for a residential area (b) A sidewalk was constructed last fall in front of this property paralleling the highway. This walk is 3 feet above the level of the property and acts as a dam |causing all storm drainage west | from Rexway Blvd, to drain on the lawn and seep into the cellars. Prior to the construction of this walk, the drainage was to the ditch along the highway, where it was safely carried away. McColl Frontenae have expressed the opinion that it will require 1,000 loads of fill to bring the level of the prop-

erty up to the walk. (c) We find it impossible to have our front door or windows open due to the noise of passing traffic. The highway has a gradual rise past the property, and eastbound trucks find it necessary to drop down to a lower gear and accelerate, causing a deep roar and vibration. Westbound trucks decreasing speed on the down grade usually backfire right at our door Last Friday, July 27th, during the period of 10 p.m. to 10.35 p.m. I took a traffic check and counted eighteen (18) transport trucks, mainly eastbound.

(d) The establishment of a service station on this property would not necessarily affect a great number of residents as the adjoining land to the East is apparently reserved for the "proposed" green belt. (At present a bed of overgrown weeds and clay.) The rear of the service station property would back entirely on my own

Deputy Reeve D. Sargent is reported as saying, at the council meeting of July 30, that the area is 100 per cent residential from Windsor Road to Rexway. This may be correct, but the highway frontage on option to McColl Frontenac Oil, plus the "park" land to the east totals well over 50 per cent of the highway frontage in this block.

(e) When I went before council to request permission to move my house to the rear of the lot, facing on Prince Charles Drive, it was for the reasons as outlined here. Eventual sale of the highway lot for commercial use was implied to cover the cost of moving and improvements, but I had not, at that time, received any offers to pur-

chase or signed any options. I do not consider this to be residential property, facing on the highway, and it is certainly not the place to raise a family. I have two children, and the baby cannot sleep with a window open at night due to the traffic noise. Traffic passing our front door at 40 MPH and upwards creates another hazard, and I submit this speed would not be allowed if the frontage was recognized as purely residential. Cars turning in the driveway cannot see 50 feet ahead due to the incline required to cross the side-

My lot runs from the highway to Prince Charles Drive approximately 300 feet, and consists of 20,000 square feet. It is not possible to maintain all this land as it should be and my intention was to move the house back to the rear portion of the lot, approximately 7.200 square feet, improve it and
