**VACATION TIME** . . . Golf, swimming, tennis and canoeing, these are just a few of the outdoor attractions to be found this summer at Canadian Pacific Hotels across the nation. Upper left, a slick approach spot is made to the green at St. Andrews, N.B. Upper right, a young miss tries her hand at some tennis at Banff Springs Hotel, Banff, Alberta. Lower left, the clear water of Lake Louise, Alberta, make for smooth canoeing. Lower right, a young couple bask in the sunlight and scenery found at the Banff Springs Hotel. These and numerous other outdoor activities are typical of the summertime attraction at Canadian Pacific throughout Canada.

**Low Waterflow, Pollution  
Are Credit River Problems**

An extensive survey to determine the future use of the Credit River was urged last week by the Credit Valley Conservation Authority in a brief presented to the Ontario Water Resources Commission.

The survey should be undertaken by the Ontario government so that the Authority and the river municipalities can be told how to build up the water resources of the area, the brief said.

The authority isolated low water flow during part of the year and water pollution as the main problems now facing the Credit.

The brief, presented by E. R. Grange, for the authority, said that in the northern part of the watershed water is now plentiful. But in the south a dangerous shortage is developing.

Because the soils of the Peel Plain are mainly clay and trees are few, streams are often dry

during the summer and at times the Credit is too low and unreliable to meet even the present needs of municipalities and industries.

The authority predicted that the Credit watershed will likely follow the same pattern of development as the Humber and Don watersheds — intense industrial expansion.

“Early and careful planning by the authority and the municipalities concerned is required to ensure an adequate and sanitary supply of water for the future expansion of domestic, industrial, irrigation and recreational needs.”

The survey proposed by the Authority would cover six main points; the amount of river water required now for domestic and industrial use; the amount of river water required now for livestock and irrigation; the estimated future development of the area and possible demands for water; the acceptable standards for wastes to be disposed of in the river; the amount of water available from underground sources; and the cost of pumping water from Lake Ontario.

Just as serious as the amount of water is the quality of water, the brief said. And this is going downhill, because of industrial pollution.

“Although it is realized that some manufacturers are conscientiously striving to prevent water pollution by the proper treatment of their wastes, there are other concerns which have no such scruples.”

“If the river is the easiest place to get rid of industrial waste, then into the river it goes. In the absence of law enforcement there is no law.”

The brief also accused some municipalities of dumping improperly treated sewage into the river. Several municipalities have outgrown their sewerage systems and failed to add to them. “Water pollution from both raw and improperly treated sewage has become a serious problem and is already affecting the use of the river for some purposes.”

The commission was holding its second public hearing on water resources since its formation by the Ontario Legislature. The first hearing was held at Kingston. In assembling information in which it will base its future activities, the commission has toured most of the province.

**Leaves Health Unit  
Goes to Peterborough**

John Robson, CRSA, CSI, (C), senior sanitary inspector in charge of North Halton with the Halton County Health Unit for the past three years, has resigned to accept a post in Peterborough as Chief Sanitary Inspector of City Health Department.

It was in April, 1953, he assumed his position with the Halton County Health Unit, leaving a post in London, Ontario, where he had been for three months. Prior to that he had served Dumfries County, Scotland, for seven years.

He will assume his duties in Peterborough on August 1st.

**CANADIAN CONTRACTS  
FINANCE GAS PIPELINE**

Trans Canada Pipe Lines Limited, has made enough progress to be able to finance its 2,200-mile line from Canadian markets only, a company official says.

A. T. Craig, vice president in charge of sales, told a panel discussion on natural gas at the forty-ninth annual meeting of the Canadian Gas Association that the company now is strong enough to proceed with its plans at once. The meeting was held at Murray Bay, Quebec.
