient number of tickets were not sold. The present series is operated by obtaining the help of about sixty interested people who volunteer to sell a few series tickets each, and no one is thereby responsible for any loss that could occur.

If the auditorium is not completely sold out, the concerts will be held perhaps with one less expensive artist. If a profit is shown, it is carried over to the next year and a wider choice of artists is then obtainable for the next series.

The concerts themselves are chosen by the executive board of the local association and this group usually represents the broad musical tastes of the people and they have

the best interests of the community at heart.

The basic principle behind the campaign for memberships is that the more memberships sold, the better the concerts. The only limit being the size of the auditorium available.

All artists appearing on the series have been carefully screened by Concert Associations of Canada as to their musical worth and their ability to project their personality and musical message across the footlights to their audiences.

Where a particular soloist is featured at one concert there will also be a second artist on the program. This has been found to be a most popular and desirable feature because of the variety it permits.

While well known "names" in Canadian music are obtainable in the series, it is of very great importance to young Canadian artists who have reached musical maturity and who are going up the ladder of fame to perform for a wide variety of audiences and to become well-known. It is interesting for audiences to hear these people who are "on their way up." Many of our greatest names in music were heard regularly in smaller towns

and cities before they became famous.

The Royal Commission on the arts, letters and sciences made this statement "unless the local committees in more than 150 Canadian towns and cities insist that a reasonable proportion of resident Canadian musicians be included, there is some danger that the Canadian concert stage will present no Canadians except for a few expatriates returning briefly for a concert tour of their native land."

It is highly commendable that so many local people have rallied to the support of these all-Canadian concerts. Canadian talent is second to none . . . Efforts such as this will allow our best talent to live, work and develop in Canada, where they want to be. It will enable us to keep our great talent here where we can hear them again and again.

It is hoped that all music lovers will be anxious to help the canvassers obtain their quota of tickets, and that the best possible series of all-Canadian concerts may be had in our own town.

Membership and information may be obtained by calling Mrs. Walter Townend, TR. 7-2758.

Service that can't be beat when you call TR. 7-2596—Booth Taxi.

TORONTO BOWLERS PLAN VISIT HERE FRIDAY

Friday night a group of Toronto men is planning to visit the local lawn bowling club for a friendly game.

Lunch will be provided for the visitors on their arrival by the 6.23 train. Some special prizes have been provided and club members are looking forward to a good evening of fun. A special car has been arranged by Harry Moss to take the visitors home on the down train at 11 p.m.

In the round robin being played every Wednesday night, Georgetown has played two games and has been on the losing end against Acton and Rockwood. Guelph visits tonight and Georgetown hopes to be more fortunate.

Men's doubles Monday nights are underway and a good turnout is expected from now on.

ATTEND POULTRY CLINIC IN THE STATES

Stan Matthews, R. R. 2, Acton, field serviceman for Halton Cooperative Supplies, has returned from Myerstown, Pa., where he attended a clinic on poultry health and nutrition conducted by Whitmoyer Laboratories, Inc.

During his stay at the laboratories, Mr. Matthews attended classroom lectures and demonstrations and participated in poultry disease diagnosis work.

SCIATICA

The pain experienced by those stricken with sciatica can be excruciating.

Sciatica, or sciatic neuritis, is an inflammation of the Greater Sciatic Nerve, which is the largest nerve of the body and contains many thousands of delicate nerve fibres.

The five nerve roots which form each sciatic nerve emerge through openings in the lower spinal column, join and then pass down the hip and leg. This nerve supplies and controls the major portion of the structures as well as sensation in the hip, leg and foot.

Careful examination is necessary in order to determine if the nerve involvement is caused by spinal subluxations, disc involvements, mechanical defects or other causes. X-ray examination is frequently invaluable and may be considered necessary.

The Doctor of Chiropractic knows that it is of prime importance to locate and eliminate the cause of sciatica, but he also considers it necessary to remove any aggravating factors such as sagging springs, mattresses and chairs, objects carried in the back pockets pressing on nerves which can cause additional pressure, and incorrect methods of lifting.

GEORGETOWN COW MAKES BIG PERFORMANCE RECORD

During the past month, 2,048 Canadian Holsteins have completed official Record of Performance tests on twice a day milking. The largest of these from the milk standpoint is that of Emeraldale Rag Apple Louise owned by A. H. McKane, of Georgetown. As a junior four year old she gave in 365 days on twice a day milking 21972 lbs. milk containing 757 lbs. fat. This record has a breed class average of 186 for milk and 175 for butterfat, indicating that it is 88 per cent larger for milk and 75 per cent larger for fat than the average record completed in its class in Canada.

As a junior three year old Louise completed one of the top five records in Canada in 1955 by giving in 365 days on twice a day milking 18,912 lbs. milk containing 681 lbs. butterfat.

Louise has been classified Very Good in Selective Registration, the second highest rating attainable for bodily confirmation.

The Many-Splendored Thing...

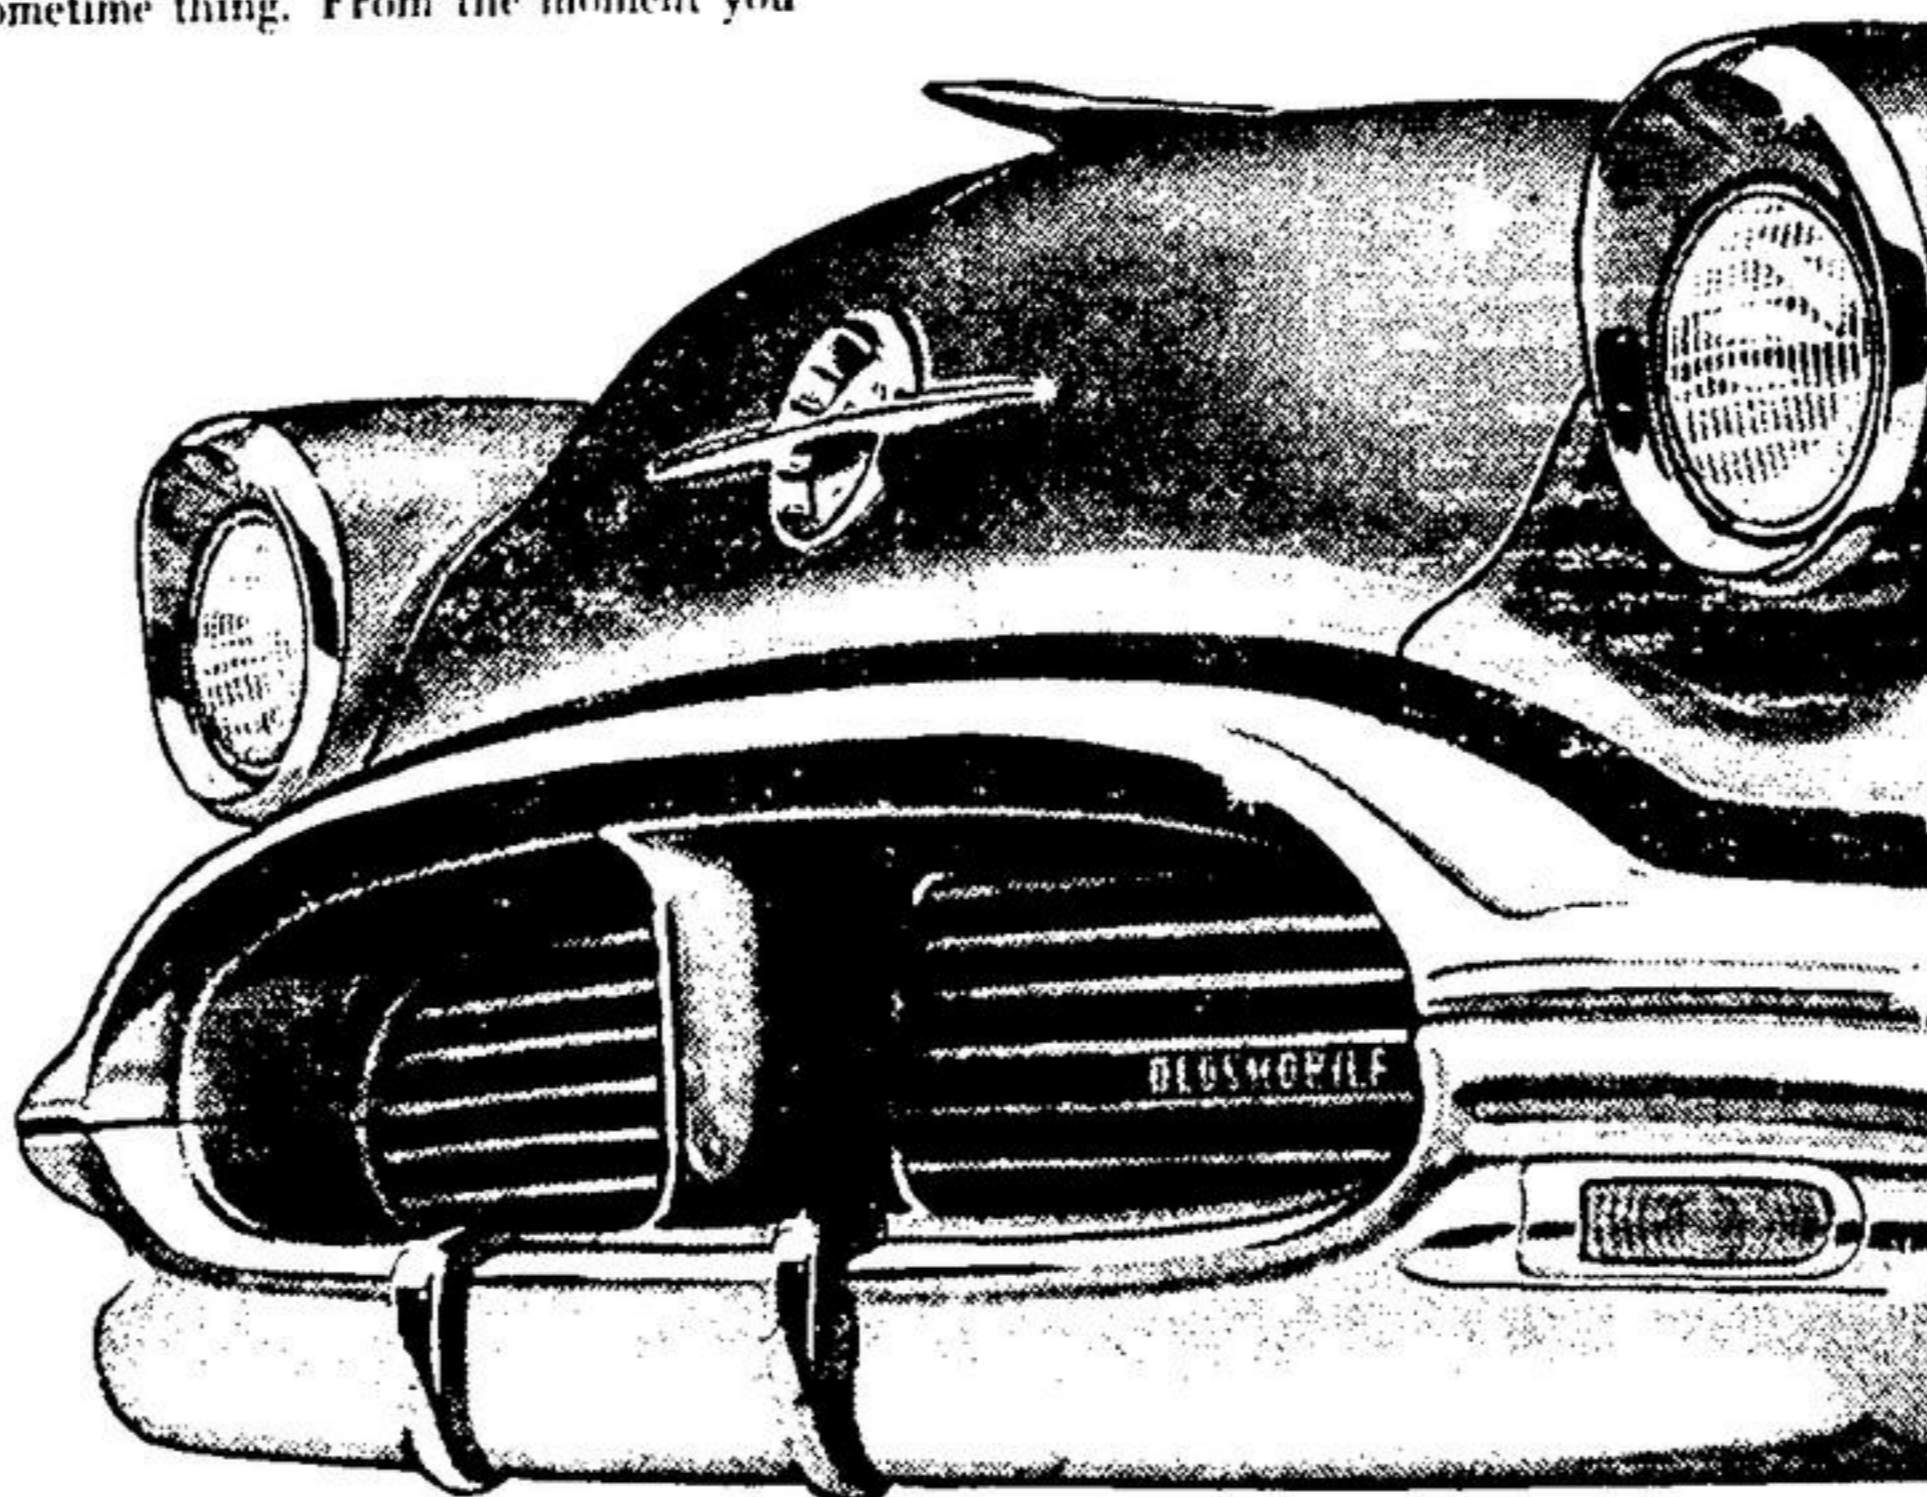

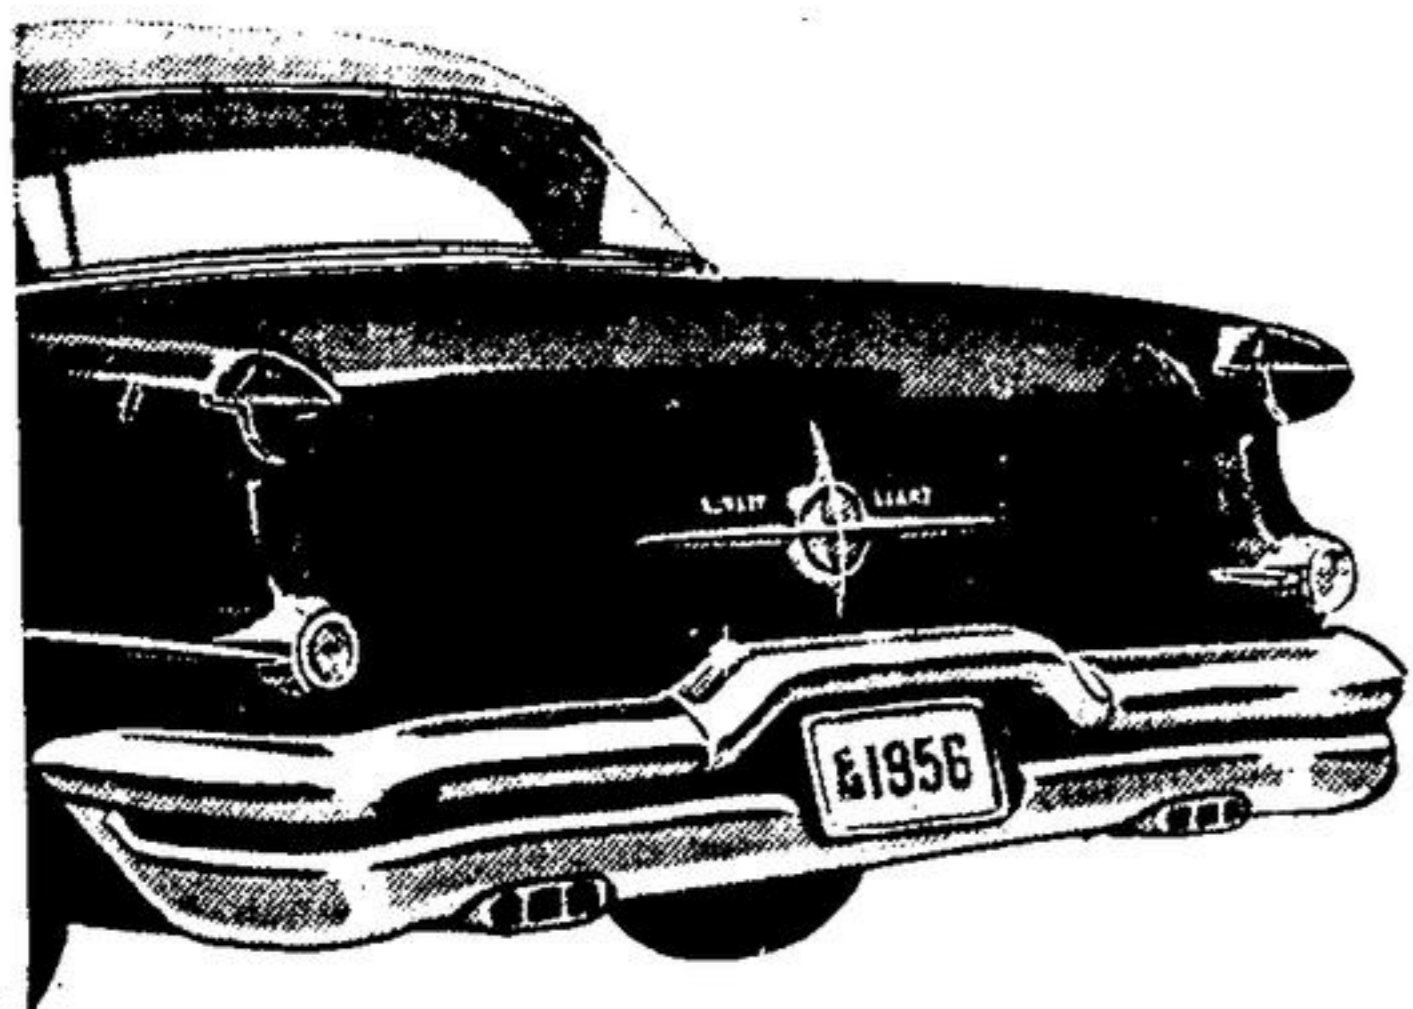

Splendor is everywhere in Oldsmobile.

There's the splendor of distinctive Starfire styling—fresh, dignified, but so alive. There's the splendor of rich, custom-tailored interiors—luxurious, gracious and so comfortable. And there's the splendor of mighty power, tamed to go quietly about its task of producing swift, smooth motion.

And this Oldsmobile splendor is not a sometime thing. From the moment you

proudly take possession until that distant day when you decide to trade it in on an even more exciting Olds of the future, you'll keep discovering new splendors in this unusual car. And you'll keep reflecting all the while how wise you were in 1956 to step up from the ordinary into an Oldsmobile.
